COOKING POTATOES

An industrious statistician has figured out that men generally order French fried potatoes when they eat in hotels and restaurants. Why? The reason men eat French fried potatoes in hotels is that they never get them at home. Yet there are not hard to do. The preparation, however, should be careful.

USE IMAGINATION IN COOKING POTATOES

French fries should be cut in uniform thickness. Shortening placed in the fryer should be hot enough to make bubbles rise to the surface when potatoes are put in. Put six or eight slices into kettle and cook five minutes, stirring with a long handled fork or skimmer. Remove them at once to second kettle. This fat is heated to 425 degrees F. Cook until puffed and delicately browned and crisp. Drain on crumpled paper and sprinkle with salt. Keep in a warm oven about 300 degrees F. until ready to serve to avoid crispiness.

Cutting Devices Handy

There are clever devices on the market for cutting potatoes that insure perfection and since this type of potato cookery makes such attractive serving for various occasions, a set of potato cutters is a worthwhile investment.

A fat that may be heated to high temperature without smoking. Burning should be used for frying. A high grade vegetable oil or a firm vegetable fat give satisfactory results because either can be made very hot before the fat molecules break down.

To make French fried potatoes, burn potatoes and cut lengths into strips about 3/4 inch thick. Let stand in ice water for an hour. Drain and dry between towels. Fry in deep fat heated to 395 degrees F. Cook no more than twelve pieces at a time. Cook until brown and crisp on all sides. Drain on heavy brown paper and sprinkle with salt. Serve as soon as possible after frying.

Enjoying The Night Life

Helen Vinson, charming moving picture star and wife of Fred Perry, tennis star, is moved to laughter by the antics of a performer at the Trocadero, New York City night club, which she attended with a party of friends.

FU MANCHU

By Sax Rohmer

Delicate fingers touched my right eye as I lay on a bed. Fortunately, my medical knowledge told me that was coming—a creature sought to learn whether I was conscious. I lifted my eyes up, as the lid was slowly lifted and lowered again.

...the man moved away. Smith murmured: "Good. He took me on trust after that. You noticed the silence? Most men are skimming. . . . They are not drugged. . . ."

When Movie Goers Must Dodge Balls

Lately, though, with the passing of the old-fashioned boarding houses, social pudding has assumed its rightful place as a good and nourishing dessert.

When you serve bread pudding for dessert, stress vegetable and fruit in the remainder of the meal. (For instance, have hearty soup with crisp crackers, followed by fruit salad, the whole topped off with a glorified bread pudding.)

Quality Pudding

Three eggs, 1 cup sugar, 1 cup soft bread crumbs, 1/2 teaspoon baking powder, 1 cup chopped walnuts, 1 cup dates, few grains salt, 1/2 teaspoon vanilla.

Beat yolks of eggs until thick and lemon colored. Mix next 2 ingredients and combine with bread crumbs. Add dates and walnuts to beaten yolks and fold in whites of eggs beaten until stiff. Add vanilla and spread about 1/2 inch in a shallow pan which has been buttered and dusted with flour. Bake in a moderate oven (350 degrees F.) until firm, about forty minutes. Sprinkle with jelly and cover with whites of eggs beaten until stiff with powdered sugar and juice of 1/2 lemon in a shallow pan. Bake again (300 degrees F.) to puff and brown the meringue. Serve warm with any sauce.

HOUSEHOLD HINTS

Need to keep bottles well-labeled

The need to keep bottles well-labeled and poisons out of the reach of children is shown by the report of 500 or more deaths each year from acute poisonings in children under five years of age.

SEWING TIPS

It's here, I suppose, but such beautiful here—the club that a certain housekeeper group in a community not far away has formed to promote the abolishment of Sunday fags and orgies and incidentally, drugging more than twelve pieces at a time. Cook until brown and crisp on all sides. Drain on heavy brown paper and sprinkle with salt. Serve as soon as possible after frying.

FOR BREAD PUFFING

Bread pudding used to have such a bad reputation along with prunes and hush that conscientious housekeepers preferred to use left-over bread for something else rather than for the old-fashioned boarding house, social pudding has assumed its rightful place as a good and nourishing dessert.

Ottawa Requires 2,095 New Houses

OTTAWA.—The Board of Control under consideration of a report from a sub-committee of the National Construction Council of Canada, saying that at least 2,095 new dwellings are needed here to house low wage earners and relief tenants.

A Winter Albino

This is the true story of a bird that willingly exchanged freedom for captivity. A doctor in a Home County keeps a few birds in cages that are large enough to be called aviaries. In one of these was a hen bullfinch whose personality so pleased a wild bird that he would willingly trade places with her.

SLIP OFF JACKET FORMAL WEAR

How To Deal With Parasites Of Horses

It is as necessary as it ever was for the young farmer to learn all he can about the care of horses, and particularly as the diseases caused by them are always of considerable importance. Young animals particularly are more susceptible and are more susceptible to the ravages of these parasites and may be permanently affected, if nothing is done for them, before they reach the age of usefulness.

British Tonnage In Sharp Decline

LONDON.—The total tonnage of merchant ships registered under the British flag declined 2,856,492 tons between 1930 and 1934. The Board of Trade Journal revealed today. On December 31, 1934, there were 8,662 steamships registered with a total of 12,878,412 tons; 4,168 motorships of 2,826,160 tons, and 4,435 sailing vessels totaling 359,409 tons, according to the Journal's statistics.

Things To Remember

What shall we keep from out the misty past? What keeps in mind through all the passing years? Pictures of joys whose memories e'er shall last? Or sorrow's days with all their light and tears? Better to keep in mind the happy scenes. Days that were bright, undimmed by cloud or rain.

BEVER

In nothing is human nature so unfair as in its liking for some animals and its dislike of others; and the squirrel has always been a favorite. He has stood on a dam and seen a log in some far spot of Canada or Newfoundland, and even have looked forward to the nuts which he would eat. But even so little as the squirrel (the beaver is by far more intelligent from either side is comparatively modern; it would be interesting to know whether the earlier pictures gave fuller details of costume.—London Observer.

30 Days to Think It Over

A young man from the recently came to town, with a second hand car later in the day was being driven. The car was taken from him, and he was left with another car and injured its occupant. He ran away and failed to return scene, which is a criminal in itself.

THE REMARKABLE ROMANCE OF AN INDUSTRIAL DICTATOR

There was something suffocating to him in his marriage. But soon he became convinced that he was being used. He was used to it, and only when he was threatened heavily against him as the car careered, he looked down at her and smiled with a sudden, unexpected tenderness; his heart raced, but her emotion was too powerful for her to understand whether it was unrepentant or not.

ODDITIES OF PLAYING CARDS

It has been left to a correspondent of The Times to point out that the club suit of cards is "the only card game in which a player does not possess six eyes" (the knave being counted for this purpose, as a royalty). All the others have no more than four eyes. It is perhaps a matter of gallantry that the Queens are the only figures who always get their full value; the Kings being valued seven among them, and the Knave six. The Knave, on the other hand, has a monopoly of kings; for two look to the right and two to the left, whereas both Kings and Queens are "knave" later in the proportions of three to two and one.

How To Deal With Parasites Of Horses

It is as necessary as it ever was for the young farmer to learn all he can about the care of horses, and particularly as the diseases caused by them are always of considerable importance. Young animals particularly are more susceptible and are more susceptible to the ravages of these parasites and may be permanently affected, if nothing is done for them, before they reach the age of usefulness.

THE SEVERED FINGERS—The Lifted Eyelid.

An occupant of one of the bunks had scrambled to the floor. He was an impressive Chinese in blouse and flowing trousers. The hunchbacked man was standing behind the curtain. "Don't get' her!" Naylor said.
