Alex C. Saunders, S.S. 17 ..1121.58 MUSKOKA-A SUMMER AND WINTER SPORTLAND /

Leaf by William H. Smith.

The Muskoka lake district of Ontario, about one hundred miles north of the city of Toronto, is a section of the province thickly dotted with summer hotels, resorts, cottages and camps. It has long been a favour-was born about 1770 in Northern rite playground, not for residents of Toronto alone, but for all of Canada, and for manyw ho live south of the and an elder brother were away with and for manyw ho live south of the corps, one morning the mother was located with camps. Splendid rail connection the troops, one morning the mother was studied (Experimental Farms Note)

(Experimental Farms Note)

The term 'blast' or 'blight' has been given to a type of sterility commonly found in the oat crop and which presumably lowers the yield quite considerably some years. This phenomenon manifests itself in the form of white, empty glumes at the time of heading, particularly towards the bottom of the panicle.

Many surestigators have studied

with Toronto and other points and excellent motor roads leading to and her youngest children playing around excellent motor roads leading to and her youngest children playing around see has not definitely been determined. The percentage of 'empty glumes' in penetrating the region make it easily accessible. It is a land of lakes and rivers with a diversity of attraction and rivers with a diversity of attractions are represented by the penetrating the region make it easily accessible. > Gay, Modern Lamp Shades Made from Strips of "Cellophane"

And smile.

ONE of the most important adjuncts to the charm of any room is its lamp length of the roll by withdrawing the cardshades, and the modern trend for colourful board tube and slitting the roll lengthshades, each with a touch of individuality, is nowhere better shown than in the in-

covering of which has been discarded.

"Cellophane", in a roll, some colored crepe paper, a few gummed blue, red, or gold stars and a yard and a half of ribbon for binding are the materials needed. Many color combinations can be made. Having secured either an old or new wire frame, cut the paper slightly more than the height of the frame and as wide as two of the sections made by the wire uprights. Stretch and paste it over two sections, pressing it down neatly top and bottom. Trim off the surplus. Proceed around the frame until it is all covered with the paper. Then stick stars, or colourful cut-outs of any sort, here and bottom.
