prices received for beef cattle and other meat animals in Western Canada are too low. The fact is that the West produces far less of export quality animals than could be profitably exported, and at the same time produces a continual surplus of stuff that is not good enough for export. The result is that the low-quality stuff must be worked off at distress prices on the local market.—Winnipeg Tribune.

the liberal professions is closely connected with the abnormal distribution of the world.

True grace is natural, not artificial, bccause however strenuously you strive to gain it, when it is gained it never gives the impression of effort or straining for effect.—F. D. Huntington.

We are told to walk noiselessly through the world, that we may waken neither hatred nor envy; but, agas! what can we do when they never size in gton.
