

# Voice of the Press

Canada, The Empire and the World at Large  
CANADA

What Canada did not receive an approved branch of the League of Nations, Canada at the head of the list in progress toward industrial recovery with the United States second. Canada's ratio is 49, the U.S. 39. When we consider the means adopted in the republic we are justified in concluding that Canada's recovery is more likely to be lasting, because it is not the result of artificial stimulation.—Clintons News-Record.

## DO GOOD WORKING

On Sunday morning a provincial police constable knocked at the door of a Vineland residence and calmly informed the occupant that his stolen car had been recovered. The man was not even aware that his car was missing, and yet five young Toronto men were locked up at Woodbine for the theft.—St. Catharines Standard.

## SAVING THE MUSKOX

What Canada did not receive an approved branch for the buffalo in saving it from extinction, who is now doing for the muskox. The story of this curious animal whose home is in what are known as the Barren Lands of North-western Canada, is told by G. H. Blanchet. Canada has set apart a comparatively inaccessible region of Great Slave Lake, known as the Thelon Game Sanctuary, as a home for the muskox. Here it will be safe from both Indians and Eskimos, and the buffalo did in Walrus Park.—Frederick Gleason.

## MAKE NO DISTINCTION

Practically all social service clubs will agree with W. O. Smith, of Montreal, who is called for as "legitimate" as applied to children born out of wedlock. The children have nothing to do with it and it is their fair that they should rest under such a stigma. In Ontario, as in Manitoba, there is no distinction between children born outside and in wedlock, so far as the father's estate is concerned, all sharing equally in any proceeds.—Niagara Falls Review.

## DIRTY LICENSE PLATES

Dirty license plates defeat one of the purposes of motor car licensing. Plates damaged so that the numbers are illegible also have the same defect. License plates are on cars primarily for the information of the general public and its law enforcement authorities. They are the means of identifying a car and protecting the public.—Kingston Whig-Standard.

## BENEFIT EDUCATION

A Miami University student ate 15 hamburger sandwiches in half an hour. There are still some people who arbitrarily declare that they can eat nothing in a college education.—Ottawa Citizen.

## VALUE OF RAIN

President Roosevelt is asking for \$150,000,000 to give out to the people of the United States as Drought Aid. This will give you some idea of the value of a good rain.—Chatham News.

## PLAGUES AS ALLIES

A great plague is killing cattle by the hundreds in Arkansas. Grasshoppers are expected to kill a large part of the wheat crop in the prairie west, on both sides of the international line. The farmer's instinct is to fight such enemies, but now that he is told he must cut down production he is to exercise his natural allies.—London Advertiser.

## THEY'RE LEARNING

Why does the chicken cross the road just ahead of an auto? Farmers are learning to cultivate a traffic report that is to look and listen before entering the highway. One man says he saw a pheasant look out from a hedge and deliberately wait for a car approaching from both directions to pass and when the road was clear walk across at his leisure.—Montreal Herald.

## PAROLE IS OVERTON IN NEW YORK

It is so hard to get a man convicted for murder in New York one might think that when a man is convicted and put away for a life sentence, or something approximating it, the authorities would not seek to let him out for a great many years—15 or 20 at least. But the hard work of the police is neutralized to a great extent by the operations of a parole board which is exercising its privileges in the most extraordinary fashion.

## INIA MEN CONVICTED OF MURDER

Nine men convicted of murder in New York since April, 1933, were again paroled, and of these, six are under appeal. What justification could there have been for admitting to freedom men of such character? Two recently paroled men, not provisionally, were again paroled, and were being killed a patrolman and wounding three children in the doing of it. The notoriety that attends the legal machinery of the New York criminal system seems to have no

## ROCKING OF BABIES FOR HIRE IS ADDED TO ODD PROFESSIONS

Baby Rockers Local No. 1 of Harmon has not yet received an approved NRA code but Andrew H. Brown, the president, does not mind that. "We give five cents a half-hour for rocking," Mr. Brown explains. "Less if the twin, when we give two cents extra. No cut rates."

Members of the local "worn their nickels rocking babies, with or without carriages, for shopping mothers. It is a great convenience for the mothers who can fight their way unencumbered into the bargain aisles and know that their offspring are in safe custody at the store entrance.

## Public Learns Hoary Secrets Of Old Titles

English College of Arms Opens for Inspection of Some Ancient Family Records

London.—For the first time in its nearly 500 years of existence the College of Arms is to make an exhibition of itself. The first of the exhibition is to be a display of the old titles of office associated with the bust of Henry and the pomp of power, as to show inner secrets to all and sundry.

## FROM LUTHER'S BEECH TREE

The Prince of Wales has sent 500 beech tree seedlings from Windsor Great Park to Canada. We understand that the Prince has been informed by the "Men of the Trees" movement, as an encouragement to Canadians to attach importance to their forests, that the beech tree is one of our best resources. It is interesting to note the Royal trees were raised from seeds gathered underneath an off-spring of Luther's Beech at Wittenberg, and brought to Windsor more than 100 years ago.—Empire Review.

## WHY COMMUNISM GROWS

Every election demonstrates the growing strength of the Communist. One of them polled over 8,000 votes in the major election. Another one got an even bigger proportion of support. Yet their Australian program is so extreme and violent and so full of complete a surrender to iron discipline that, in a country with such a strong democratic tradition, it is surprising to find that so many people are flocking to them. Many of those who do support it are men and women whose minds have been developed into mere book-keeping machines. Have they, for instance, seen the conditions in the N.S.W. coalfields? Are they aware that on both the north and south there are literally thousands of men who are starving for want of coal? They are all people who believe that if Communism cannot do for them what the present system has failed to do it is at least give them sympathy.—Sydney Bulletin.

## EARTHQUAKES AND SIN

An urban and trenchant controversy of more than ordinary interest has been taking place between Dr. Rabindranath Tagore and Mr. Gandhi. The former is a Hindu, the latter a Jain. The controversy has been taking place in the form of a series of letters. The Hindu, by announcing his conviction that the earthquake was sent by God to punish the Hindus for their sin of untouchability. This "unscientific and materialistic view" caused Dr. Rabindranath painful surprise and urged him to "utter a truthe in asserting that physical catastrophes have their inevitable and exclusive origin in certain combinations of physical fact. He went on to say that unless we believe in the inexorable universality of laws in the working of which God Himself never interferes—impairing thereby the integrity of his own creation—we find it impossible to justify His ways on occasions like the one which has sorely stricken us in an overwhelming manner and scale.—Calcutta Statesman.

## IN PRAISE OF USELESS KNOWLEDGE

Mr. Lockwood says that the accounts of his visit to Oxford, and his delightful portrait of the city, are the complete and perfect record of his visit. It is interesting to note that the greater part of his account was not in the form of a lecture, but by request, and then wretchedly. Mr. Lockwood was told that the improvement of which these figures record the early fruits, began in February, 1933, and has been steady in the interval.—London Daily Telegraph.

## MORE CANADIAN HARDWOOD

An increase of 106 per cent. in sales of Canadian hardwood to Great Britain for the first three months of this year has been reported. The figures stand at 1,208,000 cubic feet this year compared with 694,000 cubic feet during the same period in 1932. Canadian hardwood is being used in increasing quantities in Great Britain for flooring, furniture, and the manufacture of automobile bodies.

## Shipping Canada's Lakes and Streams

Thirty-five years ago the drift of Canadian shipping to the Dominion increased to such an extent that the Dominion government had to take steps to encourage the carrying of Canadian goods by water. The Dominion government has now taken steps to encourage the carrying of Canadian goods by water. The Dominion government has now taken steps to encourage the carrying of Canadian goods by water.

## Statistics Show More Deaths During Cold Weather

Washington.—The dangerous days for the baby have swamped seasons. Children's bureau statistics show plenty of cause to worry about getting infants through their first winter. The winter has so far become the gravest cause for concern.

## Back in 1921, Gastro-intestinal Diseases, which mothers called "summer complaints," accounted for 15 deaths per 1,000 live births. Most of these were caused by cold milk, bad water and flies contaminating food.

By 1930 the gastro-intestinal death rate slumped to eight per 1,000. This trend is continuing. The respiratory diseases—the winter grip of coughs, colds and pneumonia—practically unchanged, 10 deaths per 1,000 live births in 1921; 11 deaths per 1,000 in 1930.

## Miss Katherine F. Leonard, acting chief of the children bureau, said: "Because the general public has gone down does not mean that there are no longer summer peaks of disease in certain neighborhoods," she said.

## Tumor Weighed Over a Hundred Pounds

Elizabeth Turnbull, editor of the Montreal Star, Toronto, writes to the press: "A story from Kingston about the removal of a 150-pound tumor from a woman has 'wowed me' to read the following:

One of the courses of the Women's Club of Kingston, Ontario, was a day's tour of the city. Miss Turnbull, who is a member of the club, was with the group. She was struck by a tumor on her breast. The tumor weighed over a hundred pounds. She was cured by a doctor.

### Before Breakfast

York, let me tell you, is the last walk in England which a man should not enter on horseback or on foot. Unfortunately few people know that. When I came to the high, white, marbled wall that circles the city I looked up at the great battlements and saw its spires and its towers.

### Little, But Oh My!

Writes the Toronto Globe.—Even in the canine world there was an ambition to mark in some suitable way Toronto's century of civic life, so it came about that all the best dogs in the neighborhood—all the well bred, pug-nosed, dignified, and thoughtful in their several circles—decided to gather at the Exhibition Grounds and hold a show. They would help their masters to make his, in every respect, a red-letter year in Toronto's history. The masters, as usual, would donate handsome prizes. Hence the Dog Show.
