WEIGH

THE VALUE

Extra Value . . . More Comfort . . . Greater Safety . . . Longer Car Life

HERE'S something important to remember: Chevrolet gives you more weight than any other car in its class. More pounds of rugged, high quality materials in the Fisher Bodies, because Chevrolet doesn't skimp on comfort or safety! More pounds in the husky, solidly-built Chevrolet chassis, to safeguard dependability! And, best of all, you get these advantages of ample weight without any sacrifice of economy. Because, while it's a bigger, heavier car-faster and more powerful-Chevrolet uses less gasoline than ever! Drive the new Chevrolet and you'll never be satisfied with any other low-priced car!

THE BEST TIME TO PRUNE HEDGES

Hedges are made of different kinds of plants some of which are deciduous, that is, they drop their leaves every fali, while others are ever-

At the Central Experimental Far m, Ottawa, about one hundred and thirty different varieties of trees and shrubs have been tried and there are now about sixty different hedges growing side by side, some of whi-ch were planted in 1889.

The deciduous hedges are generally trimmed about the end of June or when the season's growth is almost completed. This gives them time to make enough new growth to cover the wounds left by the clipping. The evergreen hedges are trimmed a lit tle later as their growth is slower. Sometimes a few odd branches may grow large and spoil the neat appearance of the hedge after the mming. If this occurs the bran

ches are cut off. The trimming should be done an nually as it is difficult, if not im possible, to remake a hedge which has lost its shape. It is better to clip the hedge at the wrong season ather then not clip it at all

The shaping of a hedge is very portant and it has been found at the Central Experimental Farm that it is better to have it widest at the base. It can be tapered to the top or it can be rounded or flat. In districts where there is much snow, tapered top is much the best, as e snow will slide off instead of settling into the hedge and spreading and breaking the branches and ereby spoiling the shape. If the hedge has rounded sides and so is wider above the base, there is danger that the lowest part will grow and ugly.

Over 3,000,000 Tourist Cars

A total of 3,096,887 tourist automobiles from the United States entered Canada in 1933, of which 2,-233,418 came in for a period of 24 hours or less; 863,136 on 60 day per mits and 333 on permits good for six menths. Of the total 2,339,097 came to Ontario; 436,385 to Quebec; 152,503 to New Brunswick; 102,863 o British Columbia; 31,700 to Manioba; 17,701 to Saskate 366 to Alberta; 6,209 to Nova Scotia and one to Prince Edward Island.
The "Back Seat Club"

While the percentage of women

drivers is steadily increasing, more than 75 per cent of the women in the car-owning group are members of the "back seat club," according information obtained by Oldsmo bile from various motor vehicle ficials, who made a check of the driring icenses which they have issued Information from a number of sou rees show that approximately 24 per cent of those having drivers' licenses are women. They prove the point that most members of the "back seat club" are women and it is to them that Oldsmobile's new "knee-action" cars are going to make a special ype of car affords a degree of com
