Before the summer gets any further under way and before holidays and all the round of summer activities are started, do stop and consider your winter food needs. Nothing, of your winter food needs. Nothing, of course, is farther from our minds during these lovely summer days, than cold winter weather, but it's a good idea to prepare for it. Jams found out to your serrow, have the good idea to prepare for it. Jams found out to your sorrow, have the

and jellies are things which no house-hold can do without at breakfast time on chilly mornings and there are so jelly won't jell. This is just where many other uses for them as well.

Every housewife uses a flash of jelly here and there to brighten up and add sparkle to her dishes.

Jelly won't jell. Inis is just water bottled fruit pectin comes in. HOW TO SEW-By RUTH WYETH SPEARS Can You Make an Original Embroidery Design?

In just about every country in the world but our own, women have no end of enjoyment from originating embroidery designs. We all have this creative instinct, but we don't use it. We have grown used to a stamping pattern that shows us exactly where to make each stitch and we don't experiment with color to find a happy combina-

tion for ourselves.

If you are one of those persons who think you have no or ginality start by copying without a stamping pattern, some simple piece of embro dery. Before you know it you will be improvizing and experimenting a little and that is where the fun begins. But you must be er tical you know. The use of your judgment in deciding whether something you do looks well or whether it should be ripped out and something else tried is the hazard that makes the game exciting.

You cut it the right size, crease and baste a hem along the edges, then with a ruler and pencil you mark the edges off in squares. You decide to outline the squares in chain stitch and put some sort of pert little flower in the center of each square. Now you want to be a chasting a square of the square of the square square along the square of the square sq some sort of pert little flower in the center of each square. Now you come to choosing your colors. You will have to have green leaves for your flowers and there will be the predominating color used in the bedroom, but don't be satisfied with just two colors. Choose at least four with one of them considerably darker than the others. With green for leaves and your bedroom color in mind, look about you—at cretons, at pictures, at china, at rugs, suddenly you will see your color scheme. You will know it when you see it, and you will be able to pick out your embroidery threads in those colors. ly alarmed. "It would demoralize the whole game. You will find that it is easy to make quaint little flowers merely by grouping simple stitches or you may draw around the base of your thimble or around a dime and fill the circle with a stitch similar to the blanket stitch as shown here at C. You will certainly find that the loop stitch, known as the lazy da'sy stitch, is extremely useful. It is made as at D. A tiny version of it appears at E. Stems may be made with back stitches as well as outline stitch and often a single slanting stitch will make a leaf.
