Fire Hazards

Fire Chief, W. J. Elliott is making a plea to the citizens this week to see that their chimneys are in proper order. Fortunately to date we have not had a fire but other municipalities are having considerable fire loss from this cause and it has been more luck than good management that has saved us from some disaster. We are quite aware of numerous chimneys in the Village that are very dangerous hazards. Why let this menace of your own safety and the safety of others go unheeded. Act at once.

Constable on Duty

Commencing the first of the year Constable Banks assumed his duties in the Village. He patrols the street approximately seven hours each night throughout the winter months and is at the call of the council at any time throughout the twenty-four hours of the day. In view of the danger of fire, alone, it is a feeling of contentment to know that someone is on the lookout throu ghout the night.

Dangerous Pavements

The SNAPSHOT GUILD MAKE A SILHOUETTE

With the arrival of cooler days and nights that do not offer much encouragement for outdoor activities, there is a very noticeable increase in interest by amateurs in snapshots in the house at night.

Once you start this fascinating hobby you will undoubtedly agree that it is a real pleasure and an ideal way to occupy your time profitably during the long evenings of fall and winter.

All of us are familiar with the ordinary type of snapshots but few have made silhouette pictures. With this type of picture, even more than with ordinary snaps, it is important that the pictures tell their own story—unless, of course, you want simply a profile head and shoulders study—for you have only outlines to work with, unsupported by perspective or detail.

The first essential of silhouette pictures is a perfectly flat background, devoid of detail. And the easiest way to obtain such a background is to stretch a bed sheet across a broad doorway between two rooms. It's important that the sheet of the picture is a perfectly flat background is to stretch a bed sheet across a broad doorway between two rooms. It's important that the sheet of the picture is a perfectly flat background is to stretch a bed sheet across a broad doorway between two rooms. It's important that the sheet of the picture is a perfectly flat background is to stretch a bed sheet across a broad doorway between two rooms. It's important that the sheet of the picture is a perfectly flat background, a strong light must be put in back of it, about five feet away, either centered or placed directly back of the major feature of the picture. You have a wide choice of lamps for your lighting. You can use a couple of the picture is a proposite your and the light). See diagram. Place your samera on a tripod or table so that it is directly opposite your subject. When the picture is taken, the light in either of the rooms. Now about the exposures. If you use the two 60-watt lamps, you will suffice. Using the Photofash (which light) set the shutter at "time," or not all roo ttes make excellent greeting cards, book plates, and place cards.
