### How To Enter Contest

Plainly write or print out the ingredients and method and send it together with your address to: Household Science, 73 West Adelaide Street, Toronto.

### Scientists Tackle Soggy Potato Chips

WASHINGTON—Why are some potato chips fresh, crisp and tasty and others tough, hard and discouraging?

Bill Bridges and when he looked up the ball was soaring past him to land high up in the short right field bleacher for a home run. The score was three all and both teams had to start their ball game all over again.

Whittier waited a long time before throwing the next one. Another bean ball! This time Larry hit the dirt again. He rose from the ground covered with dirt. Throwing down his hat he strode out to the mound.

### THE SPOKEN AND THE WRITTEN WORD—Acts 17:1-15; 1 Thessalonians 2:1-12

1. Now when they had passed through Amphipolis and Apollonia, they came to Thessalonica, where a synagogue was open to them.

2. But we were gentle in the midst of you, as when a nurse cherishes her own children.

3. For we remember, brethren, our labor and travail: working night and day, that we might not burden any of you, because ye were dear to us.

4. For ye remember, brethren, our labor and travail: working night and day, that we might not burden any of you, because ye were dear to us.

5. For ye remember, brethren, our labor and travail: working night and day, that we might not burden any of you, because ye were dear to us.

6. For ye remember, brethren, our labor and travail: working night and day, that we might not burden any of you, because ye were dear to us.

7. For ye remember, brethren, our labor and travail: working night and day, that we might not burden any of you, because ye were dear to us.

8. For ye remember, brethren, our labor and travail: working night and day, that we might not burden any of you, because ye were dear to us.

9. For ye remember, brethren, our labor and travail: working night and day, that we might not burden any of you, because ye were dear to us.

10. For ye remember, brethren, our labor and travail: working night and day, that we might not burden any of you, because ye were dear to us.

11. For ye remember, brethren, our labor and travail: working night and day, that we might not burden any of you, because ye were dear to us.

12. For ye remember, brethren, our labor and travail: working night and day, that we might not burden any of you, because ye were dear to us.

## Ready For Tests Before Flying Atlantic

The Caledonia, the first of long range flying boats being built for Transatlantic passenger service, on the slipways before taking to the water for a series of tests. Regular Transatlantic flights are expected to be inaugurated next summer.

### Hay! Bales of Fun!

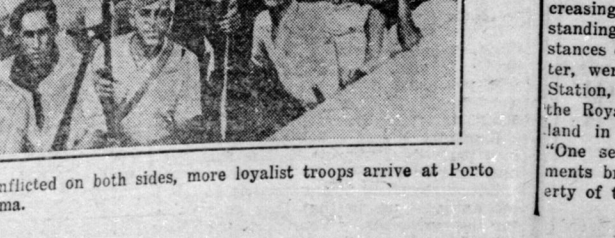

Pretty farmerettes pitch in to make the annual hay and dairy festival at Hynes, Cal., interesting to the visitors to the world's largest hay market. The girls look husky enough to shine at hay making.

### Floats A New Idea

Darney Fry, sportsman and inventor, introduced this one for deep sea fishing off Venice, Cal. He calls it a hydrocyle. It is propelled by a paddle wheel, operated similarly to a bicycle, mounted between two 14-foot pontoons. He claims a speed of 10 miles per hour.

### Loyalists Attack Rebel Stronghold

With heavy losses reported to have been inflicted on both sides, more loyalist troops arrive at Forto Christo, Majorca, in Federal advance on Palma.

## The Greatest Things (Oman)

The best day: Today.  
The greatest deliverer: One who deceives himself.  
The greatest mistake: Giving up.  
The most expensive indulgence: Hate.  
The cheapest, stupidest, and easiest thing to do: Finding fault.

The greatest trouble maker: Talking too much.  
The worst bankrupt: The soul that has lost its enthusiasm.  
The best teacher: One who makes you want to learn.  
The best part of any one's religion: Goodness and cheerfulness.  
The meanest feeling: Jealousy.  
The greatest need: Common sense.

## Farm Queries

Conducted by PROFESSOR HENRY G. BELL  
With the Co-Operation of the Various Departments of the Ontario Agricultural College

The business of farming is yearly becoming more and more dependent upon facts that have been gathered regarding livestock and livestock management, crop production, soil management, disease and insect control and business organization of the farming industry.

1. QUESTION: How important is the organic matter or humus problem?

ANSWER: The humus or organic matter supply in cultivated soils in Ontario bids fair to become a major problem. In some sections, farmers are burning straw piles. In many other sections they are keeping less and less livestock which means a diminishing supply of manure.

2. QUESTION: I fertilized for sugar beets on the same soil for several years, but the crop will there be any plant food left in the soil from the fertilizer that was applied?

ANSWER: If the soil is in good condition, about neutral in reaction, that is, neither sour nor sweet, there should be a considerable amount of phosphate and potash which was applied for the beets still available in the soil for crops of next year.

3. QUESTION: What fertilizer value has the waste from tomatoes? Where we grew tomatoes this year, quite a lot remained on the ground after picking. We live near enough to the canning factory so that we can get considerable waste pulp and skins of tomatoes. Have these any value as fertilizer?

ANSWER: Tomato fruit contains about 2 per cent nitrogen, 7 per cent phosphoric acid and 35 per cent potash, while the leaves and stalks contain about 35 per cent nitrogen, 1 per cent phosphoric acid and 45 per cent potash. This will give you a idea of the fertilizer value of this material when it is left on the ground.

HENRY W. BELL,  
Associate Professor of Chemistry,  
Ontario Agricultural College
