Synopsis of Preceding Instalments: It has been ten years since Pop Clark won a United League pennant with his New York Blues. As the season opens the sports writers, with the exception of Terry Burke of the Star, give them little chance. He bets $10 on them at 20 to 1 at the restaurant of Tony Murallo, a gambler, in the Broadway district. From the first game, in which Whitper, the Philadelphia pitcher, is killed with a rifle bullet through the heart after smashing out a home-run, death or injury cripples the Blues' opponents. Both Whitpey and Larry Doyle, the Blues' rookie shortstop and ex-Fordham star, had been attentive to Clark's pretty daughter, Frances, and she had shown her preference for Larry. When four Boston players are injured, Burke learns that Sid Stream, notorious New York gunman, wrecked their taxi with a rifle bullet through a tire. Stream is found dead and Terry receives by mail the warning: "People who know too much die!" Terry has the news first also when Dirkin, Chicago star, drops dead from poison after hitting a homer. The poison comes from a phonograph needle fixed in the handle of his favorite bat. Pietro, the Chicago bat boy, disappears mysteriously. Masked gunmen truss up Terry, question him, gag him, and warn him he knows too much. He swears his beats are due to lucky hunches. Both Terry and Doyle have been suspected by Detective Kelly, and Clark sends Doyle to Newark. Larry plays good ball there, is sold to Boston, and is becoming one of the most popular players in the league.

"Is he going to be all right?" Terry asked anxiously.

"I think so. I don't know. Maybe we got him just in time. I can't do anything but try to keep his heart going. He has responded to the injection and we may pull him through yet."

"I can't understand it," Terry murmured. "He was all right when we came up here."

"You're sure of that?"

"Positive. When you came and started to examine the body Craven went over to the window. I saw him looking at the jigsaw and then I got interested in watching you. I don't know what he did until I heard him gasp and call me."

"Jigsaw, eh? We'll have to look into that."

The ambulance came and took Craven away. Terry waited until the inspector came up.

"What have we here?" Inspector Dowell asked as he came into the room.

"I wish I knew," the examiner replied. "This fellow, it's Scotter of the Rubes, is dead, and I've just sent a fellow off to the hospital who may die."

"Scotter? That's tough. What happened to him?"

"I don't know. The lad I sent to the hospital acted as if he had been gassed, but how in hell he could have been, I don't know. He was a pal of this man here and he says he was okay when they came up."

The inspector turned to Terry. "Who are you?"

Terry explained who he was and how they happened to be in the room when the body was discovered.

"Let's see, aren't you the fellow who was mixed up in those murders in New York and Boston?"

"I wouldn't say I was mixed up in them. I scooped them and was under suspicion for about ten minutes when Dirkin was killed."

"It was just your curiosity again that brought you here, eh?" the inspector asked and his tone was not too friendly.

"What made you feel so curious?" Craven down in the lobby waiting for Scotter to come out. When Abley began to get uneasy I hung around him and when he came up here Craven and I followed him."

"What happened to your friend, Craven?"

"I don't know."

The examiner cut in and told the inspector all that Terry had told him just a minute before.

"You say Scotter was gassed?"

"Gassed or poisoned, I don't know which."

"Klein!" the inspector barked.

"Yes, sir!" Klein came to the door. "Clear that room and don't touch or let anyone else touch anything in there."

"Yes, sir."

"How long will it take you to find out what happened to Scotter and the other man?" the inspector asked the doctor.

"I don't know, but I would like to take some of that jigsaw puzzle with me."

"Why?"

"Ever hear of the Medici?"

"I've an idea," the medical examiner answered his own question. "The Medici had all sorts of tricks for killing people. Mattresses that, when a person slept on them, killed them because the heat of their bodies liberated a poisonous gas. That puzzle has something to do with the death of Scotter and the condition of the other man."

"Klein!" Inspector Dowell barked once more, and when the detective came to the door, "The doctor wants to take part of that puzzle away with him." Then to the doctor, "Be careful, Doc. We don't want to lose you."

Through the door Terry watched the doctor slide some pieces of the puzzle onto a newspaper; then he took a blotter and scraped onto the paper some fine white dust that looked like wood powder.

"So as quick as you can," the inspector called after the doctor.

"May I go now?" Terry asked.

"Go where?"

"I'm supposed to report the game for my paper."

"I guess you'll have to miss the game, young fellow."

"Okay." Terry moved to the telephone.

"What's on your mind?" Dowell asked.

"My job."

"Nothing doing."

"But why can't I send out a wire?" Terry objected.

"Because there is nothing to send."

"Gosh, inspector! It's great news for my paper. A famous player is found dead, the cause unknown! Don't you see how it hooks up with these other murders? Craven, a newspaperman, is stricken by the same malady in the room with the dead man. It's tremendous newspaper stuff!"

"Yeah, I know, and it's damned queer how you just happen to be around each time it happens."

"Will you do something for me?" Terry asked.

"What?"

"Wire Detective Kelly at Centre Street, New York, and ask him if it is advisable to hold me. Kelly is the man who has had me under suspicion."

"What does he know about you."

"He has had me covered ever since Dirkin was killed."

"I might, at that," the inspector said reluctantly.

"Give me a break, won't you?" Terry pleaded.

"All right. I'll do it."

"Will you let me go out to the game? Send a man with me, if you like. You can get the press box if you want me before the game is over."

(To Be Continued)

Cunning Outfit

The cunning sleeveless bolero jacket makes this an adorable little outfit for small girls of 2 to 8.

The sash tied at the front gives it a very sophisticated look. However, the toddler, will probably like her dress unbelted. There's a plait right down the front to the flared hem..

The matching French pantees are a welcome addition fo ractive young legs who romp about with their skirts well above the knees.

Cottons as chambray, percale prints, dimities, broadcloths, printed lawns, crepes, etc., are inexpensive and practical for this pretty dress.

Illustrated Sewing Guide accompanies the pattern.

Style No. 3076 is designed for sizes 2, 4, 6 and 8 years. Size 8 requires 2¾ yards of 35-inch material with ⅝ yard of 35-inch contrasting and 3⅜ yards of binding for dress; pantees require 1 yard of 35-inch material.

HOW TO ORDER PATTERNS

Write your name and address plainly giving number and size of pattern wanted. Enclose 15c in stamps or coin (coin preferred), wrap it carefully, and address your order to Wilson Pattern Service, 73 Adelaide St. W., Toronto, Ont.

"Each time the movie audiences start to vanish, everything possible is tried except the idea of offering them better pictures."

Pine Is Tested For Newsprint

To Supply U. S. — American Publishers Fear Canadian Price Boost

NEW YORK—James G. Stahlman, of Nashville, Tenn., told the American Newspaper Publishers' Association last week it is time to bring the newsprint industry back into the United States.

The declaration followed a discussion of increasing cost of newsprint paper, practically all of which is manufactured in Canada.

American publishers have been advised cost of paper will be increased from $43.50 a ton to $50 a ton the first of next year and will be held at that figure at least for the first six months.

Stahlman, vice-president of the A.N.P.A., and chairman of the newsprint committee of the Southern Newspaper Publishers' Association, declared "southern pine offers the opportunity" to restore the industry within the United States. He was expected to be elected president at the concluding session of the discussion.

He said a mill soon will be established in Eastern Texas, to care for the needs of publishers in that state and Oklahoma, Arkansas, and Louisiana. Stahlman said there was hope a similar mill will be put into operation east of the Mississippi River in a southeastern state.

The Nashville publisher declared it would be a good thing to build mills where they would not be "harried by politics and other conditions in Canada."

A new manufacturing process, he said, is being developed through the "bleached sulphate process," the same used in making kraft wrapping paper.

Since January, 1936, Stahlman added $60,000,000 has been invested in kraft units to utilize southern pine, and he explained those same machines, with minor changes, will make a fine grade of newsprint paper.

Stahlman declared "the publishers in this country are coming to the point where they will support, through contracts, any group of capitalists who set up the mills." He said the newsprint paper could be made available to the publishers at cheaper prices than elsewhere.

"When the newsprint industry has moved back within the boundaries of the United States, American publishers will be freed from the domination of Canadian and foreign newsprint interests," he asserted.

Why Is Crime Afraid in Canada

Col. Geary in American Monthly Suggests It Is Uniform Law For Dominion

"Crime's Afraid in Canada," is the heading on an article in The Commentator, an American publication by Col. G. R. Geary, one of Canada's best known lawyers and in The Commentator's summary of the reasons first place is given to—

"One law for the whole Dominion. No extradition. No conflicting laws."

That would probably be the general view, that the fact that the Criminal Code is a Dominion matter and applies alike across the country was the chief reason for the better enforcement of criminal law in this country than in its neighbour. Other reasons include the fact that the judiciary is appointive, not elective and that appeals are dealt with speedily.

The question of uniform laws for the Dominion is one that is now attracting a good deal of attention and with the success of the Criminal Code in mind, it is suggested in some quarters that uniform company laws, uniform wage laws, uniform unemployment insurance, and so on, would make for more satisfactory conditions. But that is by the way.

Recent events have again brought law enforcement in Canada into notice in the United States and the Detroit News says:

"For a long time it has been common opinion that the people of Canada are more lawabiding than are the people of this country. This impression has grown because of numerous incidents but never has it had so clear explanation as in the prompt action of Ontario authorities with reference to strikes in the motor car industry of Canada."

"There is still one place in the world where we can find peace—the heart of a child."

—George Jessel.

Jelly Comes to the Rescue

Perhaps you have always thought that quick-setting jelly could be used only to make glowing dessert dishes or, in a pinch, a molded salad. We are out to discuss that idea and here are some recipes which prove that quick-setting jelly has an infinite variety of uses which will endear it to the hearts of busy homemakers. These packages of jelly in bright colors and various flavors can come to your rescue on numerous occasions when you feel you just can't make a meal out of what is left over and yet you can't throw the scraps away.

Here are two delicious recipes that can form the main course of any meal, company or otherwise, and yet they are so cheaply and easily prepared that it will astonish you. But once you have tasted them, it won't astonish you to find that the family will want them again and again.

Piquant Tongue Mold

1 Package quick-setting lemon jelly, 1 pint warm water, 2½ tablespoons vinegar, 1-8 teaspoon salt, 1 teaspoon scraped onion, 3½ cups boiled tongue—finely chopped, ½ cup dill pickles—finely chopped, ½ cup mayonnaise.

Dissolve jelly in warm water. Add vinegar and salt. Chill until cold and syrupy. Place in bowl of cracked ice or ice water and whip with rotary egg beater until fluffy and thick like whipped cream. Fold in onion, tongue, pickles and mayonnaise. Turn into loaf pan. Chill until firm. Unmold. Garnish with crisp lettuce and radishes. Serves 10.

If you have had chicken on Sunday, then here is the perfect dish for Monday:

Molded Chicken Loaf

1 Package quick-setting lemon jelly, 2 cups warm chicken stock, free from fat, ½ cup chicken—cut in small pieces, ½ cup celery—finely chopped, ¼ cup green pepper—finely chopped, 1 teaspoon scraped onion, 2 tablespoons pimento—finely chopped, 2 tablespoons vinegar, ½ teaspoon salt, ¼ cup stuffed olives —chopped, dash of cayenne, dash of Worcestershire sauce.

Dissolve jelly in warm stock. Chill. Combine remaining ingredients. When jelly is slightly thickened, fold in chicken mixture. Turn into loaf pan Chill until firm. Unmold. Serve on lettuce. Or mold in ring mold and serve as salad garnished with mayonnaise. Serves 8.

The Tempting Omelet

There is nothing terrifying about attempting an omelet.

Omelet-making is not an overcrowded profession, and any one showing marked gifts in that direction is credited with a skill amounting almost to wizardry.

Catch hold of this frying pan. It is a thick iron one and is kept exclusively for the making of omelets. It is not washed after use, but is simply wiped clean with a cloth or tissue paper.

Its bottom is perfectly flat so that it cannot reel about on the stove or over whatever heat you let is going to be cooked on must be hot and the hot, because speed is the good omelet-making.

Slow cooking

For this reason, do not eggs into the pan the thinnish layer on the

A Plain Omelet

Since the plain omelet of a thousand others, one.

Let the pan get hot it a piece of butter melted, will do to cover the bottom of the eggs is a handy rule tice on. Break them and beat them just the yolks and the seasoning of pepper and

A teaspoon chopped also go into the bowl, into the pan and let evenly over it.

Shake the pan very sharply and evenly, and when part of the omelet starts ing onto the edges with a bit more liquid, upper part below.

Serve at Once

Before the middle is fold the omelet over and carefully slide it onto a hot dish.

Serve it instantly, other faux pas you like keep an omelet waiting.

After all, it has not waiting, for an omelet ic. Two or three minutes whole trick.

Summary of the News

Health Tests Are Prescribed by Doctor

TORONTO—That the time will come in Canada when every adult will be subjected to a comprehensive medical health examination periodically was the view expressed Friday by Dr. R. J. Brooks. In the meantime, arguments in favor of voluntary examinations were advanced by the doctor before the Council of Toronto Branch, Health League of Canada, meeting at the Central Y.M.C.A.

Cow Adopts Tactics of C.I.O.

TUGASKE, Sask.—The most unusual sit-downer in Canada is a cow, owned by J. Moore, farmer in this district, 90 miles from Regina, said the other day. He took a fresh cow to this village and it refused to give any milk. Later it wouldn't eat and eventually sat down on the job. When returned to the farm the cow put away a good meal.

Relief Grant Reduced

TORONTO—The Federal grant-in-aid to the Province of Ontario for direct relief has been reduced from $4,000,000 to $600,000, Premier Mitchell Hepburn announced Friday. The cut will be effective from July 1 to July 1.

Relief payments in the Province will not suffer because of the reduction, The Provincial Government will continue existing financial arrangements with the municipalities.

Provincial Cabinet Wear Dignified Garments

VANCOUVER—Lawyers here will wear dignity. They will wear grey flannel trousers when appearing before the courts, an announcement

Lumbermen Hopeful

Lumbermen Parmers of Peel are hopeful of abundant crops with the favorable weather of the past week. If all wheat crops and other crops are promising, they say, the seeding can be accomplished in the next week, with probability of catching up with the late season. W. A. Fraser, lumber inspector for the province, issued warnings that all logs must be plowed under by May 20.

Toronto Flood Curb

TORONTO.—With acres of land still low by floods, Thomas Bench of the Engineering Department of Canada will, at its next meeting, give some consideration to the problem of district streams.

A paper on the subject was arranged some time ago by the disaster broke. Mr. Archibald was billed to speak on "Flood Control of Canadian Streams."

Mining and Industry

A mill will be erected in Gerald T. Shipman, Co., Timmins, Ont., at cost of $600,000, it was revealed in a survey of mining industry for the week.

Other spots include:

Espesia Sulphite Company is preparing to re-open the pulp mill within three months.

B.—A $100,000 plant for manufacture of cement will be built by the Canada Cement Company.

—Boyles Bros. Drilling Co. will construct a $20,000 shop and will manufacture drills for the mining industry.

—Wage increases affecting 2,800 employees are announced by two paper companies, the Spanish Paper Corporation and the International Paper Company.

—Beginning this week the Westinghouse Company will operate a 44-hour week with overtime paid for the 48-hour week.

—The Canadian Copper Refiners increased wages by five cents an hour for 350 employees.

—About 300 men are employed at Lake Sulphite Pulp Mills on construction of the new pulp mill near Nipigon and will be employed in the completion of the mill by mid-summer.

Pact Is Signed

TORONTO—After two extended sessions Louis Fine, chief conciliation officer of the Ontario Department of Labor, announced that an agreement had been reached between McKinnon Industries, St. Catharines, and the company's employees. This agreement is substantially along the general lines of the Oshawa and Windsor General Motors' agreements, with special provisions as to wages and hours for the St. Catharines plant.

Mr. Fine sat in at two sessions during which the terms of the agreement were reached. It now awaits approval of a general meeting. The company was represented at the hearing by Harry Carmichael and W. A. Wecker, general manager of the plant. The employees were represented by J. L. Cohen and a negotiating committee.

Hamilton Firm Given $150,000 Kingston Job

KINGSTON — Contract for the erection of the new Craine biochemistry building at Queen's University, to cost about $150,000, has been awarded to Fred Construction Company of Hamilton. The new building is made possible by the bequest of the late Dr. Craine of Smiths Falls, one of the first women medical graduates of Queen's, who willed more than $300,000 to the university.

Dairy Fined 16 Times

MONTREAL. — Sixteenth conviction in a year was registered this week against Laiterie Perfection for selling milk below the price set by the Dairy Commission Act. The dairy was fined $200 for selling three quarts and two pints of milk for forty cents, two cents below the set price.

Married Half Century

BRAMPTON. — This week marked the golden wedding anniversary of the wedding of Mr. and Mrs. James Stephens, who, since their marriage in Newcastle, England, have been residents of Brampton. Both were born near Liskeard in Cornwall, and both are 79.

As a young man working near Newcastle, Mr. Stephens became dissatisfied with the wages he was receiving, and decided to leave the Old Country for Canada. Mary Ann Husband joined him. They were married and left within several days for Brampton, where the groom's elder brother had already found himself a home.

Symptoms in Pupils Reveal Mental Cases

SMITHS FALLS.—Addressing an audience of more than 200 here, Dr. F. A. Jones, principal of the Ottawa Normal school, declared that much of the mental illness existing today might be averted, through the recognition by teachers of symptoms in the pupils in their classes.

Dr. Jones mentioned the seclusive pupil as an example. In these cases steps should be taken by parents and teachers to investigate conditions. Otherwise, he said, the child might eventually become a suicide.

The speaker said boys and girls of today were fully as wholesome and as intelligent as their parents. He spoke of education as "big business", pointing out that 140 million dollars was spent annually in Canada in teaching the young.

Quirks of the Flood

Anticipating the collapse of the Thames Street bridge in Ingersoll, a South Side baker made extra deliveries to the North Side Tuesday on night. In the middle of the night the bridge was swept away and his competitors were cut off from their customers in the morning.

In flood-ravaged Tillsonburg, where damage was estimated at $100,000 and waters surged through the business streets, Robert Hambleton, a theatre manager, took out a $25,000 building permit. He planned to erect new stores and apartment houses.

Forty-eight thousand eggs in a chick hatchery were spoiled at Dunnville when high water interrupted the Hydro power. The eggs were in electric incubators.

After the trestle was erected 50 carloads of cinders were dumped in to make a 12-foot fill.

Over this trestle the Chicago-Montreal train, due in Toronto at 3.45 a.m., passed in safety and the main line traffic resumed.

160-Foot Trestle Built in 18 Hours

TORONTO. — The C.N.R. main line between London and Toronto is open again after having been blocked by a washout and train wreck at Beachville which took the lives of the train's engineer and fireman.

Working at top speed to clear the line, railway construction crews accomplished the surprising feat of building a trestle 100 feet long in 18 hours. It replaces the washed out section at Beachville.

SPORT TODAY

By KEN EDWARDS

Well, it looks like old "Diz" Dean has closed his front door for a while to sing his sarcastic theme song—"A hit is as good as a mile".

What, No hits! Dean has pitched 19 innings in a row into the teeth of Cincinnati and Chicago heavy hitting machines and now we catch them chanting "Gone with the wind".

Not a run in 19 innings and 10 Cubs struck out — nix wotk Diz.

Records show that Syracuse has one of the largest golds in the International league. It is 335 feet from the home plate to right fence, 335 to left, and 462 to centre.

Did you know that in 1887 George Stovey, pitcher, won 35 games for Newark?

Incidentally in 1923 "Lefty" Grove struck out 330 batters for Baltimore.

Coming back to earth and canvas we mention a strong man in the "knotty" game called "wrassiln".

Cliff "Swede" Olson is pretty new to these sports both Jack Corcoran always makes 'em feel so at home here that they don't want to leave.

Olson is mighty speedy and packs many a thrill. He says his real hobbies are golf and driving a car — alone.

If he is in California and is matched to fight in New York or any point south of the Yukon, he'll start out in his car and arrive in his car — such is Clifford "Swede" Olson.

Just to boost your spirits — we hear that Dean Detton, world's champ, will be here in a few weeks.

We'll be with ya.

Peasant Mayor Will Officiate

Looks Forward To Windsor-Simpson Ceremony

MONTS, France. — The peasant Mayor of Montes, Jean Mercier, who always lectures newlyweds on the importance of big families, Sunday said he had been asked to officiate at the wedding of the Duke of Windsor aond Mrs. Wallis Simpson.

Edward, who is expected here Tuesday afternoon to join Mrs. Simpson at the Chateau de Cande, will have the "last word" in the wedding arrangements, but Mayor Mercier already has been approached regarding the ceremony.

"I have been planning to retire from politics for some time, so this will be the climax of my career," said the Mayor.

The Mayor refused to discuss the wedding "speech" which he will deliver after Edward and Mrs. Simpson have given their answers to the ten-minute French civil ceremony. But he is known throughout Northern France for his eloquent and lengthy marriage sermons.

The Chateau de Cande bustled with activity tonight when Mrs. Simpson's host, Charles Bedaux, returned from Paris to join in preparations for Edward's arrival.

French Secret Police have made arrangements for the Duke of Windsor to travel inconspicuously across France from his retreat at St. Wolfgank, Austria. He will board the Orient Empress in Austria, but, somewhere between the French frontier and Paris, he will detrain and proceed to Monts by automobile.

It was expected that he would avoid Paris, travelling to the Touraine region by way of Orleans.

A staff of gardeners has put the chateau's golf course in tip-top shape and Edward is expected to play with Herman L. Rogers, Mrs. Simpson's champion at Monts and her host at Cannes on the French Riviera.

Mash Used To Mend Boilers

Retired Male Employees Reminisce on Duties Of Old Engineers

WINNIPEG. — Memories of days when railroading was young and the duties of an engineer ranged from the trimming of wicks of coal oil headlights to patching blown boilers with bran mash, were revived here when 200 retired employees met as guests at the Annual Canadian Pacific Association dinner.

Veteran "Bill" Edwards, old-time engineer, fondly recalled the celebration that marked the arrival of the "Countess of Dufferin." Winnipeg's first engine, when she steamed into the growing town — by boat. The "Countess" was shipped by sternwheeler from Fargo, North Dakota, as tracks from the east had not yet been laid into Winnipeg.

Shipment of troops to suppress the Riel rebellion in Saskatchewan saw the arrival of the first "through" train from Montreal, in 1885, but even then the militia were forced to march over a 100-mile stretch still uncompleted somewhere east of Winnipeg.

STARTING NEXT WEEK

NEWS ON PARADE

Commencing next week you will find on this page a line new feature entitled "News on Parade." It will consist of comment on the highlights of the week's news. It will not be just another news review but a snappy commentary on the outstanding happenings of the week, the events, the goings and comings that make current history. The commentator will range around the world for his material. He will go here, there, and everywhere, but Canada and Ontario will have the preference. "News on Parade" will be interesting, informative, entertaining, a column that you will look for each week and read with thorough enjoyment. Watch for it!

Yukon Protests B. C. Annexation

No Confidence in Province Says Council — Sentiment of Territory Described as Overwhelmingly Opposed To Change

DAWSON, Y.T.—Declaring it had "no confidence" in the financial ability of British Columbia to take over administration of the Yukon Territory, the Yukon Council Friday passed a resolution protesting the proposed annexation of this northern territory by the coast province.

A memorial expressing this opposition will be sent the Governal-General-in-Council.

Breaking a silence maintained since Monday, when Premier Patullo of British Columbia announced an agreement had been reached with the Federal Government whereby the Yukon would be merged with British Columbia, the council of three elected members passed the resolution "firmly and emphatically" protesting the proposal.

The council urged that the people of the Yukon be given a chance through plebiscite to vote on the matter. The annexation would be a "violation of their democratic rights as Canadian citizens" unless their approval was first obtained, the council said.

The council expressed the opinion that British Columbia laws were in many ways fundamentally unsuited to the needs of the Yukon, and that their introduction would mean an "unsettling of capital."

"Sentiment in the territory is overwhelmingly opposed to the change," the council declared.

Tree May Be Focal Point in Garden

Of Suitable Size and Form, It Sets Scale For Planting

In choosing a focal point of interest in the garden — which may be a piece of statuary or some other such structural unit — a single tree, arching its boughs over it, will suffice as a complement of green that will lend warmth to the static ornament. And so a simple, pleasing composition is evolved.

There is hardly another single unit of living interest that will do as much for a layout as a single tree that is well placed. It must be of suitable variety, size and forms, for it gives and fixes a "scale" for the entire planting. It frames views, it casts a shadow, varying with the movement of the sun; and lastly, its silhouette against the sky adds a quality of enchantment.

The unit next in importance may well be the plane, or floor; and for this a fine green carpet of grass surely gives much comfort to the eye and a fine blending colour for adjacent units. The grass and the tree are in themselves not a garden. They are to be surrounded with an enclure, either a wall of structural material or a hedge of living green. Privacy is thus provided. Within this sanctum the designer paints a picture or several pictures, according to his fancy.

Furnace Is Safe From Lighting

MONTREAL, — The furnace is the place to go to be safe from lightning, according to K. B. McEachron, research engineer, addressing the Electrical Club here. Completely surrounded by metal, a human would be safe from a stroke of lightning and, a a rule, the only spot in the home where he, or she, could be so encased would be inside the furnace, he explained.

"This may sound facetious," he said, "but it was the conclusion that was reached by a conference of electrical engineers." Now that automobile bodies were made of steel they too afforded safety, though, he warned, it would be unwise to get out to change a tire. The popular notion that rubber-soled shoes acted as a safeguard was unfounded for "if the lightning has enough power what does a quarter of an inch of rubber amount to," Mr. McEachron pointed out.

When a thunderstorm bursts the things to avoid are sitting on radiators or on the edge of a bed, he said, the point being that the human body must not be so placed as to intercept the charge in its course to conductors of electricity.

Made 60,000 Motorcycles For British During War

BRISTOL, Eng. — William Douglas, founder of the Douglas Motorcycle Company, one of the largest in Great Britain, died recently at the age of 78 years. He supplied the British army with 60,000 motorcycles during the world war.
