Skeet Shooting

6. THE GAME

THIS is a large subject for a short article, but if the whole series is carefully read and collected, you should have no difficulty in getting hold of the essentials of Skeet shooting. Moreover, there is a great deal of information available on the subject.

Let us imagine that you have done a little shooting before, and that you are just approaching your Skeet field for your first try at the game. You are walking towards Station No. 1 and don't get discouraged or nerwous.

THE PROPER CARE OF

YOUR AUTOMOBILE

Auto Top Mouldings

A NOTHER thing to watch in the care of your automobile is that the top fabric does not crack along the mouldings. This is a danger that exists only on the more recert model cars. On older models, the top fabric covered the entire top of the car and extended down the side. On the newer cars, however, this fabric is set in a panel on the top and is fastened at the edges with moulding.

In previous articles it was told how the top fabric, if not taken care of, will develop weathering which eventually starts cracks. A danger point for these cracks is along the moulding. Even the tops of new cars occasionally develop

on the Road to Recovery

A Statement by the Prime Minister of Canada

THE Dominion of Canada will offer for public subscription within the next few days the 1934 Refunding Loan. It is an undertaking of such significance to every citizen that I think it fitting to present this brief explanation of its close relation to the welfare and continued progress of our country.

progress of our country.

The 1934 Loan is not an incidental effort. It is a part—and an essential part—of the great debt conversion programme in which Canada has been engaged since 1931, and by which we are refunding at maturity the large sums borrowed for wartime purposes. The national importance of this programm—and of the 1934 Loan as part of it—cannot be over emphasized. It is important from three aspects: 1—National Credit; 2—National Economy; 3—National Recovery. I shall deal with each of these in turn.

1. National Credit

National credit means to a nation what an honest reputa-tion means to a man. Its maintenance is a primary essential and necessitates that each obligation be met, fully and promptly, as it comes due. Our debt conversion programme is then, in the first instance, our method of meeting our obligations and thus maintaining out of eting our obligations and thus mainta By this programme Canada has already refunded \$353,000,000 of maturing wartime debt, and completion of the 1934 Loan will bring the refunded total to over one billion dollars. As a result, Canada's credit stands notably

Striking evidence of our high credit standing was given within the last few months when Canada secured immediate over-subscription of a long-term ioan in London at a price to yield the investor less than 3½% and, in New York, obtained a one-year Loan of \$50,000,000 bearing interest at 2 per cent. And there is equally striking evidence at the present moment in the fact that every internal issue of Dominion of Canada Bonds now outstanding is selling today at substantially above its outstanding is selling today at substantially above its issue price. The twelve-year 4% Bonds of the 1933 Refunding Loan issued at 96½, are now selling at 104 to yield approximately 3½%.

2. National Economy

The debt conversion programme, in the second place, is The debt conversion programme, in the second place, is providing substantial savings in public interest charges. The debt which we are refunding was incurred with interest rates at artificially high wartime peaks. Refunding is now being accomplished with interest rates throughout the world moving steadily downward toward more normal levels—an encouraging world movement which is essential to business recovery. By refunding under these conditions Canada has already obtained a reduction of the previous interest charges amounting to more than \$2,000,000 per interest charges amounting to more than \$9,000,000 per annum, and completion of the 1934 Loan will provide a

further saving of over \$5,000,000 per annum further saving of over \$5,000,000 per annum.

The annual saving of over \$14,000,000 thus secured has a direct cash benefit to every tax-payer. This saving has much more than offset the interest charges on the debt which has been incurred to meet the extraordinary burden of unemployment relief. It has, to a considerable extent, offset the heavy burdens which the depression period has imposed with respect to railway and other current requirements. It will also pave the way to tax reductions with the return to better times. The debt conversion which Canada has achieved since 1931, by thus maintaining national credit and securing national economy, has been a major factor in our progress

A year ago, preliminary to the 1933 Refunding Loan, I took occasion to express the belief that Canada had passed the low point of depression and was definitely upon the road to recovery. Today, our progress toward recovery is a matter of established fact. Since the low point of February 1933, the trend of business has been moving steadily upward in an improvement so marked and so consistently sustained that we need no longer doubt its reality. The facts of business recovery are written beyond dispute in our statistical records. The most significant indices relate to physical volume of business, industrial production, carloadings, electric power production, employment and prices. Here is the record in each case:

Our external trade figures are equally encouraging. During the first eight months of the present year, exports of Canadian products increased approximately \$99,000,000 or 32.7% over the same period last year. The corresponding increase for imports has been slightly under \$93,000,000

A Further Step

Anyone who reflects upon these three aspects of credit, economy and recovery will at once appreciate that the debt conversion programme is vitally important to every Canadian and that, consequently, the success of the 1934 oan is the personal concern of every man and

The Pominion.

The 1934 Loan is a further step in a great national undertaking; its success means a further step on the road to recovery. I know that I need not stress the attractiveness of the Loan as the soundest possible investment, for that will be universally recognized. I do, however, earnestly call upon my fellow Canadians to support this Loan to the limit of their abilities as an opportunity to promote our national welfare. I know of no way in which the individual citizen can render greater service to himself and to his country.

Notes on 10 Canadian Heroes and Hitching and Driving Contest-Gordon Jackson, 1 Sr. W.

My good-will in the business I

A BLACKSMITHS WILL

A Blacksmith with a sardonic hu

or drafted his will in the follow

I leave my equity in the business

and my car, to my son. He will have to go to work to keep up the

leave to the jobbers who sold me goods. They took some awful chan ces and are entitled to something. My shop equipment and tools I leave to the junk man — he has had his eye on then for several years. I want at least six local farmers to act as palibearers. I have carried them so long that I feel it is their turn to carry me for a little. I direct all funeral expenses to be paid from my shop. Ask my help ers to keep track of these expenses. of the expense of turning out a job As regards flowers - I got so few

quets when I was alive that my fellow b'acksmiths need not both when I and dead. Bury the coal shovel at my right hand: I may need it.
