THE WORLD AT LARGE

## Canada

### Problem of the Cities

Everywhere our cities are over-crowded. The rural population is dropping. It is in these cities that the municipalities default as a rule. The urban areas can't deny themselves anything. The problem of the cities needs attention! Almost without exception they are overcrowded with people from the rural sections, so that today there is a shortage of food and shelter. People in search of a "good time" crowd into them. There isn't the same easy relief back home as there used to be. — Saul Star.

### All For Canada's Good

Miss Anna Buchanan is writing her brother, the Governor-General, is an author, using the pen name of O. Douglas. She expects to receive some material while in the Dominion, and as it is anticipated that he will also bring Canadian color into some of his future writings, the new literature is likely to result in some fine literary pictures of this Dominion. — Bramford Express.

### Less Severe Punishment

A study of criminal records made by the Dominion Bureau of Statistics reveals that in the last five years the average number of death penalties exacted in Canada has been 22 per cent. This is a smaller number than 20 years ago despite the increase in population and accompanying growth of crime.

### No Age Limit for This Summer Frock

A slender sport dress with a nautical hint is today's model. It is made of light fabric with bright lines and a promise of happy days ahead. A style of equal charm for mother or daughter, there is a wealth of ease tucked away in a full skirt via a well-placed inverted pleat. It is another excitement too—the deep tonalities of blue and green, the shimmering of the Empire on their own soil. — Winnipeg Tribune.

### Old Stuff

How the Callander quintuplets are getting along. Marie has a black eye and the solemn telegraphed explanation is that she collided with a door. What an old excuse for so young a victim! — Toronto Globe.

### Reduce The Risk

A coroner's jury investigating the fatal accident which occurred at the midway in Kitchener recommended that performers in such daring stunts should have the protection of a net. The female trapeze artist who hurtled to the ground eighty feet below when a rope broke away had had at least some chance of being alive today if a fairly safe landing had been provided. Such reasonable protection would take care of any unexpected slip in the equipment. — Spectator.

### How To Order Patterns

Write your name and address plainly, giving number and size of pattern wanted. Enclose 20c in stamps or coin (coin preferred). Send your order to Barbara Bell, Room 230, 73 West Adelaide St. Toronto.

### majority of people who wear such hair-raising spectacles would feel more comfortable if the risks were not so great. This is evidenced by the fact that the death of the ill-fated aerialist dropped to the ground beneath.

Commenting on this terrible accident the Stratford Beacon-Herald asks: "Is there not a law which should make it impossible for anyone to operate without a net? And does it go on to say: 'If there is no such regulation, the death of the ill-fated aerialist should stir the authorities to quick action.'"

The coroner's jury has given its carefully considered recommendation. It is that the net which was used in this case should be made of a material which will not stretch. — Kitchener Record.

### The Race Goes On

Graduation is the time in not as happy an occasion as we could wish, but it does emphasize one obvious fact that which the professional men often overlook—the race is still going on, the world is not coming up and still the young are still growing up and will not remain idle. They will find work to do in their own way. They will not be content with the words that we have to them. — Victoria Times.

### Hospitals in Modern Life

It is to the great credit of modern life that the food of modern life brings the most varied crops of patients ill with all manner of ailments to the hospitals. The city institutions are outstandingly furthering the progress of medicine, not only through the specialized departments where they provide clinical material for students of medical colleges and the nursing forces, but for every kind of patient, no matter how renowned, who walks their wards. Hospitals are being more and more aware of the responsibility in this regard. They have developed while they have retained their first purpose of sheltering the most helpless of our race. — Toronto Star.

### British Tourist Trade

Great Britain's total income from foreign and British visitors in 1933 was estimated to amount to over \$25,000,000, and Lord Derby commented that Britain through its tourists visitors had an invisible export worth \$28,000,000 annually, not far below the \$28,000,000 received from woolen exports or the \$31,000,000 received from the automobile industry in Ceylon should take rank far behind the three—Times of Ceylon, Colombo.

### Callander to Have Large Parking Area

CALLANDER, Ont.—Parking space for 600 automobiles will be provided at the Dufur Hospital here for motorist visitors to the Dufur Hospital. Highway department work is well advanced to complete the work. The parking area will comprise about 200,000 sq. ft. of space, with a few narrow places on the road from Callander to the hospital. A few narrow places on the road from Callander to the hospital. A few narrow places on the road from Callander to the hospital.

### Cricket and the Empire

With the approach of summer the thoughts of many British-born in Canada will turn with nostalgic longing towards cricket. The future of a nation founded empire, as of a nation, the influence of sports and games is immeasurable in contributing to the solidarity of our Commonwealth of nations. Cricket, as a sport, is a British game, as Australia, South Africa, New Zealand and Empire have demonstrated. Even little Bermuda with its population of 30,000 managed to send a first-class cricket team to Canada last summer. The question arises, What about Canada? It may be that up to the present Canada has not been able to put an intra-empire team into the field owing probably to the fact that she was late in developing this game. She is, however, making strides in this direction and it may be that sooner or later we shall see a Canadian team competing with the cricket stars of the Empire on their own soil. — Winnipeg Tribune.

### Farm Problems

Conducted by PROFESSOR HENRY G. BELL

With the cooperation of the various departments of Ontario Agricultural College.

### Recall How Late Spring Was In Arriving Sixty Year Ago

LONDON, Ont.—Mr. and Mrs. C. Macfie, of Ardven, South London, on May 4 celebrated their 60th wedding anniversary. The stately old house which has been their home for nearly half a century, and in which Mr. Macfie wed, is one of the oldest in London, having been built, originally as a cottage, 102 years ago.

### New Apparatus May Be Epileptic Cure

KANSAS CITY, Mo.—A new electrical device which has been brain surgery—the removal of the brain—has been reported to be a "cure" for epilepsy. It is a "cure" for epilepsy. It is a "cure" for epilepsy. It is a "cure" for epilepsy.

### Says Teeth Good For 70 Years

St. Louis Dentist Deplores Use of Plates by 50-year-olds

TORONTO—Falls teeth should not be necessary for anybody under 50 years of age, a dentist here deplores the practice of providing prosthodontic treatment for the young. He says that the teeth of a 50-year-old man should be in the best of health and that the dentist should not be called upon to provide artificial plates. — Toronto Star.

### 23,166 Mental Defectives In U.S. Are Sterilized

ST. LOUIS—Two California psychiatrists reported to the American Association on Mental Deficiency that 23,166 persons have been sterilized so far in 23 states legalizing such procedure for the feeble-minded. A third, Dr. Harry H. Laughlin of the Carnegie Institute at Cold Spring Harbor, Long Island, N.Y., declared a needed advance in eugenic sterilization was the use of the biological equivalent to reducing the yield from other methods affecting this class. The black scourge on the race, as is the case with eugenics, these data are important from the negative angle.

### Exports To U.S. Advance Sharply

Increase in Horses More Than 400 Per Cent

OTTAWA—Promoted gains in exports of the United States of Canada commodities affected by the Canada-United States trade agreement were recorded during the first four months of 1934, as compared with the corresponding period of 1933, according to a statement issued recently by Hon. W. D. Eider, Minister of Trade and Commerce. Gains in exports of agricultural products and lumber were noted particularly.

### HANDS SWOLLEN WITH RHEUMATISM

Wishes She Had Taken Kruschen Earlier

If only she had taken Kruschen Salts at first, this woman might have saved many dollars, and avoided weeks of suffering. She writes: "I suffered greatly from rheumatism for nearly 12 months. My hands were swollen, and I could not do my own work or get up the stairs without great pain. I tried almost everything I was told. At last I decided to try Kruschen. I have used the bottles, and I am pleased to tell you I am now better, thanks to Kruschen Salts. I shall never be without them again. If I had known I should have saved myself so much trouble, I would have bought a lot of money." — (Mrs) E.B.

### FINANCIAL FLASHES

This service, giving the latest reports on mining activities, is appearing weekly in this paper.

### Little Long Lac

Directors of Little Long Lac Gold Mines have declared a dividend of 10 cents per share payable June 20th to the shareholders of record June 15th. The dividend, the second made by the company, will involve a total of \$182,000 on the outstanding shares.

### Central Gold Mines

A renewed campaign of development is planned for the Central Gold Mines property in Dummer Township, Quebec, which has recently been re-acquired by the company. A crew of men have been engaged and are now on their way into the property to resume operations including the reworking of the shaft which was sunk to No. 3 vein in former operations. It is understood that the company plans to carry on diamond drilling to thoroughly explore the veins previously opened up.

### Golden Gate Mining Co.

Golden Gate Mining Company has a crew of 8 men presently employed on the property located 1 1/2 miles west of Macassa Mines in the Kirkland Lake area, opening up the workings and continuing up the mining plant in readiness for renewed development work. In addition the company has a crew engaged in surface operations having charge of a new vein carrying considerable free gold has been opened up, according to S. A. Palm, M.E., in charge of operations. The mining plant is shortly working at capacity.

### Duparquet Mining Co.

Directors of Duparquet Mining Co. have approved the sale of the company's property in Duparquet Township, Quebec, to Dumico Gold Corporation for 1,600,000 shares of the latter stock. Shareholders approval will be asked at a special meeting to be held on May 27th next. Dumico, it is stated, has under consideration several offers to finance development of the property to production.

### Nugold Mining Corp.

According to an official report on the return of the vice-president and general manager from the Bio-house mine in Nova Scotia, increased development operations have commenced with additional machine men having been engaged. The programme of development for the next two months calls for sinking the main shaft to a depth of 275 feet, drifting on upper levels and diamond drilling. Nugold is the property of the Ontario Mines in Nova Scotia, Tahona and Matachewan areas.

### Roche Long Lac

Roche Long Lac Mines, Ltd., has dispatched a diamond-drill crew to its property east of Chatham Mines in the Little Long Lac area to commence work. The company also owns a group of claims west of Hard Rock and the MacLeod-Cochabait developments. A surface programme is also scheduled to start on the company's holdings in the Horwood Lake area. Ample finances are available for the summer's work.

### Afton Mines

Official announcement is made that Afton Mines plans to start a new campaign in which it will hold a 35 per cent interest to develop its Salsido River claims in the Little Long Lac area. In earlier work on the claims four veins were exposed on which some diamond drilling was done last fall. The No. 1 vein has been traced to a depth of 616 to 618 feet. The No. 2 vein lies about 200 feet east of the No. 1. The No. 4 vein was traced for 60 feet before the work on the property was shut down for the winter. A 200 pound sample taken from the surface of the ore showings to a depth of 616 to 618 feet has been analyzed and the number of ounces of gold per ton has been calculated. The amount of gold per ton is estimated to be 150 ounces.

### Ymir Yankee Girl Gold Mines

Ymir Yankee Girl Gold Mines has completed plans for the resumption of sinking of the mine to the 1,500-ft. level and work will commence immediately. The mine has been closed since 1925. The mine has been closed since 1925. The mine has been closed since 1925.

### Horses in Demand

Every excess exhausts itself. A few years ago there was a general alarm that the horse was disappearing. There was an actual decrease in the number of horses following the introduction and wide-use of tractors, but the downward movement has been checked, and the number of horses is increasing. There is most activity in the draft horse. Breeding studs are having a level demand, and good draft horses are at a premium. The light harness horse is rare because the horse and buggy days are over, but even the gated saddle horse is enjoying a growing popularity along with his more sturdy brother the draft horse.
