BASEBALL

DUNNVILLE 10, JARVIS 5

The locals were again the losers in the Dunnvill fixture last Saturday afternoon at Dunnvill. The boys carried the game well with the exception of one inning, when Dunnvill scored two times, baggers which accounted for six of their runs had it not been for this slump on the part of the boys, the game would have been of real interest all the way through. The locals chances in the play-offs are now absolutely panned, however, they are going to do their very best at the next two games which will be played here, Hagersville on Thursday, To-day and Dunnvill one week from then, July 28th.

SOFTBALL

RENTON 10, JARVIS 5

Following in the footsteps of the baseball team Sam had the misfortune of losing again to the Renton team by the score 10-5. However, he didn't give up hope until the last man was out. In the last innings and the game was full of excitement all the way through.

The boys still have several more games to play to fill the schedule, and are looking forward to larger crowds as they feel that with a larger crowd on the bench they would be sure to win.

COMMON ACCIDENT CAUSE

Although Ontario automobile drivers are relatively careful, as evidenced by the fact that the province stands alone in not having had an increase in automobile insurance rates this year, yet records show some bad habits still prevail. For instance, the most common cause of accidents in 1931 in Ontario was driving in the centre of the road. It was careless, too, and not inexperience, as nine-tenths of all drivers in accidents had been driving for a year or more.

FACTS WORTHY OF CONSIDERATION

Volume of Business at Hamilton Dairies Local Plant Reaches High Peak in Month of June

Last week one of our readers, who was apparently aware of the large volume of business that is being done in the one and only real industry which our Village can boast, inserted a questionnaire in the columns of this paper requesting other readers to guess the number of pounds of butter manufactured in the local plant during the month of June.

Although this figure in itself is sufficient not only to warrant surprise but astonishment to most of us, and on learning this ourselves, decided to investigate further into the affairs of this industry, and through the co-operation of the management we have prepared a number of figures which represent the actual volume of business done in the local plant during the month of June.

There are approximately 1150 shippers, some sending fluid milk and others churning cream, these patrons come from within a radius of fifty miles of the local plant. The total number of pounds of fluid milk received was 1,065,545 pounds, of this was separated 41,022 pounds of heavy cream, 64,245 pounds of 32% cream and 2,300 pounds of 40% cream. Part of this cream was sent out for city consumption while the rest was churned into butter. There was 872 1/2 pounds of skim milk made into casein, which is a by-product of the dairy industry, and from this quantity of milk was made 25,238 pounds of casein. There was 250,610 pounds of churning cream sent to the plant from cream shippers, which before being separated is equivalent to 2,615,430 pounds of whole milk, also 58,120 pounds of heavy cream was purchased from other branches of the Company, which is equivalent to 639,230 pounds of whole milk. The total number of pounds of butter milk made from this was 271,029 pounds which was sold to a nearby creamery for the manufacture of powdered butter milk. At the present time twenty-one include the full staff of both inside and out, and also the Rev. Wrayton's farm. He soon had a comfortable log house ready for his coming family. Very vigorously he got to work and had a large clearing ready for crop. This and finally sent into the hands of his two daughters, Mrs. Ladd and Mrs. Reid. It is now owned by one of his grand daughters, Mrs. Ed. Chanda whose husband is a first class farmer.

His early training as a soldier developed a vigorous frame and when past eighty his erect frame and military stride gave evidence of the value of such training when young. To him the name of Bonaparte was sacred and you would be very likely to feel the force of his strong right arm if you spoke disparagingly of his hero. He lived till he was ninety-four, when bugle call of the night "Tattoo" gave him rest and the morning reveille called him to the grand army of the dead. —W.H.S.

AN EARLY SETTLER

We are reminded by the death of the late Samuel Thompson, that very soon the last of the pioneers of Walpole and Woodhouse will have passed away. Many of these early settlers who have within the last seventy-five or one hundred years, by their increasing efforts, made such wonderful changes in the lake front of those two townships, are worthy of the gratitude and kind remembrance of the people of that splendid section. Shortly after the close of the bloody wars against the French, the public and the banishment of the great military leader Napoleon in 1815, many officers and privates of both the English and French armies emigrated to Canada. One of these companies of British officers with their families chose to make their homes along Lake Erie in the area mentioned township. Among these we would mention the Lowes, Forbes, Halls, Mercers, Uilsons, Gambles and the Rev. Mr. Drayton. Many of these families have occupied many of the best and most fertile lands in our counties, such as judges, sheriffs, customs officers, notaries, surveyors and county and township officials.

We wish to mention particularly one other pioneer who came into the above neighborhood about the same time and whose career shows how little we know how Providence may change the whole course of the lives of our youth. Young Adrian Faurie, a son of one of Napoleon's generals, was educated to fit him for some important position in France, but at an early age, he was made commander of a company of Coast Guards to watch for smugglers along the south shore of France. About this time Napoleon, who had been driven out of Spain by Wellington's armies, had been banished by the Allies to the Island of Elba. Plans were soon on foot to again bring him back to France and three sloops were sent to anchor close to the island. These managed to get him on board one of the boats and by morning they were seen near the port "Antibes" and Adrian's company was on hand to search these sloops. When the first boat came to the wharf Cap. Faurie saw the late Emperor on the deck and was the first to grasp his hand and welcome him back to France.

History tells us that in nineteen days he was emperor again and was at the head of a large force which was signally defeated by the Allies under Wellington and Blucher at Waterloo July 18th, 1815, and was shortly afterwards sent as prisoner to St. Helena, where he died in 1821. Young Faurie was so humiliated by this turn of events that he determined to leave France and come to America. He spent a short time as a teacher in Montreal but soon made his way to Lake Erie and secured 100 acres in Woodhouse, a couple of miles from the Rev. Wrayton's farm. He soon had a comfortable log house ready for his coming family. Very vigorously he got to work and had a large clearing ready for crop. This and finally sent into the hands of his two daughters, Mrs. Ladd and Mrs. Reid. It is now owned by one of his grand daughters, Mrs. Ed. Chanda whose husband is a first class farmer.

His early training as a soldier developed a vigorous frame and when past eighty his erect frame and military stride gave evidence of the value of such training when young. To him the name of Bonaparte was sacred and you would be very likely to feel the force of his strong right arm if you spoke disparagingly of his hero. He lived till he was ninety-four, when bugle call of the night "Tattoo" gave him rest and the morning reveille called him to the grand army of the dead. —W.H.S.

OTAWA AND WORLD RECOVERY

If what is done and resolved at Ottawa can set on the road to recovery the quarter of the world which is under the British flag, the other three-quarters will find their recovery may be much easier, both directly and by example. It may well be that the greatest service of the Government of the Empire can render the world at the present time is to make Ottawa a success. — The Times, London.

WARNS MOTORISTS

A number of complaints have been received by Cal Davis, secretary of the Hamilton Automobile Club, from motorists who have been fined for not stopping at the intersections of No. 3 and No. 6 highways at Jarvis. A complaint of this nature reached a sizeable figure, Mr. Davis investigated the crossing in question and found that the stop sign at the intersection was probably overlooked by motorists, due to the fact that that particular portion of the town of Jarvis boasts exotic floral beauty and motorists, while drinking in these sights, forgot to keep a wary eye open for road signs.

While No. 3 highway is heavily travelled, No. 9 highway is also an important artery to Lake Erie beaches, such as Port Maitland, Port Dover, etc., and on the week-ends particularly is very busy. Motorists are warned to watch out for this sign and avoid bringing summonses upon themselves.

Another portion of highway on which motorists should observe road signs is that between the Beach canal and the town of Burlington. A short distance north of the canal a road sign has been erected calling motorists' attention to the fact that the speed limit is but 20 miles an hour. Many disregard this speed limit, and as a result some 51 summonses were issued last month by Burlington police and 49 fines registered in the police court there. The 49 offenders contributed a total of \$500. to the courts for their recklessness.
