IS THE SYSTEM CORRECT? The result of the recent election appear to show to be a complete collapse of the Conservative as well as the C.C.F. Party.

Mr. T. L. Church received a strong nomination as the Conservative candidate for Toronto. His return to politics will undoubtedly stir things up in every rank.

The Toronto Saturday night says that the Roman Hepburn was Peretz an exper who cut the cost of government in two and auctioned off his pre-war's luxurious chariot.

The talking book, one of the latest sensations in the world of the blind is now being demonstrated at the Exhibit of the Canadian National Institute for the Blind in the Electrical and Engineering Building at Toronto.

The National Library of the Institute which contains over 17,500 volumes is conducting a booth where Braille books are on view, and a Braille typewriter operated.

Thirty-one blind persons are present some demonstration home hand crafts, another turning out attractive dresses and aprons on one of the power driven machines used in the garment factories in the Institute.

The Industrial Placement Department arranged for a blind man employed in industry by a well-known sporting goods company to bring on with his regular job of carrying on tennis racquets, another to fit spools in joy cycle wheels, while a blind employee in one of the Motor Car Companies is demonstrating his job of stuffing cushions for automobiles and assembling control handles for cars.

Games played by the blind such as Braille playing cards, checkers, etc. are on display as well as Braille watches, thermometers and other articles. In this booth information can be obtained regarding the special privileges for blind people, such as radio services, street car passes, theatre passes, etc.

One of the special features of the Exhibit is the grouping of rolls in the Provision of Blindness booth portraying, with the assistance of artistically designed views above them, the particular care that must be taken of the eyes at various stages of life.

Literature published by the Institute is available in a number of the booths, also cards for testing vision that may as well be used for telephone number memoranda, and Braille alphabet cards.

The complete structure, containing all the demonstration booths of the Institute, which is finished in red black and cream, is constructed to give a general view of all the various activities that can be seen from the main entrance, there being no high partitions between the different booths.

Members of the Toronto Women's Auxiliary to the Canadian National Institute for the Blind are conducting a special branch of their Blind Craft Shop and have also an Information Booth, most attractively furnished with wicker chairs and desks, ferns in fern pots holders and flower boxes.
