Highlanders Assassinated
JERUSALEM—Two soldiers of the Black Watch (Royal Highland Regiment) were shot to death by an Arab as they stroked off duty along Jerusalem's main street.

It was the most serious attack on Britons in Palestine since Lewis and Clark Andrews, District Commissioner for Galilee, and his bodyguard were murdered on Sept. 25 at Nazareth. Tension in the Holy Land increased as authorities grimly hunted the Arab assassin and an accomplice, who made a successful escape.

Early Session Likely
TORONTO—Rumor that the Provincial Government has been considering the holding of a special session of the Legislature or at least the early calling of the regular session, which would normally be held late in January or early in February, to deal with the situation, was strengthened this week-end when officials refused to make any comment whatever on the suggestion.

For three years in succession, Timbers and his tractor, equipped with First-Season Grand Tractor Tires, have won the championship and now retain permanent custody of the Championship cup. Attended by 115,000 farmers, over seventy tractors competed in the field at one time during the International Plowing Match held at Fergus, Ontario, from October 12th to 15th. Only six tractors were on steel-tired wheels, the remainder being rubber-tired, which reflects the tremendous growth of pneumatic tires for tractors since they were introduced at the Ottawa Match in 1935.

THE NEWS INTERPRETER

A Commentary On the More Important Events of the Week.
By ELIZABETH EDDY

TRIPLE ALLIANCE: The Soviet Government newspaper, Izvestia, intimates that the three countries of the world, definitely Fascist (Italy, Japan and Germany), are preparing to join in a triple alliance against Communism, and that "the agreement among the aggressors means a program of war." A program of war, in other words, in which capitalism will fight communism, and belief be pitted against belief. As George Bernard Shaw expressed it this week, "What is threatening us today is a war like the wars of religion in the seventeenth century."

SLUM CLEARANCE: Of December all Toronto owners will have a chance to demolish the slums in the demolition of the city and in the construction of housing for lower-income groups. Dr. Bruce's anti-slum clearance a year or so ago, together things done. That is one side of the story. The other is the problem of the poor. It is a right direction but a great deal more to be done. The city has a right to be proud of the results but it is a long way from being a slum-free city. The city has a right to be proud of the results but it is a long way from being a slum-free city.

DOMINION STATUS: As soon as Newfoundland can manage to pull itself out of financial difficulties, the island will return to Dominion status. The Secretary, Malcolm Macdonald, assured the British House last week. It will be remembered that Newfoundland has been under a Commission Government since the depression more or less wrecked its industries. But during the past summer, logging and mining have picked up, and a general quickening of economic activity is reflected in the figures released. It may not be long, then, before Newfoundland once more becomes a Dominion.

COMMERCIAL RECOGNITION: Britain has concluded a trade agreement with insurgent Spain. Although such a move is "purely a commercial affair" and does not involve diplomatic recognition, it cannot be denied that Britain has at least admitted the existence of General Franco's Government. "Diplomatic recognition" and the exchange of ambassadors will not doubt follow. The British Government has never actually championed the cause of the Spanish Loyalists, hence this latest move is a consequence of a sudden reversal of policy.

BIBLES UP: Due to the rising cost of paper and other materials, the price of Bibles printed in England has gone up sixteen per cent.

A BREAK FOR OLD OTTARIO: The departure of many farmers in the West from drought-stricken areas is expected to result in a boom for Old Ontario farmhands. Some of these men with their families are the cream of the country, of solid character, progressive outlook. Those who have come through the lean years with a whole skin, a few cattle and a little money are prepared to dig in and

try, grain and potatoes. These are the specialists chosen at preliminary contests which have been held in the provinces at various dates since September 1st. The contests are arranged by the Canadian Council on Boys' and Girls' Club Work, a body with Ottawa headquarters sponsored by a number of agricultural interests, and having in the nine provinces a total membership of over 35,000 boys and girls.

Club teams of two members each arriving in Toronto on Sunday, November 14, guests of the Council will be educationally entertained while in the city and taken for inspection tours of several industrial plants. These competitions on the day preceding the Royal Winter Fair opening have for some years been a popular feature of its junior agricultural work.

Boy and Girl Finalists Will Meet at the Winter Fair, Toronto, in Judging Competitions.

Sixty-two boys and girls, members of local clubs all over Canada, are to meet at the Royal Winter Fair at mid-month in judging competitions covering dairy and beef cattle, swine, poultry, grain and potatoes. Alleged WIT

Now follows a better way to prepare for the morrow. All of us are always going to do better tomorrow, and we would, too, if only we started today.

Five-year-old Billy was talking to his Aunt Mary. She said, "Well, Billy, I suppose you'll start to school next year." "Oh, no, auntie," replied the boy. "What would I do in school—I can't even read or write!"

An Englishman visiting an American lake asked a native if the place was good for fishing. "Sure, stranger," replied the American. "What kind of fish?" "Oh, all kinds, stranger." "What did the largest fish you ever caught weigh?"

"Well, stranger, we don't take weighing machines when we go fishing, and I'm an honest man and would not lie to you. I caught a fish, but when I pulled it fish out of the water, the lake went down a foot."

Two wives were discussing their respective husbands over a cup of tea. The first complained that her husband was a poor fisherman. "Well, my dear," said her friend, "for years I wondered where my husband was spending his evenings. And then one night I reached home early—and there he was!"

There is, just now, quite an argument among those who study the brain and nerves, about worry. Surprising as it may seem, there are high authorities on the subject who say a certain amount of worry is a good thing. This depends upon what is understood by worry. If it is a mere nervous anxiety, it is bad. If it is more of a calm effort to figure out one's troubles and seek to find a remedy, it is of course, a good thing.

A friend of ours believes it is perfectly alright for the government to spend a million dollars before breakfast, but thinks it is a terrible squandering of money for the city board to spend \$4,000 over a period of years for gravelling the streets.

They were entertaining friends in their new house. Suddenly one of the guests sat up and listened. "Surely you are not troubled by mice already?" she said. "That's not mice," replied the hostess.

There is a bank in London, England, which has in its vaults a collection of all the deadly poisons known to the Borgias, the famous Italian poisoners.

They have been placed there for safety by a woman who is afraid they may get into the hands of the wrong people.

She is Miss Kitty Shannon, novelist daughter of the late Sir James Shannon, the famous R. A.

When she decided to write her sixth novel—about the Borgias—Miss Shannon went to Italy to hunt up the poisons they used for inclusion in the book.

Miss Shannon told the "Daily Sketch" "I advertised in a Rome paper for somebody who knew the recipes."

"Police and Chemists" "That I had a visit from police officials, but I was able to reassure them that I had no evil intentions."

"Then I had a visit from a chemist; in fact one of his ancestors had prepared poisons for the Borgias. He gave me the recipes for ten different poisons."

Simple Recipes "I was appalled by the simplicity of some of them. One, which I dare not reveal, is so simple that it can be prepared from tanning down three different weeds that you treat under any time you go for a country walk. One drop of it will kill you in about fifteen minutes."

"And now there is a little difficulty over my book. The poison recipes were to have been included in it, but the publisher is also nervous. 'So some of the Borgias poisons will have to remain secret. They will stay at the bank until I destroy them. They are too big a responsibility.'"

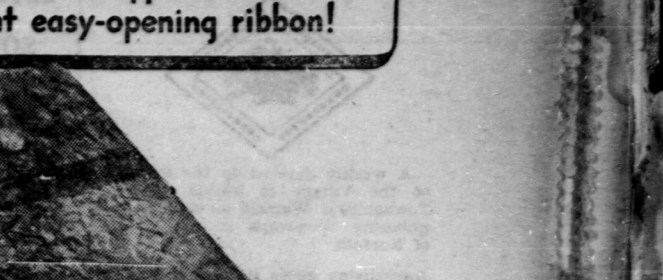

WOMEN WHO SUFFER
The quick way to alkalize is this: Take two teaspoons of Phillips' Milk of Magnesia 30 minutes after eating and drinking. Or, when among others—take two teaspoons of Phillips' Tablets that come in a small flat tin you carry in purse or vest pocket—You do it unthought.

Relief is almost immediate. Get nausea, acid breath and other offensive symptoms leave. That "stuffed" feeling and pains from acid indigestion" cease to annoy. You feel great.

This is the way, we believe, among others, when any other when alkalizing upset stomach.

There will be no references to convicts or bushrangers in the pageantry with which Australia will depict its history in its 150th anniversary celebration next year. The ministry in charge has decided that the pageants shall not depict the sunny side. Others, however, do not agree.

"To stage a present of the building from the first fleet, and exclude any suggestion of convicts, when the only reason for sending the ships was to establish a convict settlement, is absurd. In any pageant which attempts to portray the development of our national history, simply because to some people it does not seem quite 'nice,' would be good evidence to the civilized world that we are no more than sentimental barbarians," said H. M. Greene, Sydney University librarian and authority on early Australia.
