

Voice of the Press

Canada, The Empire and The World at Large

CANADA

Clean and Fast.

Hockey can be both "hot" and "clean," however, without being fast. The sooner sport players learn to play hockey, the better for professional hockey. The truth is that it can be both. The truth is that it can be both. The truth is that it can be both.

Timber Problem.

It is reported from Ottawa that in two years 400,000 acres have been planted in the Dufferin County forest reserve. If this practice were carried on throughout the Dominion its timber problem would be solved in another generation or so.

Sign of Improvement.

It does look as if the depression is being discouraged. In Canada for the fourth successive month, sales of new automobiles at retail prices showed a gain over the corresponding month of the previous year. The number increased 13 per cent., while the value increased 19 per cent. In the United States, new cars sold showed a gain of 59.4 per cent., while their value increased 70.9 per cent.

The Greater Part.

A game of checkers so excited four Quebec Indians that a fight followed which ended in four deaths. The authorities had better keep this tribe in ignorance of contract bridge.

A Good Paper.

A good town paper is not the product of chance. It is the growth of time, brains, energy, and industry. It is the support of the community it serves.

Rights of the Citizen.

Perhaps it is this thing—determination to preserve British justice and justice things apart. Justice in British law is not merely an abstract principle. It is something to be fought for, to be maintained, to be defended.

And Toronto a Centennial.

When writing your friends don't forget to remind them that Port Arthur will have a semi-centennial celebration next year.

No Hopper Boundary.

Crashoppers know no international boundary, a factor which is increasingly important with comparative harm. It is a migratory bird, and its nature is to hop.

Billboard Restrictions.

A news dispatch from Quebec states that E. P. Fournier, Minister of Roads and Mines, has concluded negotiations with national companies to limit advertising on billboards.

Diphtheria Prevention.

Results at Ottawa confirm the evidence from other cities, where diphtheria immunization programs have been carried out.

Standards of Living.

Japan is taking over markets in carrying even our business of carrying these goods. Japan's milliners produce the harvest of the water.

A Nice Piece of Work.

Mrs. John Horne, Jr., of Port Colborne, grew weary of the number of times a burglar was making his way into her home.

"Think I'll hang along to the sunny southland," say some folk up with Toronto's cold weather. But maybe they'll change their minds when they see this picture of California digging out their car after a 56-inch snowfall.

102 New Ships by 1939

Asked for U.S. Navy

Washington.—The United States navy is planning to ask congressional authorization for an ambitious ship construction and replacement program designed to establish the service on a parity with the British navy.

Plane Nearly Crashes

On Buckingham Palace

London, Eng.—Crowds watching the ever-popular ceremony of the changing of the guard at Buckingham Palace were startled recently when an airplane passed, apparently only a few feet above the roof of the palace.

Tear Gas Causes Panic

At War Demonstration

Bucharest.—The drastic measures pursued by an army officer at his lecture on gas and air defense in the Village of Calicisco recently caused a panic among the audience.

Partridges Enter City to Get Food

Sault Ste. Marie, Ont.—Hungarian partridge-hunters from the north are on the march to the city.

Grumbling Ontario Residents View This!

Ontario.—Indications are that the Dominion-Provincial Conference, scheduled for Jan. 11, will be postponed to Jan. 17.

Latest 1933 Diseases Were Suffered by Ancient

St. Louis.—There are "very" diseases which men have today that the ancients did not have.

The Land Looking Up.

So much publicity is given to farm mortgages and foreclosures and arm discharges that there is an impression that farm land no longer has value.

Here's what happened when Old Sol turned his rays on Washington state mountains, pouring thousands of tons of water into small streams which flooded Tacoma and many other cities. Nine lives were lost.

Highway Lighting

Ontario possesses about 3,000 miles of King's highways, about 1,600 miles of which are heavily traveled, writes the Electrical News and Engineering. For instance, the highway joining Windsor and Montreal is used continuously both summer and winter by private and commercial licensed vehicles, and particularly by tourists.

What a colossal contribution to traffic, to commerce, and to Canada's tourist trade, it would be if this main highway were adequately illuminated. In the present time the many municipalities on route light only 75 miles, but there still remain unlighted about 1,525 miles between Windsor and the Ontario-Quebec border.

Names Eighteen Men Who Understand Money

New York.—Eighteen college professors, two bankers, and five foreign authorities were listed last week as "the persons in the world who understand the real meaning of money."

London Preparing In Event Gas Attacked

London.—Mortimer and other gas doctors and surgeons have been asked by the Home Office to help in the task of creating an organization to protect the civil population in case of a gas attack.

Snowball Bridge Collapses

Up Charity Fund

Berlin.—The snowball bridge which has become a part of the Berlin fair has collapsed.

Ontario to Preserve Early Architecture

Toronto.—The recording of early architecture in Ontario is the aim of the new Ontario Architectural Society.

Light's Speed

Pasadena, Calif.—The speed of light is placed at 299,792 kilometers per second.
