CHAPTER I.

Peter Wayne wasn't asleep when the telephone rang. He ought to have been; it was late enough, n all conscience; well after three, nearer four, probably. And he'd been in bed since half past on. He wasn't able, later, to letter just when the quick, stabbing sound of the bell roused him; that was to seem important, for a while. But he was lying in the dark, so that he couldn't see his watch. He had turned out the light some time before, because, though he couldn't sleep, he had found that he couldn't read, either.

Peter was in a vile temper, and he lay in the dark silence of his room, giving way to it, as one does, stupidly enough, sometimes, encouraging it to grow worse and worse. Nothing is more futile than the sort of sort of anger that possessed Peter, but every one does yield to it from time to time; the sort of anger in which jealousy and resentment, and a sense of being, really, in the wrong, are all components and the proper in the property of the word, are all components and trying to grasp the fact that he was dead. He'd seen Tack, very much alive, mot so very many hours ago. He'd had lunch at the Yale Club, with George Garrison, and Tack had been at another table. They'd waved to one at another table. They'd waved to see Tack this grow ever and spoken to him. One's mind works addly at such times. And—too, he'd expected to see Tack this evening, only, of course, as 'hings had turned oue, he hadn't.

But he didn't really grasp the fact that he shauld be, and still less was it imaginable that anyone should have killed him. It didn't make sense. Who on earth would want to kill Tack Thayer, and why? He wasn't the word of man anyone would dream of killing. No one, just for one thing, would take him seriously enough. Peter caught himself up, sharply at that. It wasn't the

It wasn't shrill with fright, at all; it was as deep and throaty and beautibear fright in it, just the same, and even horror—just in that repetition of his name. "Peter! Can you come up here right away? I've just come in. Something frightful has happened. Some one's killed Tack—"
"Tack? Killed Tack—"
"Tack? Killed?" Peter echoed, stupidly.
"Yes. He's been shot. Can you tome right away, Peter?"
