CHICKS - 85% PULLETS

How would you like a flock of baby chicks that will turn out to be 85 per cent. pullets? Think of the saving of feed, saving of brooder space, lower average cost of raising pullets to laying age. You now have that opportunity with Bray White Leghorn chicks, either Foundation or Standard grade.

We have secured the services of a Japanese expert, who has been "sexing" baby chicks in British Columbia, al Iseason, with 90 to 94 percent, accuracy. It is safe to expect that his work with Bray chicks will be at least 85 percent, accurate. So for the balance of the season, we are offering day-old White Leghorn chicks with the guarantee that they will be at least 85 percent, pullets.

Our other breeds are still being sold "as they come" — pullets and cockerels together. But if you would like them divided by sexes before they are shipped, our expert will do it for you at an additional cost of \$1.00 per hundred. We do NOT offer the pullets separately, except in White Leghorns.

Our June prices are greatly reduced. Write for particulars or phone the manager of your nearest Bray Hatchery. Hatches twice a week. No delay.
