

Voice of the Press

Canada, The Empire and The World at Large

CANADA

VOICE OF THE PRESS—set head HUMAN PROGRESS

For all the good work the League of Nations has done, and in spite of the thirty-month talk fest at the Disarmament Conference, the world continues to spend a great deal more on armaments than it did before the war which was supposed to be the war to end war. This is a striking commentary on so-called human progress.—Victoria Daily Times.

STIFFER TESTS FOR DRIVERS

The examination intended to test the qualifications of new drivers applying for permits are for the most part perfunctory things and in almost every community there are people subject to certain diseases which make them unfitted to drive motor cars. And continuance of the present rate of increase in motor accidents is bound to be followed by a tightening of driving tests which, considering the perils of the road at the present time, is perhaps already overdue.—Brookville Recorder and Times.

GOOD RAINS IN DRY BELT

Good rains have been falling in Alberta and have been spreading to Saskatchewan and to the drought areas. Waters in practically all the far northland are said to be abundant. They are no longer at drought levels. They have been replenished by abundant rains. This moisture will find its way south, driven before still northern breezes, and southern Saskatchewan will perhaps soon be able to shake off the shackles imposed by the south which has exacted a very severe toll in the west.—Regina Leader-Post.

HOMESPUN WITH GOLD LINING

It is said that Will Rogers is the movie actor who is said \$15,000 a year. Come to think of it, you can afford to have a "homespun philosophy" with that salary to support it.—Regina Leader-Post.

ERRONEOUS BELIEF

The prevailing belief that China is a much over-populated country has been made the subject of a recent book. The writer maintains that there is really no more over-population in China than there is in any western country. The people cannot make the most of their opportunities, that is all.—Winnipeg Tribune.

CANADA'S WHEAT EXPORTS

Canadian wheat or wheat flour went direct to one hundred countries of the world during the crop year ending July, 1934. From Arabia to Japan, from Egypt to South Africa, and thence to New Zealand and Australia, from Newfoundland to the islands of the West Indies, from Venezuela to Chile, from Alaska to the Philippines and the Fiji and beyond, from the Irish Free State to Malia, to practically every country, small and great.—Brandon Star.

THAT'S TOUGH ALL RIGHT

Longfellow, remarks a contemporary, could take a worthless piece of paper, write a poem on it, and make it worth \$5,000! That's genuine! There are some men who can write a few words on a piece of paper and make it worth a million. That's capital! The Dominion can take an ounce of paper and make it worth a quarter of gold and make it worth twenty dollars. That's money! A mechanic can take material worth five dollars and make it into wash sprays worth one thousand dollars. That's skill! There is a man in Paris

Prince Enjoys Sports

For a king was this princely prompt meal devoured by Prince on Starbuckberg. Austrian Vice Chancellor, at Vienna sports meeting. Plates and other equipment were missing, so fingers were in order.

ANCIENT PLUMBING

During the excavation of part of Nero's Golden House in Rome, a complete system of drainage was discovered, which Prof. Terenzi, who is in charge, put into working order by merely clearing the pipes of earth and rubbish. Perhaps the Roman plumbers in ancient days were well equipped and did their work so completely that they did not have to go back for their tools. The job in Nero's house was permanent.—Montreal Gazette.

GOOD AS ANY

Man in St. Thomas found a mushroom which was 11 inches across the top, and now we are waiting for some old-timers to announce that large mushrooms mean a cold and long winter.—Lindsay Post.

THE CRITIC WHO KNOWS

In a recent conversation about newspapers one person was very sure about the correctness of his view. He was sure that there was a daily newspaper in the country fit for reading by the part of any one, old or young. "I know what I am talking about; for I haven't read a daily newspaper in 12 years."—Kitchener Record.

RECOMPENSE

Chicago people, they say, are looking ahead at a pleasant winter. They can sit around in the evenings and count up all the relatives they're going to get with next summer for just dropping in on them while at the World's Fair.—Brookville Recorder.

AND LOOK AT NEPEANI

The township of Scarborough in Ontario, with a population of 29,000, has not had a case of diphtheria for a year. This is the result of a ten-year program of inoculation in the township and among children that was obvious.—Saint John Telegraph school age. Is not the lesson Journal.

BONDS AS SECURITY

In cases where persons holding city bonds are in financial difficulties and unable to pay their taxes, it has been decreed that they may deposit these bonds with the city as security and, in consequence, the steps will be taken to register their properties in the name of the municipality.

THE RUBAIYAT

A sale in London recently for some \$750 of an old copy of the Rubaiyat, that originally sold for a few cents, caused a discussion that revealed the fact that cultured Persians are surprised and amazed at the popularity of Omar in English-speaking countries. These Persians declare the Rubaiyat lacks grandeur of vision and that they would prefer that such writers as Hafiz, Sa'di and Firdaus were known instead of the homodieptic tenmaker. However, they must first find a Fitzgerald to make a translation.—Edmonton Journal.

THE EMPIRE

THE TRADE REVIVAL
Judged by a number of important financial and commercial indices the recovery of trade which has been gradually proceeding ever since the National Government took office still continues. All of these indices now stand at or about their highest points. Imports and exports continue to expand, and to a great exporting and creditor nation not the least gratifying feature of the latest return is that the surplus of imports is back to the 1932 level, because in the final analysis those who are indebted to this country can only pay in goods and services. The increase in imports is mainly accounted for by raw materials. This indicates a healthy condition of trade, for a reduction or no more than the maintenance of such imports would imply either internal stagnation or loss of exporting power. But a welcome feature of the returns is that while our imports have been increasing our exports remain relatively have increased at a greater rate.—London Times.

"THE YEOMEN OF ENGLAND"
The welcome revival of "Merrie England"—Sir Edward German's triumphal light opera, beloved of an international opera society, is an interesting problem of international politics. In pre-war days one of the

Journey 12,000 Miles To Spend A Day In London

One hundred and fifty men and women spent a day in London. They arrived at Southampton from Canada, and a day later started on their return journey, all of them having spent the day in London. The photo shows John Cassin, 54, and his wife, 52, oldest and youngest members of the party, talking with one of the Beefeaters during their visit to the Tower of London.

Dr. Inge, Retiring, Remains "Gloomy Dean" to the End

"No One Is Wanted Very Much," He Says
By MILTON BRONNER

LONDON—A huge gap will be created in the public life of England on October 1. For the very Rev. Dr. William Ralph Inge will then retire from his position as Dean of St. Paul's Cathedral in London to go to an estate at Wallingford in Berkshire and cultivate his garden.

There will be nobody in the Church of England to fill his shoes, for he was at one and the same time theologian, philosopher, Greek scholar, scientist and a speaker of arresting phrases.

And nations to westward were defied. Surely the original high school patriotism might be revived in an opera that is nothing if not romantic!—Manchester Guardian.

NEED TIGHTENING UP

The "Atlantic" and "Georges Phillips" disasters, throws the record of British liners into favorable relief. How long it is since a British ship was gutted I cannot say, but there is certainly nothing in recent history to compare with the fires on these French and American boats.

But some British lines might profit from the "Atlantic" and "Georges Phillips" disasters, throws the record of British liners into favorable relief. How long it is since a British ship was gutted I cannot say, but there is certainly nothing in recent history to compare with the fires on these French and American boats.

POINTS WITH PRIDE

Every member of the British group of self-governing nations is now well on the road to recovery. That the Empire is unmistakably better off than the rest of the world is striking proof of the success of British methods. South Africa, thanks partly to the gold boom, is so prosperous that it is settling in full its war debt of £28,000,000 to Britain, whose taxpayers will benefit. New Zealand, profiting from the improvement in the wool market, due to greater purchasing power in Britain, has its first Budget surplus for many years. Australia's finances are healthy from the same cause. Canada, which has likewise shared the misfortune of the U.S.A., is now more prosperous than its great neighbor, and begins to share the good fortune of its sister nations. Once more a world of credit association was never more apparent. In the trade war, as in the Great War, Britain and the Dominions present a united front.—Manchester Chronicle.

Words of Counsel

No storm burts a man who believes.—Ovid.

We must beware of giving ear to flatterers.—Cicero.

Believe that you have it, and you have it.—Latin Proverb.

Believe me it is a clever thing to know how to give.—Ovid.

It fills become a philosopher to be cast down in mind.—Cicero.

Minds which are lifted up must be humbled.—Latin Proverb.

Doctor Said She Must Reduce

For a Danger to Her Heart
Overweight is not merely a matter of appearance—it affects health, too. It is the cause of the system of energy the internal organs grow lax and are unable to do their work—and it is a danger to the heart—and it is an instance. A woman who has been treated by specialists, who tried to reduce my weight, as I said with heart attacks. But no matter what they gave me, nothing would reduce me. Since taking Dr. Williams' Pink Pills, my weight has been reduced and my health improved. I am now able to do my work and I feel as well as I have ever felt. I am now able to do my work and I feel as well as I have ever felt. I am now able to do my work and I feel as well as I have ever felt.

ASK YOUR DOCTOR FIRST, MOTHER

Before You Give Your Child an Unknown Remedy to Take

Every day, unthinking mothers take the advice of unqualified persons who recommend them to give their children remedies for their children. If they knew what the scientists know, they would never take this chance.

Doctors Say PHILLIPS' For Your Child

When it comes to the frequently-used milk of magnesia, doctors are unanimous in their praise. It is a safe, reliable, and effective remedy for a wide variety of ailments. It is a safe, reliable, and effective remedy for a wide variety of ailments. It is a safe, reliable, and effective remedy for a wide variety of ailments.

WEAK AND NERVOUS?

If your day begins with nerve frayed, headache, or periodic pains you need Dr. Williams' Pink Pills. It is a safe, reliable, and effective remedy for a wide variety of ailments. It is a safe, reliable, and effective remedy for a wide variety of ailments. It is a safe, reliable, and effective remedy for a wide variety of ailments.

Have You Heard?

A husband's sweet disposition may be like the morning's milk, by evening it may be sour.

Negro Camp Cook (to commissary man)—Look here, boss, dat han you sold me last night was spoiled.

Commissary Man—Impossible. It was cured in the best way.

Negro—Well, boss, if it has been cured, it sho' had a powerful relapse.

Everybody owes the world some thing, and high grades are keeping them back in their payments.

Chief of Brushville Amateur Fire Company—You're late getting here, Young Fireman—I live a long way away.

Negro—No excuse, in future you must live nearer the scene of the fire.

If Junior is guilty of bad grammar and bad drawing, it's ignorance; if an adult does, it's humor.

Man—How much would it cost to send a dollar to my son?

Postman—Eight cents.

Man—Thanks, here are the eight cents.

Pass The Gaff,
Father: "Daughter, isn't that young man rather fast?"
Daughter: "Yes, but I don't think he'll get away."

Sea Rover,
"You must have had many romantic adventures and narrow escapes in your seafaring life."
"Not many, Miss. You see, I don't go roving anymore like most of the crew. I stay safe and sticks to the ship."

FINANCIAL FLASHES

Toronto's New Silver Market

The recent announcement that the Toronto Stock Exchange would open a Silver Exchange in the near future, appears to be of considerable importance and as a result it is expected that not only Toronto but other centres will benefit thereby.

One of the conditions attached to new memberships in the Silver Exchange is that outsiders will be required to establish offices or have local connections in Toronto which should result in some demand for office space. Shipping concerns should also get some benefit through transportation of the metal, and storage facilities will also be required locally and at other points. The probability is that the bank and trust company vaults will be largely used for this purpose, but it is understood that it was found necessary to establish warehouse or other facilities at Halifax and Vancouver to take care of any ocean shipping which may be done. Other benefits from the establishing of Toronto as a silver trading centre will probably show up over a period of time.

Members of the Toronto Stock Exchange will automatically become members of the new Silver Exchange and it is understood that memberships have also been arranged for representatives from most of the world's big silver centres.

It became evident that a silver futures market was needed on this continent after the New York market stopped trading in futures and it looks as though Toronto has excellent chances of capturing a good portion of the commodity exchange experts, who is assisting in the organization of the new exchange, told a group of bankers that he believed the silver market would bring a considerable volume of new money to the city.

The establishing of the new exchange is just one more indication of the growth of Toronto as one of the world's leading financial centres.

World Boom Predicted

Major L. B. Angus, British economist, whose recent pamphlet "The Coming American Boom" attracted widespread attention, has in no way changed his position in the past few weeks. In the meantime another British financial writer goes Major Angus one better and indicates that to his way of thinking, the entire world is going to get in on a boom. J. I. Mill, financial editor of the London Times, anticipates that the next quarter century will see more advanced development than the world has ever known. (Financial News Bureau item)

Long Lac Adair Mines, Limited
