Industry On Trial

Inefficient Schools

CANADA

Lausanne Marks Time appears unlikely that Britain's plea for complete cancellation of war debts and reparations will be accepted at Lausaune—even within the limits

of the powers of that conference.

The greatest obstacle in the way of fual and full agreement at Lausanne is the uncertainty over the attitude of the uncertainty over the u the United States. The Government of the latter country has already served notice that the Hoover more-torium will not be extended beyond July 1 of this year. While there is cation, have removed the spectre of a general suspicion that that attitude famine and want. The need now is to is dictated more by the exigencies of the political situation in the United States than by determined permanent every civilized community can propolicy, it effectively precludes serious final discussion of the whole question until after the Presidential election.

No one imagines that the Continental European nations will attempt to be a company to Washington until the continuous serious serious discussion of the whole question and in the problem of under-consumption in a world materially richer than ever before. Is

resume payment to Washington unless and until Germany resumes payless and until Germany resumes payment to them. Britain has already decourage in the invisible governments clared that she will resume payments, of high finance, or will the common regardless of receipts from her own sense of the common people demand debtors, if the United States so de-mands. But there is a vast difference passe be found? — Commander J. M. netween willingness to pay and ability Kenworthy in Current History. to pay in the face of virtual tempor-

lodine for Storage Battery Iodine, the same chemical element that ie used as an antiseptic for cuts, is now bein, used in a storge battery of new type invented by Francois Boissier and announced to the French Academy of Sciences, says Science Service. The battery looks like an ordinary dry cell, with a rod electrode of carbon in the centre surrounded by an absorbent material saturated with zinc iodide, contained the an electrode shell of metallic zinc.

Between sense and nonsense the latter is the best seller. Let's ride back to business on a buy-cycle. To keep a romance from blooming, nip it in the bud. It is dangerous to lose the habit of making friends. You cannot build a reputation on the things you are going to do. When your foot's asleep let the sleeping dogs ile. Don't question your wife's judgment—look saturated with zinc iodide, contained in an electrode shell of metallic zinc. When the battery is charged the zinc iodide breaks down into metallic zinc that is deposited on the zinc sheeting and oxide that accumulates on the carbon electrode and in the absorbent material, which may be carbon powder. The zinc iodide is re-formed during the discharge of electricity. M. Boissier asserts that the iodine storage battery is superior to the conventional storage batteries of the lead or nickel-iron varieties. The plates do not disintegrate, there is no acid or caustic liquid to spill no dangerous And here are some of the "fors" caustic liquid to spill no dangerous
