MISLEADING ASSERTIONS

(Continued from last week)
resumed employment by industry of workers now idle.

An Alleged Purchase of 4,000,000 Horsepower
According to The Globe of February 18, 1933, Mr. Hepburn at London, Ontario, asserted,

Mr. Hepburn is reported in different localities publicly to have stated that a Hydro-Electric power "surplus" exists or will exist variously amounting to 350,000 horsepower, 1,000,000 horsepower, 1,500,000 horsepower, and 15,000,000 horsepower.

Mr. Hepburn's statement, reported from London, alleges the Commission's total of purchased power to be 4,000,000 horsepower—a statement so grossly exaggerated that it is difficult to understand how anyone could be found to give it serious attention.

Unfounded Statement that Purchased Power Was Not Needed
The Globe of January 20, 1933, reporting Mr. Hepburn's speech at Newmarket, says:

"Directing attention to the Hydro question, the Liberal Leader declared that they contracted for 1,000,000 horsepower more than they needed and then the people of Ontario had to stand for a loss of \$12,000,000 to \$14,000,000 as a result of the Commission contracting for power it could not use."

The Newmarket statement, it will be noted, refers to the aggregate quantity of purchased power; that Mr. Hepburn alleges was more than needed. This statement is in direct conflict with the recorded facts already cited, which shows that, far from contracting for more than probable need, the Commission contracted only enough to meet growth at 7.7 per cent per year, as against established trends over eighteen years of 11.4 per cent per year.

In fact, the Commission's power contracts actually are set up faster than it had been specified in the contract, and the other power contracts aggregate— including both present and future deliveries—total 17,000 horsepower. Although this aggregate is less than half the 1,000,000 horsepower figure Mr. Hepburn alleged, and was all needed to safeguard against shortages in case the trends up to 1929 should be repeated, the figure was 1,000,000 horsepower, and more was needed.

A Fictitious Figure of 1,500,000 Horsepower
As a final illustration of Mr. Hepburn's disregard for both fact and consistency, may be cited a Canadian Press dispatch from Port Arthur which appears in The Globe of December 8, 1932, and which states:

"Criticism of the policy of the Ontario Government in regard to its Hydro-Electric power policy, by which, he (Mr. Hepburn) said, the Province now had a surplus of 1,500,000 horsepower, which was costing the people \$20,000,000 a year."

This statement of Mr. Hepburn's differs from his Leamington statement only in that he has further exaggerated his unfounded assertions, setting the date of the alleged surplus, not as he did at St. Mary's as for the year 1931, or as at Leamington placing it in 1933, but even putting it back to 1932, and increasing his figure from 1,000,000 fictitious horsepower to 1,500,000 fictitious horsepower.

Amorely, such statements as are here dealt with afford good illustration of how Mr. Hepburn in his statements, not only neglects to have them conform to the facts, but does not, apparently, even aim to have his various statements in harmony with one another.

Summary
Enough has been said to show beyond question the true character of Mr. Hepburn's public statements regarding the Hydro-Electric power situation. A correct statement of the facts could have been made by Mr. Hepburn if he had consulted the published records and special statements issued by the Commission. Adherence to the facts would, however, have compelled him to admit that in connection with the Niagara system, for which the power purchases have been made, the Commission has not only surplus power in the sense that supplies available are not absolutely needed for protection of Ontario industries and workers, but that even the special reserves to enable re-employment really amount to but some 200,000 horsepower, and that the provisions for the years up to 1937 are very moderate in comparison with the proven capabilities of Ontario for power absorption.

Not having presented the facts, Mr. Hepburn had an unlimited field for assertion open to him, and, apparently, he has fully availed himself of the latitude he sought.

Mr. Hepburn is reported in different localities publicly to have stated that a Hydro-Electric power "surplus" exists or will exist variously amounting to 350,000 horsepower, 1,000,000 horsepower, 1,500,000 horsepower, and 15,000,000 horsepower.

Now more than ever GOODYEAR "Pathfinder" Tires are the great tire value

You can save about 20%—and yet get QUALITY tires in every sense of the word—by buying Goodyear Pathfinders. These strongly-built tires have the advantages of Goodyear Super-twist cords, Goodyear-processed rubber and Goodyear balanced construction. They are handsome in appearance. In every part of Canada they are piling up record mileage. Not a tire any price carries a fuller guarantee.

Table with 3 columns: Tire size, Price, and Guarantee. Includes items like 29X4.50-20, 28X4.75-19, 30X5.00-20.

MORE PEOPLE RIDE ON GOODYEAR TIRES THAN ON ANY OTHER KIND

F. W. Reicheld Jarvis, Ontario

LEARN TO SWIM
The Ontario Safety League wisely warns people to be careful when bathing or swimming, stressing the following points:
1. Never in less than one hour after meals.
2. When you are not too tired.
3. Dive only in water you know is deep enough.
4. All this is wise advice and should be impressed on people throughout the province, remarks the Lindsay Post, because if everyone took the precautions listed above there would be but very few drowning accidents. Every boy and girl should learn to swim. There is no excuse for not learning, because it is so easy, and the ability to swim is of wonderful value as so many people spend their vacations near water. Unless a person can swim, much of the pleasure is taken away from boating and one is apt to be a helpless spectator while a child drowns within a few yards.
Swimming gives more pleasure in summer weather than almost anything else that can be named, and is only another one of many reasons why people should set themselves the task of learning to swim at the first opportunity.
He—"I have never loved a girl but you."
She—"Then we must part—I hate amateurs."—Karlitoren Oslo

REGULATIONS REGARDING MIGRATORY BIRDS

The National Parks Service of the Department of the Interior, Ottawa, has just issued the Regulations regarding Migratory Birds for the current year.

A summary of the Regulations as they apply to Ontario follows:
Open Seasons
Ducks, Geese, Brant, Rails, Coots and Wilson's or Jack-Snipe. Telephone 35.

In that part of Ontario lying south and west of the French and Mattawa Rivers and also including all Georgian Bay waters; September 1 to December 15.
In that part of Ontario lying south of the French and Mattawa Rivers but not including any portion of

HEALTH HELPING TO PREVENT HONEY SPOILAGE

(Experimental Farms Note) Spoilage of honey by fermentation is caused by the action of yeast which are able to act in the presence of the high percentage of sugar found in honey. Considerable attention has been devoted to this question at the Central Experimental Farm, and it has been found that fermentation depends almost entirely upon two factors, the moisture content and the amount of infection by yeasts. Consequently the better ripened a lot of honey is, and the greater the cleanliness exercised, the less likely will the honey be to ferment during storage. All honeys contain yeasts to some extent. Some of this infection is doubtless carried by the beekeeper, by the time of extraction to work with well cleaned and preferably sterilized utensils, in a clean extracting house, is able to control much of the contamination and help obtain a product safe from spoilage.

At the Division of Bacteriology a method has been evolved by which an examination of the freshly extracted honey will indicate whether the honey may be expected to remain safe from fermentation within one year. Honeys which are in danger of spoilage may thus be subjected to further treatment, such as heating, to prevent fermentation. The practical beekeeper, however, by concentrating on preparing a well ripened honey, produced in as clean a manner as possible, can do much to insure for himself a product of good keeping quality.

rather they are those who do each thing at the time they have time to do quietly and, in consequence, effectively and efficiently. There is a happy medium between procrastination and dereliction is essential to health, and this is a point which seems to be unknown to so many who either work or attempt to play in a strenuous manner which is destructive to health and longevity.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by Dr. H. C. Robinson, M.D.

FISHERVILLE

A large number, from here attending the Junior Farmers and Junior May On-Fishnik, of Jarvis, spent Sunday afternoon at Danville on Sunday afternoon.

Mr. and Mrs. A. J. Hunter, of Jarvis, spent Sunday with Mr. and Mrs. O. F. Reicheld.

Mr. and Mrs. Gordon Fees, accompanied by Mr. and Mrs. Walter Robinson, spent the week-end with friends in Tonawanda, N.Y.

The local softball team were defeated here on Friday night by the worst exhibition of ball played here this season. Score, New Danville 11, Fisherville, 7.

Mr. O. E. Reicheld, spent Monday in Brantford.

Mr. and Mrs. A. E. Pass, spent over the week-end visiting relatives in Williamsburg, N.Y.

Mr. and Mrs. Fred Kimmert, spent Saturday in Buffalo.

Mr. and Mrs. W. F. Baile, have returned after spending a week in Collingwood.

Mr. and Mrs. Walter Kimmert and Mrs. Earl Kimmert of Hamilton, spent in town with Mr. Kimmert's mother, Mrs. J. Kimmert.

Mr. and Mrs. Bruce Fees and Miss Lillian Fees, spent the week-end in Toronto.

Miss Dorothy spent the week-end with friends in Stratford.

Mr. E. G. Ryckman, is spending a few days in Niagara Falls.

Mr. Wm. Sitter of this place and Miss Lillian Ebert, of Fenwick, were quietly married at the Parsonage on Saturday.

Congratulations to Mr. Ed. Waffels, of Tavistock, spent over the week-end at the home of Mr. and Mrs. H. K. Hartwick.

Mr. K. W. Besser, spent Monday at the Exhibition.

Rev. Chauncey Snowdon, occupied the pulpit in the Anglican church on Sunday evening and Mrs. Gordon Livingston sang.

ROCKFORD

Misses Fannie Edwards of Waterford, Lillian Kenny, of Tyrrell and Mary On-Fishnik, of Jarvis, spent Sunday at their respective homes.

Alex. Thomson spent the week-end with his uncle and aunt, Mr. and Mrs. Frank Lailaw, of Jarvis.

Clarence Gilbert spent Sunday with Alex. Henney, who is confined to his home with an injured leg.

Miss Martha Kenny, spent part of last week with her sister, Lillian at Mr. Clarence Wallace's, Tyrrell.

Mr. and Mrs. Frank Smith, spent Friday in Brantford.

Mr. and Mrs. David Petheram, are enjoying a holiday in Bala, Muskoka.

Mr. and Mrs. J. Williams and son Jack Paul and baby of Toronto visited last week at Mr. Alex. Angus' home.

Mr. and Mrs. Margaret and Mr. William Richards, attended the funeral of the late Mrs. Geo. Richards, in Hamilton, on Saturday.

Mrs. J. Priest and Mr. and Mrs. Dr. and Mrs. A. B. Lemon, also in Buffalo and Crystal Beach.

The church service on Sunday evening was in charge of the local branch of the W.M.S. Mrs. Smith, Council president, of Delhi, was the special speaker for the evening.

The young people enjoyed a corn supper on the flats on Wednesday evening.

Our annual Sunday School picnic was held at Port Dover last Tuesday with a good attendance.

The time spent by the Little League is a list of the races: Billy Bauslaugh; Shirley Golding.

Little Boys — Bobby Onifrichuk, Harry Saunders.

Boys Under 9 — Bernice Golding; Donald Anderson.

Boys Under 13 — Harold Riddill; Teen Age Boys and Girls — Theodore Riddill; Katie Onifrichuk; Young Men — Theodore Riddill; Alex. Lamery.

NOW is the time to roof TITE-LAP is the roof to use!

Prevent rain and decay from eating into the heart of beams, joists and rafters. Protect against rot, against fire. Roof with Tite-Lap. Prices may never be so low again.

Tite-Lap is permanent, leak-proof, fire-proof. Easily and quickly erected—comes in sheets 5, 6, 7, 8, 9 and 10 feet long. Saves sheathing lumber on new buildings. Made in Canada under strict quality standards.

Tite-Lap is Canada's greatest roofing value. Let us prove it. Send us ridge and rafter measurements and we will send free estimate.

Galvalumel Rib-Roll Beautiful, inexpensive, easy to lay. Another successful roofing material. Cannot warp, shrink, crack, curl or blow. Fireproof. Instructive colors.

FISHER BODY CRAFTSMAN'S GUILD

Chicago, August 16th — Three University scholarships out of seven offered by the Fisher Body Craftsmen's Guild to boys, who build the Coaches in North America, go to

To-night before one hundred and fourteen State and Provincial winners attending the Century of Progress Exposition the Guild announced the names of the boys who will receive the scholarships.

The three fortunate young Canadians were presented with their scholarship certificates by R. S. McLaughlin, President of General Motors of Canada Limited and President of the Canadian Section of the Guild, who were warmly congratulated for their achievement.

The three fortunate young Canadians were presented with their scholarship certificates by R. S. McLaughlin, President of General Motors of Canada Limited and President of the Canadian Section of the Guild, who were warmly congratulated for their achievement.

W. A. Fisher, International President of the Fisher Body Craftsmen's Guild congratulated the three Canadian boys for their pluck and perseverance in duplicating their feat of last year.

The four American Scholarship Winners announced to-night were Charles Gadd, of Spokane, Washington; Jack Wilson, of St. Paul, Minn.; Wilson Webb, of Arkansas City, Kansas; and E. Stanley Knoche, of Baltimore, Md.

Each awarded quitted its winner to four years in any University he selects. Studying the course he desires will have the benefit of the advice of the Guild Board of Honorary Judges, which includes fourteen of the leading Scientific Educators of Canada and the United States.

Boys still in High School will be credited with the interest as well as the principal to defray their university costs. Any money remaining upon completion of a boy's higher education will be paid him in a lump sum.

Junior and Senior winners in their respective Districts, the fourteen beneficiaries present for the big event at the Century of Progress Exposition, will see the "Wings of a Century" pages on Friday following a sports program, which will again attend the Fair, winding up the day in the immense reproduction of the famous Guild Square, a permanent plaque will be installed by the Fisher Body Craftsmen.

LATE BLIGHT DISEASE OF TOMATOES

During the late summer of 1932 late blight of tomatoes which had never before been considered of great importance in the Maritime Provinces and other sections along the Atlantic coast, has been the same disease which causes the destruction of potato plants and

All parts of the tomato plant are attacked by the late blight disease, infested plants developing irregular, water-soaked spots on the leaves and stem-like lesions on the stems. Under favourable conditions spread, causing the plants to turn black and die. The tomato fruits are also attacked by this disease, appearing as a firm brownish, rather blotchy decay, most commonly originating at the stem-end and spreading to involve the entire fruit which eventually rots.

Late blight is caused by the fungus, Phytophthora infestans. It spreads inside the affected plant and spreads through the field by means of spores which may be seen in vast numbers on the lower surface of diseased leaves.

Prevention of this disease is made possible by early and thorough spraying with ordinary Bordeaux mixture, using the 4-4-40 formula. Tomatoes gathered from infested areas should be held in a dry shed for several days when all infested tomatoes will be easily detected and discarded.

N.B.; Harold Hirst, Vancouver, B.C.; Victor Mackenzie, Victoria, B.C.; Vernon M. Parrish, Medicine Hat, Alta.; Joseph Olafson, Midway Park, Saskatchewan; Harold Ramussen, Regina, Sask.; Harry Yasyna, Winnipeg, Man.; and Fred Ross, Winnipeg, Man.

Present also were; John A. Stiles, Chief Executive Commissioner, The Boy Scouts Association of Canada; C. H. Mitchell, Dean Faculty of Applied Science and Engineering, University of Toronto; Augustus Ferguson, Director General of Technical Education, Province of Quebec, Dean of Ecole Polytechnique, University of Montreal; and Thos. H. Corpe, Secretary, Canadian Section, Fisher Body Craftsmen's Guild, and Advertising Manager of General Motors of Canada, Limited.

The presentation ceremonies were broadcast from 8.45 to 9 P.M. over a continent wide network, with the broad Edwin C. Hill at the microphone.

Announcement of the awards and extensive program for the young craftsmen-to-day. From their headquarters at the Edgewater Beach Hotel they started on a sight-seeing trip around Chicago this morning and after lunch at the Sirloin and Saddle Club at the Stockyards, they made a survey of the big packing-plants.

To-morrow the visiting craftsmen will go to the Century of Progress Exposition, and will see the "Wings of a Century" pages on Friday following a sports program, which will again attend the Fair, winding up the day in the immense reproduction of the famous Guild Square, a permanent plaque will be installed by the Fisher Body Craftsmen.
