

## Tea for every Taste

# "SALUTE" TEA

## DEATH ON THE DIAMOND

BY CORTLAND FITZSIMMONS

### Synopsis of Preceding Installments:

It has been ten years since Pop Clark was a United League pitcher with his New York Blues, and as the season opens the sports writers, with the exception of Terry Burke, the Blues win. There has been no word from him since he was last seen in the field. He has been in the field for a long time, but he has not been seen since he was last seen in the field. He has been in the field for a long time, but he has not been seen since he was last seen in the field.

## Drug May Decrease Maternal Mortality

LONDON. — A new drug which may help to reduce maternal mortality was mentioned in the British House of Commons by Sir Ernest Graham Little, member of the London University, during debate on the Maternity Services (Scotland) bill.

The bill urges provision of greater nursing and medical services for Scottish women in their homes.

"During the past twelve months," Sir Ernest told the House, "a new drug has been tried, and the remarkable result has followed that the maternal mortality rate has decreased from 22 to 2 per cent."

Sir Ernest said that the new drug, known as "sulphonamide," was disclosed to the Pathological Society of London only recently. It was of simpler constitution than many of the earlier drugs, and was of the same purpose. Toxicity was very much less, and another advantage was that it was not excreted in the milk. There was no secret formula or patent, and the drug was at the disposal of the medical profession, he said.

It was Reynolds' Brooklyn paper and Terry crumpled it in a rage. "Why—why—exploded." The dirty, low, gutteral sound.

Doyle laughed. "I don't blame you, but you can understand how I felt. And there is more to the story. I'm in the paper again with the rehash of the old story. They knew Kelly questioned me and they made quite a point of my looking over the bars. What have the hats to do with it, anyway?"

"The Butcher has a regular hat boy, named Pietro, a little hunchback, a young lad, not more than sixteen or seventeen years old, who has been serving several years on a team because. Well, Pietro was their mascot, too."

"But what has all this to do with the hats?" Doyle asked.

"Pietro came from Chicago with the team. When they arrived, he went up to Jerome Avenue to stay with his uncle, who has a suit and a vegetable store. Just before the game started today, Rawlin received a note from Pietro saying he was sick and sending a substitute. Rawlin didn't have time to bother about the thing and just took the new boy on."

"Doyle stopped under a lamp-post. "Here, read this," Doyle pulled an envelope from his pocket.

## Home Hints

By LAURA KNIGHT

Almost anyone can bake a cake. Recipes are practically fool proof and all you have to do is follow the directions. Why is it then, that so many cakes are not just right, and that some are so bad that they should be thrown away? The answer is that they are not just right, and that some are so bad that they should be thrown away.

Well, the difference between a good and a bad cake often lies in the flour used. So many women overlook the fact that to bake a cake you must have cake flour which is lighter, finer, and has a more delicate gluten than just ordinary flour. The best cake flour may cost a little more, but what a saving it is in the long run. Actual laboratory tests have proved that with fine cake flour you can cut in half the amount of eggs and butter used, and still get a perfect cake, whereas with ordinary flour and butter you must use twice as much.

Try it yourself with this one-egg cake and a good brand of finely-milled cake flour. You can't help but notice the difference in taste, texture and color.

**ONE-EGG CAKE**  
2 cups sifted cake flour  
2 teaspoons baking powder  
1/2 teaspoon salt  
1 teaspoon vanilla  
1 cup sugar  
1 egg, unbeaten  
1/2 cup milk

Sift flour once, measure, add baking powder and salt, and sift together three times. Cream butter thoroughly, add sugar gradually, and beat together well. Add egg and beat very thoroughly. Add dairy, alternately with milk, a small amount at a time, beating after each addition until smooth. Vanilla, fold in. Bake in greased 8-inch layer pans in moderate oven (375 degrees F.) 25 minutes.

**CHOCOLATE ORANGE FROSTING**  
1/2 cup unsifted cake flour  
2 cups sifted confectioner's sugar  
Dash of salt  
2 tablespoons orange juice (about)  
4 tablespoons butter  
1/2 squares unsweetened chocolate, melted  
Combine orange rind and butter; cream well. Add dash of sugar gradually, blending after each addition. Add chocolate and salt and mix well. Add remaining sugar, alternately with orange juice, until of right consistency to spread. Beat thoroughly after each addition.

**TASTY FISH DISHES**  
**Salmon Patties**  
Flake 1 pound can salmon, add 1 egg slightly beaten, 2 tablespoons

## SPORT TODAY

Let's chat for a while about sport and its records. The "Pony Express" flashed the news, when Lincoln made his first inaugural speech, to California in 7 days, and 17 hours.

Only a few weeks ago, Howland flew from California to New York in 77 hours, 17 minutes, and 17 seconds. It took Columbus 71 days to sail the Atlantic. Now it seems that 4 days is sufficient.

Did you know that Sir Malcolm Campbell, the man who has traveled faster on land than any other man was ever, was once arrested for traveling at 27 miles per hour on a bicycle?

The speed record in a motor boat (up to 1907) was 17 miles an hour, and up to 1914, was 30 miles an hour. A track greyhound can speed over a measured distance of 400 yards at top speed of 36 M.P.H. A racing pigeon would do the journey in half that time.

Dr. Charles Townsend, in Trill, discovered a fly, a few years ago, that flies 14 miles a minute, or 840 miles an hour. This insect is called a "cephenomyia." The "cephenomyia" is said to be the fastest fly known to man. A man dropping with his parachute open, falls from 704 to 792 feet per minute, or 8 to 9 miles an hour. A man dropping with closed parachute travels 10,384 feet in one minute, or 11 miles an hour.

A bomb, dropped from a plane, falls 16,332 feet in one minute, and falls at the rate of 189 M.P.H. And here comes the story of the mail and the tortoise. The small travels 2 and 5 inches in one minute, while the tortoise travels 3 feet, 9 inches in one minute. You baseball fans will like this one. A pitched baseball travels 122 feet a second.
