Pithy Anecdotes Of the Famous Rate of Violent Deaths High Among Creek

Danger of Slang
The danger of using slang whea
communicating with a foreigner is
amusingly illustrated by an aneedote
related by Mrs. Fremont Older in the
biography of William Randolph
Hearst. Some years ago Mr. Hearst
instructed a French agent, by letter,
to bid for some choice pieces of Tanagra which were about to be sold at
auction in Paris. In his letter, the
publisher said:
"Of course I don't want any of the
darned old things which will run up
to fabulous prices."

And he set a limit to the price to
which the agent could go.

WASHINGTON. — Rivers and harbors projects under the \$150,000,000 item in the War Department appropriate to the most acute problems.

Through this column farmers may secure the latest information pertaining to their difficulties. To introduce this service Professor Bell has prepared the following typical problems to indicate the information which should be given in order that a satisfactory answer can be made. If answer is desired by letter enclose stamped and addressed envelope for reply. Address all inquiries to Professor Henry G. Bell, Room 421, 73 Adelaide St. W., Toronto, Ont.

item in the War Department appronate appropriation committee includ-ed these Michigan projects:

E. G. H., Bruce County:--"Wil a 2-12-6 fertilizer give as good results sown in the ordinary way Keeweenaw Waterway, \$1.300,000; as 1/2 the amount of 4-24-12 fer-Reef Passage, \$132,000; St. Mary's Reef Passage, \$132,000; St. Mary's tilizer sown in the same way or heavy clay land?" ANSWER:--We find our fertilizer tests tha

in all cases, fertilizer sown with a drill,—which would include fertilizer sown with a good fertilizer drilling attachment, gives mubetter results than the same fertilizer sown broadcast and work ed in by discing and harrowing. The reason for this is undoubted ly the fact that available plan food is concentrated nearer the seed but not touching it to any extent, and is therefore available in considerable quantity for early help to the growing crop.

The second part of your ques tion comparing concentrated fertilizer with the single strength fertilizer raises a question which has not as yet been fully settled. or instance, the claim is made that 200 lbs. of 4-24-12 will give as good results as 400 lbs. of 2-12-6. Both these parcels of fertilizer contain exactly the same amount of plant nutrients (nrtrogen,

S. G. M., Essex County:—"We have a field from which we have been cutting alfalfa hay 10r several years. It has turned pretty much to grass. We pastured it last season and want to again this season. We thought it might be well to fertilize it as we have quite a large heard of cattle and want to get all the feed possible off of it. The soil is a sandy loam. I would be glad to get your advice."

Answer.

From our experience, I believe you would do well to apply at least three bags of 2-12-10 to your alfalfa field, as soon as the snow is gone and the soil is sufficiently dry to drive on. This fertilizer would be best applied with a lime broadcaster, but if you do not have this implement, an ordinary fertilizer-gram drill will do the job fairly well, if you to drive well, if you to the done of the provinces and full those ergs, George, and see if they're
