MORE NEW MODELS COMING

The new models will soon be fitted with the "new" Cadillac, Oldsmobile, Buick, Cadillac and Pontiac. The Buick and Chevrolet have been successfully launched already. Oldsmobile Motors confirms the statement that the "new" Cadillac will be the most important car to be introduced by the public of Canada before the opening of the Montreal Motor show on January 23rd. Dates of the announcement of the four new models are expected to be announced in the next few days.

The Cadillac will be available in the form of a coupe, sedan and a convertible. It is expected that the Cadillac will be the most important car to be introduced by the public of Canada before the opening of the Montreal Motor show on January 23rd. Dates of the announcement of the four new models are expected to be announced in the next few days.

line and in 1924 assistant manager western lines. Since 1930 he has been assistant general manager of the department of Communications having supervision over the telegraph, telephone and radio broadcasting services of the railway. To the head of the new department Mr. W. D. Nell is appointed as general manager, and Mr. John McMillan, retired, vice Mr. W. D. Nell.

Mr. McMillan became a construction foreman with the Canadian Pacific in 1888 and passed through various grades of promotion in the West until March 1915 when he was promoted manager of Telegraphs in England and with the Grand Trunk in Canada before he joined the Canadian Pacific as a clerk in the Comptroller's office at Montreal in 1888. By October 1899 he had risen to the position of assistant auditor of disbursements. Similar auditor's appointments followed in 1901 and 1904 until in 1915 he became general stock-keeper, eastern lines, from which post he has now retired.

Here and There

Canada has a bumper crop of potatoes this year with an official preliminary estimate putting the total 1924 yield at 22,563,330 bushels from 574,200 acres as compared with 80,401,866 bushels from 571,300 acres in 1930.

Canada is the pioneer in fish culture on this continent. The first fry hatched from artificially fertilized eggs in Canada were produced in 1888 and fish culture was established as a Dominion Government service in 1897.

Britishers are eating Canadian eggs this year with their breakfast bacon. Estimates for 1924 place a figure of 20,000 cases, each of 30 dozen eggs, for export to Great Britain. Last year it was only 6,500 cases.

The fur trade is still one of Canada's big assets. In 1927 furs worth \$55,000,000 were exported to France. Last year their value was placed at \$17,187,390, mostly to Great Britain and the United States.

Grain traffic handled by the Canadian Pacific for October last shows a considerable increase over that carried for October, 1930. A total of 17,921 cars was loaded last month from the Prairie Provinces as compared with a total of 12,573 cars in October, 1930.

Idle since the first week of October the mill of the British Empire Steel plant at Sydney, N.S., is again in operation, giving full time employment of six days a week to upwards of 300 men. They are rolling soft steel for a number of Canadian concerns.

Jim London, world heavyweight wrestling champion, on a recent trip into the New Brunswick woods, bagged a black bear, wounded by two shots, charged London who dropped his rifle and tried to escape with it until he killed the bear.

Nova Scotia is coming into its own as a holiday province. In 1931 more than a quarter of a million tourists visited the province, the largest number of summer visitors in its history, according to records by Hon. J. C. Black, provincial Minister of Tourism.

To have joined the Canadian Pacific Railway at the time of its organization in 1881 and in the last seven years to have examined more men for promotion to engineer rank, than any other employee of the company, is the outstanding record of Albin Marzess, of Toronto, who has just retired from the position of Rule Examiner for the Motive Power department at Montreal.

The Brockville Recorder in a recent editorial urges all Canadians who are figuring on holidaying outside the Dominion this winter to consider the advantages of British Columbia where the Canadian dollar stands at par and where the climate is the equal of any to be found in the United States. Great Britain, the editorial adds, has set the example for Britishers which Canadians should be patriotic enough to follow.

The high reputation of Canada for the Pacific settlement of disputes with foreign powers is an example that courts considerable influence in the councils of the League of Nations and indicates that the Dominion should play an important part in the coming disarmament conference at London, says Colonel David Carnegie, C. B. E., noted lecturer on the promotion of peace who recently sailed for Great Britain aboard the Duchess of Richmond.

Beginning their first Canadian tour, the six members of the University of Oxford and Cambridge, arriving at Halifax by Canadian Pacific steamer Monday, went on via Montreal to Lacrosse-Quebec and from there went to St. John's and St. John's, Nfld., where they will contest against each other and with Canadian universities. The teams were welcomed at the Windsor station, Montreal, by Lord Dunsborough, son of the Governor-General, himself an undergraduate of Cambridge University.

POOR BLOOD

Every cell of the body requires food and waste products which it must get rid of. The blood serves this function for it is the blood stream which carries oxygen from the lungs and food from the digestive tract to every nook and corner of the body. If it is the blood stream that the body calls to its aid, it is not of such cases we speak. Purples, boils or other skin conditions are not due to poor blood, nor are they the result of impurities trying to rid the blood of nature's waste products, which are then carried by the blood to the eliminative organs through which they leave the body.

There are in the body, certain important glands which produce secretions and which control in large measure, many important functions of the body. It is in the blood stream that these internal secretions are circulated.

It is obvious that the blood, which forms about one-tenth of the weight of the body, is the most important of the body and responsible for its health. It is the blood which after its composition and therefore with the carrying-out of its normal functions associated with the nutrition of the body and removal of wastes.

In the minds of many people, there is the idea that when they feel miserable or run-down, particularly if it occurs in the spring of the year, which follow neglect of the body.

There is no foundation for the belief. The composition of the blood does not change unless there is actual disease of the blood itself, and it is not of such cases we speak. Purples, boils or other skin conditions are not due to poor blood, nor are they the result of impurities trying to rid the blood of nature's waste products, which are then carried by the blood to the eliminative organs through which they leave the body.

It is not through medicines that the body is kept healthy; it is through the proper manner of living. Exercise in the open air daily, sleeping in a room with the window open, bathing, making regular elimination by the formation of regular habits—these are the habits of life which make for health, physical fitness and freedom from the ill effects which follow neglect of the body.

SAFE DRIVING will save money

A new plan of Automobile Insurance, sponsored by two Canadian companies, provides reduced premium rates based on the individual merit of drivers.

10% REDUCTION for two years driving without accident.

15% REDUCTION for three years driving without accident.

20% REDUCTION for four years driving without accident.

Discount applicable to Public Liability, Property Damage and Collision Premiums.

Human Life is In Your Hands

Our merit rating policy is offered with a sincere desire to encourage careful driving and to foster a keen regard for life and property. Remember, it's the man at the wheel that counts—in his hands lies the safety of children, pedestrians and passengers.

The need for safety is imperative. Life and property are being sacrificed unnecessarily by careless and thoughtless drivers. Do your part. Help in the crusade for safer and safer driving. Talk, think and practise safety.

The SAFE DRIVER Comes Into His Own

Our merit rating policy rewards every safe and sane driver for his care, courtesy and common sense. He is no longer classed with reckless motorists. Instead, his premium rates are adjusted in accordance with his personal record of careful driving.

Under the New Financial Responsibility Law, no matter how careful you may be, you need the complete protection of our Automobile Policy.

"It's the man at the wheel that counts"

If you can qualify for this policy, see us today. Full details. Liberal policy on request.
