SAYS DISARMAMENT ISSUE ENDANGERS EMPIRE UNITY

Fortright declaration that the disarmament issue was one of the main points of the British Empire

Writing under the heading "Tell Britain," this distinguished publicist and peace advocate asserts that the time has come for patriotic Canadians to take a positive stand on an issue which means peace or war that may result in the destruction of the present generation.

As a solution, he suggests Canada should "tell Britain" that the British armament industry should be investigated with a view to the abolition of the private manufacture of arms and the placing of the industry under state control.

"An attempt has been made," continues Mr. Drew, "to discredit the arguments of those who urge the disarmament manufacturers of Great Britain—who are the largest exporters of armaments in the world—should be brought under control, by suggesting that this would weaken the British Empire, and by also suggesting that this would mean a reduction of British armaments without corresponding reductions elsewhere. Nothing could be farther from the truth.

"It was proved beyond all doubt during the Great War that fighting equipment can be just as efficiently produced by Government factories as by private firms. In fact, it was not until Government factories were established under the Ministry of Munitions and the real cost of munitions determined in that way, that the dishonest exploitation of the British public by the establishment of armament firms was brought to an end.

"British people throughout the world should not forget the thousands of lives sacrificed during the summer of 1915 because the armament companies of Great Britain failed to fulfill their undertakings in regard to the delivery of artillery ammunition, which they knew when they accepted the orders could not be completed within the promised time. Their greed made them willing to sacrifice British lives rather than permit competition which would have developed if they had not taken the orders.

"Surely the time has come for Canadians to tell Britain that in the interests of Empire solidarity, an enquiry should be made into the question of the possibility of the abolition of the private manufacture of arms.

"Canada has told the Disarmament Conference that it believes the production of armaments should be limited to State-owned factories. It is neither unpractical nor indicative of Canada to urge Great Britain to adopt this course. Canada earned the right during the Great War to state its case in matters of this kind, without any suggestions of offense. The most patriotic thing that Canadians can do is to declare frankly that they do not believe in the production of armaments by private firms, and that they believe in the production of armaments by State-owned factories.

"Tell Britain, then, that Canada thinks that the British Empire, which is today, but that in the future, may be a question of preparation for the possibility of war, must know whom we serve, and to what end."

Whoooping cough is one of the most serious diseases which a young child may have, and the younger the child, the more dangerous is an attack of the disease.

Whoooping cough is caused by a germ, and it is spread by the transfer of the germ in the droplets of secretion thrown out by the patient when he coughs.

Whoooping cough is caused by a germ, and it is spread by the transfer of the germ in the droplets of secretion thrown out by the patient when he coughs.

SAFE DRIVING will save money

Our Merit Rating Plan of Automobile Insurance provides reduced premiums for careful drivers.

Because we believe that careful motorists are entitled to a further reward for Care, Courtesy and Common Sense in their driving, we have extended our Merit Rating Plan in Ontario so that DISCOUNTS UP TO 25% are now available for Private Passenger Automobiles on All Classes of Automobile Insurance—PUBLIC LIABILITY, PROPERTY DAMAGE, COLLISION, FIRE AND THEFT.

- 10% DISCOUNT to motorists who have owned and operated a car for the past year without claims.
15% DISCOUNT to motorists who have owned and operated a car for the past two years without claims.
20% DISCOUNT to motorists who have owned and operated a car for the past three years without claims.
25% DISCOUNT to motorists who have owned and operated a car for the past four years or more without claims.

Our Merit Rating Plan is the only one available in Canada which provides such discounts for all coverages for Private Passenger Automobiles. These discounts apply, deducted from the premium on the issuance of his policy.

A claim having been made under either the Collision, Fire or Theft coverages will not disqualify the motorist for his Merit Discount on the Public Liability and Property Damage sections, and likewise a claim under either the Public Liability or Property Damage sections will not disqualify the motorist for his Merit Discount under the sections of Collision, Fire and Theft.

"It's the man at the wheel that counts"

You can qualify for this policy, see us today. Full details furnished gladly on request.

WARDEN'S WEEDS ON WEED CUTTING WEEK

Warden James Lockie of Canfield has just issued a proclamation to the effect that the week of July 2nd to 7th inclusive, has been set apart as a special week for the cutting of weeds in the county of Halton.

It has been conservatively estimated that weeds cost the province of Ontario by way of reduced yields, lower quality of crops, extra labor, heavier investment in stronger and larger machinery, increased horsepower, etc., the huge sum of 18 millions of dollars annually.

Weed control is a public problem and can only be brought about effectively by the united co-operation of every property owner, every occupant of land, Municipal Councils and Departments of Agriculture. As the great majority of citizens realize the weed menace which we have at our door and the tremendous loss involved due to the presence of weeds, this public opinion will be sufficient to provide an excellent opportunity for every citizen to take part in this united effort to suppress one of the greatest assets which has to be met each year.

WEED CUTTING WEEK (Experimental Farms Note)

A good deal of the improvement that has been attained in our live stock and plant industries is due to selection of the best types, by the breeders and growers. This is particularly true of potatoes and there is abundant evidence to show that the grower who has been successful in selecting the healthy, good yielding plants for seed purposes has benefited considerably.

During recent years the virus diseases have been given much attention and it has been found that the best way to eliminate these virus diseases from the crops is to select healthy plants, for seed purposes.

As a result of the selection of plants and tubers over a two year period, with thirty samples received from growers for testing in the permanent plot, the average yield was increased by one and a half tons per acre.

In selecting the grower should select the best type of the variety he is growing. By this type he will eventually develop a good uniform strain. This is undoubtedly the best method of maintaining a high standard of seed potatoes.

One of Canada's best known and best loved railroads died recently at Vancouver when Matthew G. Colville, retired locomotive foreman of the Canadian Pacific Railway, passed away at the age of 78. He was born in 1881 and was a machinist at the original two-story roundhouse operated by the Canadian Pacific at Winnipeg during early construction days.

Difficulties commonly experienced by drivers at night, especially in winter, in determining whether their headlights are bright or dim, are corrected by set for city or country driving, are eliminated in the new Cadillac by means of an indicator on the instrument board. A glance at the tell-tale shows which of the optional arrangements of lighting is in use.
