The Prime Minister's confident

and encouraging statement intro

ducing the new Dominion Loan has cre

ated a very positive and favorable

reaction throughout the country. It

reads on throughout of his con

fidence in the future of the coun

try. This is the evidence he has

given in his statement. It is a

stimulus to the confidence of the

public in the government and in the

future of the country. It is a

stimulus to the confidence of the

public in the government and in the

future of the country. It is a

stimulus to the confidence of the

public in the government and in the

future of the country. It is a

stimulus to the confidence of the

public in the government and in the

future of the country. It is a

stimulus to the confidence of the

public in the government and in the

future of the country. It is a

stimulus to the confidence of the

public in the government and in the

future of the country. It is a

stimulus to the confidence of the

public in the government and in the

future of the country. It is a

stimulus to the confidence of the

public in the government and in the

future of the country. It is a

stimulus to the confidence of the

public in the government and in the

future of the country. It is a

stimulus to the confidence of the

public in the government and in the

future of the country. It is a

stimulus to the confidence of the

public in the government and in the

future of the country. It is a

stimulus to the confidence of the

public in the government and in the

future of the country. It is a

stimulus to the confidence of the

public in the government and in the

future of the country. It is a

stimulus to the confidence of the

public in the government and in the

future of the country. It is a

stimulus to the confidence of the

public in the government and in the

future of the country. It is a

stimulus to the confidence of the

public in the government and in the

future of the country. It is a

stimulus to the confidence of the

public in the government and in the

future of the country. It is a

stimulus to the confidence of the

public in the government and in the

future of the country. It is a

stimulus to the confidence of the

public in the government and in the

future of the country. It is a

stimulus to the confidence of the

public in the government and in the

future of the country. It is a

ment that the Prime Minister has inspired by his statement regarding the improvement in business conditions throughout this country. It has called our attention to indications of recovery that have been increasingly definite with each succeeding month, and which have been sustained and consistent that one can no longer doubt their significance.

Spirit of Confidence
Sir Thomas White, Vice-President Canadian Bank of Commerce: "I fully concur with the statement of the Prime Minister as to the upturn which has taken place progressively in Canadian business during the past few months. In almost every branch of the country's economic life there has been manifest a slow but steady advance from the now point of last April. Despite adverse conditions I found, during my recent tour of the West, not only a spirit of confidence but quite noticeable signs of improvement."

DO YOU KNOW?
Under this question we print the answer from a card issued by the Federal Council of Churches of Christ in America:

1. That 9,998,771 soldiers were killed or died in the World War 2.
2. That another 20,297,551 were wounded.
3. That in 1918 the daily cost of war was \$224,000,000.
4. That the nations are this year spending more than \$10,000,000 a day for war preparations.
5. That the United States expended approximately \$33,333 per hour or \$2,000,000 each day on its army and navy.
6. That the world's expenditures for armaments for one year would pay the expenses of the League of Nations, including the World Court and the International Labor Office, for six hundred years.
7. That only \$545,000 out of a total United States budget of \$3,000,000,000 will be expended on civil government during the fiscal year beginning July 1, 1933. And that virtually all of this \$545,000,000 will consist of taxes collected on sales of cigars, cigarettes, and miscellaneous fees, while all income taxes and revenues from imports and other sources go to pay for past and future wars.

8. That the cost of the battle ship "Colorado" was \$27,000,000. And that this sum is only \$3,000,000 less than the total expenditure which the John Hopkins University has accumulated since it was founded in 1876.

Improvement is Definite
M. W. Wilson, Vice-President and General Manager of the Royal Bank of Canada: "The Prime Minister's statement is a definite sign of the recovery in Canada, but in my opinion, these statistics do not fully reflect the improvement which has occurred. While there are still a number of clouds on the business horizon, notably the low price of wheat

and the partial or full failure business throughout Canada has shown a definite and to a number of indications of improvement, and my confidence is strengthened by the background of what seems to be a definite world-wide recovery. It would be foolish to minimize the seriousness and extent of the problems still facing us, but the evidence of improvement will enable us to tackle these with greater heart and spirit. We are now offered an opportunity to show our confidence in ourselves and Canada in supporting the Government in its essential financial operations. The Dominion of Canada Bonds are the premier securities available to investors."

MEASLES
There was a time — and too many parents are still living — when it was thought that every child when it had measles, and that the sooner each child had it, the better it was for all concerned. When one child of the family contracted measles, no effort was made to keep the disease from spreading through the family, for it seemed more consistent that all the children should have it together.

Measles is a very serious disease because of the complications which follow in its wake. The younger the child is, the greater the danger. Measles is one of the most common of all diseases. It is communicable, and it is communicable. It is the living agent which is responsible for the disease. It is the living agent which is responsible for the disease. It is the living agent which is responsible for the disease.

PACK EGGS BROAD END UP
Considerable time has been devoted to an effort to solve the problem of "water white" in eggs—a problem which has given rise to much difficulty in the trade and considerable loss to producers, says the report of the Empire Marketing Board. Over a period of two years a number of factors including the liability of various breeds to produce "water whites," the system of management for example, free ranges versus semi-intensive, low versus high feeding, etc., have been examined. None of these factors appear to be responsible to any appreciable extent for the condition known as "water white."

In the course of the investigation, eggs twenty-four hours old and packed broad end (air cell) down, had to be sent eighteen miles by road, and they showed on arrival a remarkably high proportion of "water whites." On following up this clue, consignments of eggs, one half packed broad end down, and the other half broad end up, were despatched on journey by motor and train. The results confirmed previous indications, and a report is to be issued. A further interesting fact has emerged from the investigations, namely, that if the vibration and jolting received in transit has not been excessive the "water white" condition will disappear in a few hours if, after receipt at the packing house, the eggs are stored broad end up.

JARVIS BOYS' GRAIN CLUB COMPLETE SUCCESSFUL YEAR

Grain Samples Exhibited

Climaxing a most successful summer's work, fifteen boys exhibited

their work in grain in a final

competition held at the time of

the Jarvis Fall Fair. A very fine

exhibit of grain in the show was

also held in addition to the threshed

grain and the whole created considerable

interest.

By way of preparation for the

final judging competition and exam

ination were taken into considera

tion. The prize awards were as follows:

1st, Earl Slater, Jarvis; 2nd, Har

vey, Jarvis; 3rd, Edwin Har

vey, Jarvis; 4th, O. W. D. Sayer,

Jarvis; 5th, D. Sayer, Jarvis; 6th,

Go. Anderson, Jarvis; 7th, Har

vey, Jarvis; 8th, D. Sayer, Jarvis;

9th, Arthur Winger, Jarvis; 10th,

Harvey, Jarvis; 11th, Lloyd Marr,

Jarvis; 12th, Connie O'Mahony, Jarvis;

13th, Elmo Field, Jarvis; 14th,

15th, Bruce A. Miller, Jarvis; 16th,

17th, D. Sayer, Jarvis; 18th, Har

vey, Jarvis; 19th, Edwin Har

vey, Jarvis; 20th, O. W. D. Sayer,

Jarvis; 21st, D. Sayer, Jarvis; 22nd,
