SYNOPSIS.

Don Ellsworth's wife, formerly actress Sheila O'Shay, disappears. Dr. Cavanaulus, criminal psychologist, identifies a charred body found in the tule marsh as that of Shella. Barbara, his daughter, faints when she hears him tell this to Peter Piper, a Herala reporter.

A threatening note signed "David Orme" is found in the murdered woman's safe. Peter trails Orme and arrests him. A torme's trail it is revealed that Shella is really Orme's wife.
