T. B. MUST BE SCIENTIFICALLY TREATED

The most important factor in the cure of tuberculosis is rest. If a patient has tuberculosis of a joint, the limb is put to rest by splinting or by some other means. In the same manner, the tuberculous lungs must be placed in a certain number of patients, the disease is cured by other surgical operations.

GOD SAVE THE KING

HERE are some novel and easy ways of dressing up your Christmas presents. With a little imagination and ingenuity dozens of attractive effects can be obtained either by using sheets of plain, colored or printed "cellophane" or by crushing the material in the hand and then smoothing out again to give a frosted gift to the package. The little candle in the center gift is very easily made by using colored transparent drinking straw bound together with cellulose tape and trimmed to a point.

SPEEDING DOWN THE SPORTS TRAIL

"Slating by Easter" is the prevalent slogan in these parts. There has been skating and hockey in several weeks but there are several weeks still to be played. If there is going to be a town league here this time we had some ice for practicing.

The sporting world has presented Dizzy Dean with a fine Christmas present. He has been classed as the biggest flop in sport for the past year. Although he was thought to be a former year's work, Dizzy below his former year's work, Dizzy Dean, has been classed as the biggest flop in sport for the past year.

The Leafs had been in a slump. They had lost several games in a row including one to the Bruins in Montreal but no one thought the Leafs would take the flying Frasers and Americans tangle. Well the Leafs won the game and everyone was surprised with the exception of Dick Irvin and maybe the players themselves.

Get Out And Walk!

WALKING is splendid exercise. It confers both physical and mental benefits. The correct way to walk is to carry the chest high, chin level, and throw the legs energetically out from the body.

Others again never attain to excellent health despite their best efforts to do so.
But for the great majority, the truth of the matter is that we take ourselves and our health for granted, for good or for bad. That is an attitude of passive acceptance which is wrong in principle.
The health of the individual and the nation would be lifted to a very much higher level if the assaults outlined in this article became a challenge to all.
Are you enjoying perfect health? If not what are you doing about it? Questions concerning health, addressed to the Canadian Medical Association, will be answered personally by letter.
