LESSON 1

God the Creator — Genesis 1:1—2:25

Primted Text — Genesis 1:1-5, 26-31

Golden Text — Genesis 1:1-5, 26-31

Golden Text — "in the beginning God created the heavens and the earth."

Gene-is 1:1.

The Lesson In Its Setting

Time — It is not known when the universe was created, nor is it definitely known when man was created. However long ago the creation of the universe, the creation of man did not take place before 5000 B.C. though the exact year of this will probably never be known. All ancient histories recognize that there are no records of human civilization antedating 4000 to 5000 B.B.

Piace — There have been innumerated the firm of the sea, and over the birds of the heavens and over every living thing that moveth upon the face of the earth, and God said, Behold, I have given you every herb yielding seed, which is upon the face of the earth.

cepted by the Bible scholars; all we can say is that it was probably located somewhere near the lower part of the Tigris and the Euphrates

any angel or created being. God was before any thing, or any created person. Every thing that is into perfect subjection; he gave it into perfect subjection; he gave

thing before God, it might be that power or person could ultimately crush God, but, if all things have been made by God, then surely God is greater than all the universe, and, is greater than all the universe, and, if his power is great enough to flood. create, it is also sufficient to con-

11.) The word waste refers to the matter, and void to the form, and the phrase combining the two dethe phrase combining the two denotes a state of utter confusion and desolation, an absence of all that can furnish or people the land.

And darkness was upon the face of the deep." The conjunction indicates that the darkness is condicates that the word day has different places. nected with the disorder of the pre-vious phrase, and forms a part of the physical dearangement; the deep refers, of course, to the sea (Gen. 7:11; 8:2; Isra. 51:10, etc.) "And a period of twenty-four hours in the Spirit of God moved upon the face of the waters." Here is the beginning of God's work in the restoration of that which has become chaotic. What the Holy Spirit began to do with the chaotic condi-tion, bringing out of it the beauty of a new earth, he also has been sent to do in the human heart, bringing

out of its chaos, due to sin, a new life, beautiful and orderly. like that of the Lord Jesus Christ. 'And God said, Let there be light and there was light. Simply for God to utter his word brings into exist-ence whatever God wills (John 1: 1-3; Eph. 3:9, Col. 1:16). The fact that God creates by a word is an indication not only of the ease with which he accomplished his work, and of his omnipresence, but also of the

"And God saw the light, that it was good." That is, he examined and judged the newly finished product, investigated its nature and its properties, admired its excellency, and, in all these respects, he pronounced good. "And God divided the light from the darkness." Thus God allows darkness still to exist, but save seein to hecome dominant. never again to become dominant.

And God called the light Day, and the darkness he called Night." The

first word which we have in the Bible as proceeding from God is the word day. We, as followers of the Lord Jesus, are to walk honestly in the day (Rom. 13:13); we are the children of the day, not of the night.
(1 Thess. 5:5. "And there was evening and there was morning, one day." It is significant that, as in the Genesis account of creation, light appeared on the first day, so in the new creation which we have in Jesus Christ, the Lord came forth from the darkness of the grave and death on the first day of the new week in the morning of the resurrection (Matt. 28:1; Mark 16:2; John 20:1, 19).

"And God said. Let us make man in our image, after our likeness."
The plural pronoun "us" certainly indicates that God took counsel with at least one other in this supreme, final work of creation, and we can believe he took counsel with persons of the Godhead, the Son and the Hely Ghost. This is the only place in all the six days of creation concerning which we have a record of such a council; three times in the narrative of man's origin do we have the word create, both facts emphacizing the preeminent signi-

creation above all preceding ones. "And let them have dominion over the fish of the sea, and over the birds of the heavens, and over the cattle, and over all the earth, and over every creeping thing that creepeth upon the earth." "And God created man in his own image, in the image of God created he him;

male and female created he them.

earth. And God said, Benoud, given you every herb yielding seed, which is upon the face of the earth, and every tree, in which is the fruit of a tree yielding seed; to you it shall the every heast of to 5900 B.B.

Place – There have been innumerable conjectures as to the location of the Garden of Eden, but, thus far, none of them have been generally actions of the state of a tree yielding seed; to you it shall be for food. And to every bird of the the earth, and to every break the heavens, and to everything that creepeth upon the earth, wherein there is life, I have given every green "In the beginning God created the heavens and the earth." There was no matter before the beginning. nor any planet in the heavens, nor our first parents; he commands them to be fruitful and multiply that they erse today has come from them full dominion over all crea-

"And God saw everything that he "And God saw everything that had made, and, behold, it was very good. And there was evening, and void." (See Jer. 4:23 and Isa. 34:

"And God saw everything that was very good. And there was evening, and there was morning, the sixth day. Perhaps here we might just add as perhaps here. the very same verse, both the morning and the evening are called one day. Again, in Genesis 2:4, the phrase the day refers to the entire period of creation. Elsewhere in the Bible the same phrase is used to indicate various periods of time (John 6:39, 44, 54; Rom. 8:19-23).

Cotton Lace Creation

Stunning jacket of white cotton lace, with cuffs and pockets of white chamois, was created by Maggy Rouff for wear over a formal gown of white crepe.

"America is beginning to see-and "America is beginning to see and indeed beginning very acutely to feel—that it is itself a part of the world and when the world suffers will have to sufer with it." -Havelock Ellis.

"Any progress which is not based on an intrinsic advance in human

Solving the problem of how to practice tenn's throughout the year, Bob and Dick Odman, of Seattle, Wash., high school players, had court covered with tent made of 3,000 yards of canvas. It is electrically heated and lighted.

Lord Bessborough's Niece Marries

Mile. Jacqueline de Neuflize, niece of Lord and Lady Bessborough, former Governor-General of Canada, and his wife, leaves the church after her wedding, in Paris, to Baron Jean de Watteville-Berkheim.

His Flower Show Visit is No Bed of Roses

Little Patrick Skelly voices his protest against being turned into an amusing exhibit at annual New York Flower Show. His mother placed harness on him and fastened him to a pipe while she looked over the floral prize winners.

Conscious

Emil A. Hartman, director of the Fashions Academy, has announced the 1937 winners of medals awarded by the Academy each spring to feminine fashion leaders. Like the other "best-dressed" lists, it was "the result of a poll of America's leading desurphs, including to supplie the supplied of the property signers." The winners, chosen from eight fields:
Helen Gleason, stage; Carole Lombard, screen; Mrs. William Rhinelander Stewart, society; Dorothy Mae Kilgallen, adventure; Jessica Dragonette.

radio; Mrs. Ruth Bryan Owen Rhode, public life; Eve Symington, night clubs; Lily Pons, opera.

British ash is preferred to all others for airplane work and sports goods. The tendency of the trees in Great Britain, adds the writer, is to produce a fast-growing timber, is to produce a fast-growing timber, and this presents the greatest difficulty to the extension of its use.

HARPERS MALARTIC

All experienced gardeners warn against working soil too early. With clay, it is especially dangerous to dig when there is too much moisture in the ground. Such soil is liable to puddle, and when drying out it may base. In any case there is no advantage, and the work would have to be dene over again later on. A good safe rule is to squeeze a handful of earth in the hand. If it compacts into a oall, the enthusiast is

A New Rose Makes Its Bow To Spring

"No, no, no," exclaimed Glovan-ni Martinelli, the opera star. "The pipe, the cigar, the cigarettes!" Reporters who had come to inter-view the famous singer hastily ex-tinguished the three evils, when he explained that the smoke made his NEW ICKK—Equally beautiful at NEW Cork—Equally beautiful at all these from its first budding to the final opening of the flower, the new "Queen Mary" rose, winner of the gold medal at the International the fold medal at the international Flower Show, pays a subtle tribute to the roy-l character for whom 't is named. Most roses have moments at which they are lovlier than at the following that the following Mary's throat sore.
"But didn't you endorse a cigar-"But didn't you endorse a cigarette once?" asked a reporter.
"Si, si," admitted the smiling tenor, "But remember what I said. I said "These cigarettes never make ify throat sore," And that is true. They never do."
"Because," a reporter suggested, "you never smoke them?"
"Si, zi," laughed Martinelli. "I never smoke them. I never smoked anything in my life." at which they are lovlier than at other times, but the "Queen Mary" regal on its long stem unfolds very slowly keeping its long inner petals folded tightly over its heart until the last instant of blooming, when they open flat to reveal themselves delicately streaked with the sunshine gold of the corolla.

in the greenhouse and if properly cared for it will last an unusually Now that house-cleaning time approaches it is well to bear in mind the dangers of using inflammable liquids in large quantities for cleaning purposes, about the house.

Every year fatalities occur because individuals mists on cleaning the hard-wood floors with gasoline or some other highly-explosive material. Such a practice is merely courting disaster and should be rigidly avoided.

If inflammable cleaning fluids are to be kept about the premises during house-cleaning time, they should be placed in safety containers, and used in small quantities remote from long time after being cut.

The rose was imported to this country from Europe where it has won certificates in Holland. It was won certificate last fall at the awarded a certificate last fall at the New York Horticultural Society show and a gold medal at the recent Philadelphia exhibit.

Roosevelt Admits He Can Milk Cows

WASHINGTON. - Preside Roosevelt has settled a dispute be-tween two small boys in Granton, N.Y., with the information that he has milked a cow, although he is

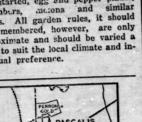

N.Y., with the information that he has milked a cow, although he is only an amateur, "and is now considerably out of practice."

The boys, Cecil Francisco and bert G. Monroe, wrote to the President in a childish scrawl on March 3 to settle their dispute, and were replied to by James Roosevelt, the President's son and sceretary.

The letter from the boys follow: "We, that is, Cecil and I had a little dispute. He said that you never had milked a cow and I said you had. I wish you would be so kind as to let us know."

Secretary Roosevelt replied as follows: "The President has asked me to answer your letter of March 3, and to tell you ha has milked a cow, having learned when a small boy. However, he would like to emphasize that he never claimed to be an expert at it and is considerably out of practice. I hope this settles your little dispute and with best wishes to you both."

he said.

"For 1937 I am going to make an order to fix Dr. Dafoe's remuneration at \$150, which I don't think is an amount adequate for the value of his services, but which is just as much as the township can pay at this time," Judge Plouffe said.

"I bid three spades' is no proper accompaniment to a Toscanini broadcast."—Fritz Kreisler. not too quickly. If you must have a car, you must have a brake."—Andre Maurois.

"The belief in God belongs rather to religion than to cthics. But the two compact be separated."—Dean

"You find Communism in countries where people are not educated. I believe in educating the people to think."—Lady Astor.

Despite the handicap of blindness, the boys of the 1st Brantford (Ontario School for the Blind) Scout Troop are making fine progress. Recently they demonstrated their ability to act as ushers at a Scout entertainment, and the ability to do Semaphore signalling. The boys have made their own Scout neckerchiefs, turk's head "slides," from lace woven in the school shop. The girls of the school Guide Company made the neckerchiefs for the boys and a Scout flag.

Chatham Scouts provided an interesting demonstration of their training work before the local Rotary Club. They built a signal tower at one end of the room and flashed messages, and demonstrated artificial respiration. Mayor C. D. Sulman, himself a former King's Scout, presented a number of Scout badges.

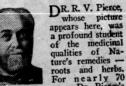

Barrie Scouts have acquired a fine wooded 100-acre camp site in Tiny Township, on Georgian Bay, Members Township, on Georgian Bay, Members Township, on Georgian Bay, Members and the property it is planned to commemorate in some way the fine terest in Scouting of the late Fred J. Mann, and Col. R. W. Leonard, whose legacles made the purchase of the site possible. "Scouting is a counteractive to one of the greatest dangers of modern the advancement in material appartiant of time have tended to mechanize society; to make everyone a eog in a great impersonal machine. But human society can never be mechanized, and if you try, it will cease to be but and encourages self-development. I believe that on us, the free democracies, there lies a special duty of insisting upon the immense importance of personality, for in many countries in the world this seems to be forgotten. And there is no better agent in this task than the Scout Movement."—Lord Tweedsn p.ir. at the Toronto District Annual meeting.
