A WEEKLY REVIEW OF NATIONAL AFFAIRS

(continued from page one)

previous year. There has also been an impressive gain in the production and export sales of the country's major manufacturing industry, newsprint. Over 80 per cent of our newsprint paper exports go to the United States. Total exports in the twelve months period ending October amounted to 124 million dollars compared with 101 million in the previous year. The monthly output of Canadian newsprint mills has averaged well over 300,000 tons which keeps this country far in advance of any other country in the world in this industry. To keep production, however, in close accord with market demands a number of mills have recently been working on a five day week basis. There will therefore likely be shown a reduction in output for this month when December figures are available. Production figures have been running about 17 per cent over last year's output. Another reason why the Yuletide season has been welcomed in a spirit of confidence for the future is the condition of the Dominion revenues. These show an increase for eight months of the fiscal year (from August 1 to November 30) of over 42 million dollars. This means an easing of financial tension. The day of the balanced budget is coming appreciably nearer.

There is nothing in the economic set up of Canada to prevent a continuance of the upward movement of the country in the coming year. There is, of course, the foreign situation which causes a natural uneasiness, and there is anxiety over economic conditions in the United States which always have some influence on business in Canada. In our domestic affairs the recent dispute between Mr. Hepburn, premier of Ontario and Mr. Hetherington, premier of the province, has been unfortunate. Whether power will be exonerated from Canada or not will come up for discussion in parliament in the coming session. The point, however, which affects the citizen of this country is the danger of the growth of sectionalism. Each one feels the need of unity if we hope to solve and overcome the difficulties which face this country. The fostering of a new national spirit, in so far as the power lies within each individual, might well be a very good New Year's resolution for us all.

LITTLE CRITICISM LEVELLED AT 1937 TOWNSHIP COUNCIL

(continued from page one)

more or less an experiment in combating this menace. The equipment was used in spraying weeds on one side of County roads throughout the entire county at an approximate cost of \$2800. for the year. It was felt by the Roads Committees of the County council that further work would be impossible in view of the additional cost that would be made sectional and that the work done had been approved by the Department in Toronto.

In Road Maintenance, the Reeve pointed out that of the \$15,000.00 expended by the County when new black top construction this year, nearly \$8,000.00 had been spent on that work in the Township of Watford. At this point Mr. Wm. Dennis expressed his criticism of the manner in which the black top had been laid on the front road and stated in his opinion the mixture of tar and stone was not right and that more tar should have been used to thus eliminate the large quantity of loose stone laying on the surface of the road. The Reeve pointed out that this work had been undertaken by the direction of the County Engineer and Department officials from the province and that he had reason to believe that the work was done to have confidence in their work.

Mr. Parkinon touched briefly on the new bridge on the ninth concession and stated he was ready to accept any criticism that may be levelled at Council with respect to this work. Deputy Reeve, Rodger M. Dennis who received a nomination for the Reeve'ship for 1938, was the next speaker. The Township had been put to great expense last spring and culvert repairs made necessary by the heavy rains. There was \$17,700. spent on road maintenance this year, of which the greater portion of the amount was spent on material and labor. Mr. Dennis said he understood there was some criticism of council in operating the quarry at Sanduski. He said it was operated as an economy move, being more centrally located, thus reducing hauling costs and had enabled council to build up the roads in the south part of the Township. When questioned as to the cost of the stone taken from the Sanduski quarry, Mr. Dennis stated the Township paid 90c per yard (2200) lbs. which was more expensive than usual but he felt that in using the course stone the ratepayers were getting greater value for their dollar, in that this stone provided a permanent foundation or road bed. He also informed the meeting that there had been ten miles of asphalt road built this year in the Township.

Mr. Dennis touched briefly on the weed situation in the township and stated the Council was not getting 100 per cent co-operation on the present system and as expressed by the speaker the township is "due for a change in policy" meaning of course, that the Council will next year probably revert to the old method of payment for cutting weeds, and charging the additional expense against the ratepayers.

Mr. Dennis also gave a resume of the work and management of the County Home at Dunville and advised the meeting of the progress made to date on the conservation and reforestation plan that has been adopted by thirty counties in the province. Councillor E. S. Pond stated he was ready to accept his share of criticism on the construction of the bridge on the ninth concession. He said that with other members of the council he had approved a resolution giving the Reeve and County Road Engineer authority to proceed with this work, and who in his opinion should be quite capable of doing this work satisfactorily. Questioned at this point as to the rate of pay for work on this bridge, Councillor Pond stated that labor had been paid at the rate of 25c per hour, Carpenters 30c and the foreman on the job had been paid 40c per hour. When asked why local labor had not been used in the construction of this bridge he stated it was impossible to hire farmers who were busy at that time of year with other work. The bridge had been erected at a total cost of \$1150.00. When asked if he did not think a man and team should get at least 40c per hour for scraping roads, Councillor Pond agreed that the present 30c rate was not sufficient.

AT THE UNITED CHURCH

Christmas services were held at Wesley United Church on Sunday. At the morning service the choir rendered three Christmas numbers and the minister, Rev. W. J. Holley, B.Th., preached on the theme of "The Christmas Story". Preceding the evening service an instrumental trio was presented by Miss J. McMurchy at the organ and Miss Alma and Jack Bailey at the piano. A piano and organ duet by Miss MacMurchy and Miss Bailey was also given during the service and the choir sang two appropriate numbers. The evening message centered around the "Song of Simeon". There was a good attendance at both services.

TODAY

Begin this day with clear purpose, strong resolve, and supreme faith. Concentrate upon the essentials. Put your high ideals into actual deeds and live your largest and noblest life today. Do your work well. The best reward for work well done will be greater work and a larger sphere of usefulness. Rid yourself of every thing which is a hindrance. Keep your mind upon a high level of constructive thought — and you will surely have "GOOD LUCK."

Attention on the construction of the bridge on the ninth concession. He said that with other members of the council he had approved a resolution giving the Reeve and County Road Engineer authority to proceed with this work, and who in his opinion should be quite capable of doing this work satisfactorily. Questioned at this point as to the rate of pay for work on this bridge, Councillor Pond stated that labor had been paid at the rate of 25c per hour, Carpenters 30c and the foreman on the job had been paid 40c per hour. When asked why local labor had not been used in the construction of this bridge he stated it was impossible to hire farmers who were busy at that time of year with other work. The bridge had been erected at a total cost of \$1150.00. When asked if he did not think a man and team should get at least 40c per hour for scraping roads, Councillor Pond agreed that the present 30c rate was not sufficient.

With respect to the cutting of weeds Mr. Pond said he was in favor of paying for the cutting of weeds in 1938 at the rate of 2c per rod. Councillor Catherwood drew the attention of the meeting to the fact there are 160 miles of Township roads in the municipality with 160 culverts and Bridges and to adequately maintain this network required a great deal of work and heavy expenditure. Bridges this year cost the Township \$1700.00 and that amount did not include grading the approach to the bridge on the ninth concession. Mr. Catherwood stated that \$150.00 had been spent on grading at this bridge so far. It has been the policy of council to extend the hard top roads from either side of No. 3 highway and it was the policy he endorsed himself, said Mr. Catherwood when asked why the south end of the Township was not favored with more of this work. He stated of the system of purchasing gasoline and the rate paid for it. Mr. Catherwood stated the gasoline for the trucks was purchased anywhere throughout the Township and that retail price was paid. He also reminded the meeting that the levy this year for the purpose of maintaining school sections was increased and that more tar should have been used to thus eliminate the large quantity of loose stone laying on the surface of the road. The Reeve pointed out that this work had been undertaken by the direction of the County Engineer and Department officials from the province and that he had reason to believe that the work was done to have confidence in their work.

Mr. Parkinon touched briefly on the new bridge on the ninth concession and stated he was ready to accept any criticism that may be levelled at Council with respect to this work.
