Bolt Kills Cow, Sets Fire, Misses Woman

FERGUS.—Struck by lightning, the barn of F. Flewelling, concession six, Peel Township, two miles south of Arthur, was destroyed by fire. The season's crop of hay and grain, a number of implements, a cow and a calf were lost in the blaze.

Mrs. Flewelling had finished milking a few minutes before the bolt struck. She was leading a cow out of the barn, and the cow was killed but the woman escaped injury.

Rare Weed Found Near Stratford

TORONTO—J. D. MacLeod, of the crops, seeds and weeds branch of the Ontario Agricultural Department, reports he discovered a rare weed along the Canadian National Railways tracks in Stratford. Mr. MacLeod, who said he had not seen the weed in any place this year, sent it to Ottawa for identification.

The weed is known as the "Hawk's Beard." One plant sent to Ottawa had 45 stems. It throws off seed like a dandelion.

Stuff and Nonsense

A visitor at the insane asylum was watching one of the inmates pushing a wheelbarrow upside down.

Visitor—"That's not the way to push that thing. You've got it upside down."

Lunatic—"Oh, have I? I used to push it the other way, and they put bricks in it."

Friend—"See that fellow giving invitations over there? What does he always remind you of?"

Man—"The $10 I owe him."

Mr. Wise was evidently not feeling in the jolliest of moods. "Just look at that notice," he said, indicating the words "Post No Bills" on a blank wall, near the business section of his good city. "What is the use of sticking that up there?" he continued. "Why don't they put these things in the right place?"

"Where would you put it?" asked his friend.

"Over every letter box in the country," was the candid reply.

Mrs. A.—"Hunnie has been in the third grade for two years. I wonder how he will ever get ahead?"

Mr. A.—"Don't know. If he wasn't born with one, he never will."

A Prayer!

"May every soul that touches mine,
Be it the slightest contact,
Get therefrom some good,
Some little grace, one kindly thought,
One aspiration yet unfelt, one bit of courage
For the darkening sky, one gleam of faith
To brace the thickening ills of life.
One glimpse of brighter sky beyond the gathering mist,
To make this life worth while,
And heaven a heritage."

A free country is one that doesn't let any political or social group have things entirely its own way.

Harris—"When the house-wreckers tore down Brown's house they found a collar button he had lost twelve years ago."

Kramer—"I'd think it would have been cheaper for him to have bought another collar button.

We'd rather listen to the story of a public haunter than hear the details of an unsuccessful speculation in real estate.

No man is so ignorant that he doesn't know what he would do if he were in your place.

Mrs. Robert Katz telephoned her husband that she would call for him at the office. Not finding him there, she looked in at the barber's shop on the floor beneath.

"Bob Katz here?" she asked.

"No, madam," replied the indignant barber. "We certainly do not bob cats here."

It is because there are so many fools in the world that the wise man gets an occasional break.

If you would know the value of health go try to buy yourself some.

TIRES

MENZIE'S USED TIRES $2.95 UP for Ford, Chevrolet, Plymouth Dodge, Buick, Oldsmobile, Packard, Cadillac and all other cars and trucks. Every tire guaranteed. 190 King West, Toronto.

Six Months' Trade Best Since 1930

Canadian Exchange of Goods With U.S. Also Most Active In Seven Years

OTTAWA.—Canada's total trade in the first six months of 1937 was higher than in any corresponding period since 1930, the Dominion Bureau of Statistics reported this week.

The total was $907,000,000 compared with $718,000,000 in the same period of 1936; $612,000,000 in 1935; $598,000,000 in 1934; $404,000,000 in 1933; $498,000,000 in 1932; $654,000,000 in 1931, and $991,000,000 in 1930.

The exchange of goods between Canada and the United States in the six months reached the highest point since 1930, amounting to $475,175,000 compared with $349,523,000 in 1936; $317,472,000 in 1935; $292,678,000 in 1934; $150,974,000 in 1933; $268,053,000 in 1932; $373,646,000 in 1931, and $536,928,000 in 1930.

Trade with the United Kingdom made the best showing since 1929, when the total was $218,356,000. The total in the first six months of 1937 was $246,247,000 compared with $215,548,000 in 1936; $169,948,000 in 1935; $154,378,000 in 1934; $128,606,000 in 1933; $108,340,000 in 1932; $128,185,000 in 1931, and $172,719,000 in 1930.

$1,000,000 To Fight Disease

PITTSBURGH, Pa. — A woman who nursed a brother afflicted with diabetes for 20 years, gave $1,000,000 for a "never-ending war" against the disease in children. Miss Emelie Renziehausen placed the money in an irrevocable trust fund as a memorial to two dead bachelor brothers, Frederick C., who once owned the Large Distilling Company, and Henry, a dry goods dealer in suburban McKeesport.

Same Couple Thrice Married and Divorced

WORCESTER, Mass.—There was quite a bit of "maybe" about Mrs. Mae M. Hall. She divorced and married the same man three times within 10 years.

Her first divorce was granted eight years ago. She remarried her former husband.

In 1931 she was divorced, and two years later Hall again "popped" the question.

Mrs. Hall says that the last time he married her for "spite" and she divorced him again.

Plant Peonies In September

Peonies should be planted in September. Dig the bed two feet deep, remove stones and other trash, and mix in plenty of well decayed stable manure. The soil should be allowed to settle for at least two weeks, and more compost added if necessary. When planting, have the buds only an inch below the surface of the soil.

Cheese Exports To U.K.

The principal market for Canadian cheese is the United Kingdom. Canada increased her cheese exports to Britain in 1936 by 29 per cent. However, these exports to Britain comprised only 83 per cent of the total Canadian cheese shipments as against 95 per cent in 1935, Canada having supplied the United States in 1936 with 100,000 cwts. of cheese as against 4,000 cwts. in 1935.

Veteran Locomotive Valuable

GANANOQUE, Ont.—The 55-year-old locomotive of the Thousand Islands Railway Company has been sold to a Kingston firm for scrap. Number 44—out of commission for several years—will be dismantled where she stands and carried ignominously to Kingston by truck.

Slump Expected In Meat Price

Consumers Are Likely to Benefit This Fall

CHICAGO.—Meat consumers' pocketbooks, now being burned by last year's drought, may get substantial relief before the year ends, livestock market diagnoses indicated this week.

Recent declines in wholesale pork prices, market experts said, may presage lower meat costs soon for retail buyers.

White figures on butcher shop windows throughout the nation disclose prices of some beef and pork cuts are the highest in seven years or more. Material reduction in prices, market observers agreed, depended upon increased receipts at slaughtering centres this fall and winter.

Although it has been a year since the broiling sun was burning up livestock feed and rains since have drenched the grain belt, the full financial effect of the drought just now is being felt in the city. Last week prices of hogs and cattle were highest in eleven and nine years, respectively. Chicago retail meat prices, representative of many sections of the nation, accordingly have risen 12 to 31 per cent for beef, 14 to 35 per cent for lamb and 6 to 35 per cent for pork since the first of the year.

DIXIE Plug is fresh when you buy it. It is cellophane-wrapped with the easy-opening ribbon for your convenience.

DIXIE

SLICED VERY THIN . . "No Matter How Thin You Slice It's Still Baloney"
By SIXBITS

What seems to be the crying need in sports circles is that would seem to be some sort of a school or educational cam fight judges and referees so that there could be a little harmony in their decisions.

* * *

When, in an important tangle like the Farr-Louis affa the referee scoring only two rounds for the Welshman, alleged experts gave him as many as six or seven, it would seem as if they hadn't all learned out of the same book.

* * *

We don't think that Farr won the fight—his own admission that Louis had been the better being pretty conclusive. McCarthy's vision doesn't need plenty of sharpening when a whole lot closer than any thirteen to two.

* * *

However, Mr. Farr did real well for himself—much better was expected by anybody excepting, possibly, himself. A similar position to the lucky gent who fell down the well up with a gold watch and chain; and if he only watches he not need to worry about ever having to go back to the tent shows either.

* * *

If Tommy only packed a wallop in keeping with his fighting spirit he would be champion of the world right now. As far as we know, nobody has yet tried to claim that Joe Louis or Harry Blood for some reason or other.

* * *

But Farr seems to lack that old lethal larrup with which seems a pity, although it is perhaps too much to expect perfection from any mortal.

* * *

Like the ancient one about the two street sweepers standing talking about one of their former confrere who recently passed on to his reward.

* * *

"Poor Mike," s ghed one. "'Tis certainly a pity. He to swing a mean broom."

* * *

"He did that," replied the other. "And yet, on sometimes thought that Mike's technique was just a bit he lamp-posts."

* * *

As far as the great election brawl is concerned—well, feeling seems to be to echo the one President Roosevelt the Immortal William—"a plague on both your houses."

* * *

It's too hot and there are too many other things to for most people to bother their heads over an election can see any real reason for holding; and the electors taking the attitude of strict impartiality shown by the watching her husband fighting a bead. "Go it Frahan—

* * *

But from the financial statistics being published by both a des it would seem as if there was still a lot of old saying, "Figures don't lie—but some liars certainly do

Mahatma Ghandi Advised To Rest

BOMBAY, India.—Mohandas K. Gandhi, leader of the Indian nationalist movement, this week was advised by his physician to take a complete rest. He was found to be suffering from high blood pressure.

From 1924 until early this year Gandhi, still the mahatma, or "great soued," to the Indian masses, was in retirement. He emerged on the eve of India-wide legislative elections, however, and recently has been active in the cause of freedom from the British Empire.

The most striking difference between the modern comic strip and those of the earlier period is the use of continuity. Modern strips weave serial stories about their characters; in former years each day's story depended upon a gag or a violent bit of action.

News in Brief

CANADA

Action Most Follow
Royal Commission on public provincial relations, headed W. Rowell, will probably down a valuable report. Due to the country will depend to what action is taken on it. Those we feel, are rather tired and restless in facing big which has marked the trouble railway and other problems Financial Times.

Forest Folk Wanted
Minister of Quebec declares Province a forestry population, to live and grow up in the in contrast to the exploiters wealth. It is a statesmanlike tion, the cornerstone of and stability.—St. Catharines Standard.

Achievement
country with not more than population exports its products the tune of almost $100,000 single month. It seems to us to be considered somewhat an achievement. Think of what it would be accomplishing, if abroad, if our population were nearer what it is now 28,000,000.—Windsor Star.

Time Takes Time
Canadians, the formula for dictator requires only an ing a march on Rome or coup putsch. Actually, those merely the climax of a long period of secret diplomacy, a covert seige and promising, of dodging with loopholes in the law.—Vancouver Sun.

Scientific Investigation
are ready to make any reasonable contribution to any scheme to aid Canada as a whole. It is a spirit of sympathy for the present difficult circumstances merely to consider embarking on bold and uncharted ocean here in view of the sad past. There is no object in pooling the drought and on a small scale, for it is a huge one, that it is imperative that legislation and caution are enthusiasm be applied.—London Free Press.

Gold's Wild Asses
Carried by men in an automobiles of the Gobi desert at an average speed of 30 miles for 16 miles. In Ontario we can do better than that on some motor cars. — St. Thomas Journal.

Products Down
Canada is generally one of the lowest production of maple syrup and maple sugar.—Free Press.

Tests for Drivers
Canada wouldn't be driving anyway if they had to pass a test, too. — Stratford Beacon.

Down Coming
Here's warning that Canada must prepare for the end of the boom or not the voice of a single man of vision are looking about the cost, realizing that such prosperity invariably comes. There is no cause for any depression that when the figures on armaments appear to be a let-down in general production, but reason for anticipating it.—Toronto Globe and Mail.

Native Fruit
Since the invasion of Canada by Baron Tweedsmuir, Governor General, has opened the doors to something, the wonderful Canadian blueberry and cranberry pie, something peculiar about the blueberry, which never so strikingly in one stands kneedeep with a sea of the blueberry and rebut labor to pick, Times-Journal.

Need Enquiry
necessity of such an action and provincial is seen. There has been a long need of bringthe financial and adjustments between Confederation. There are increases in the individual provinces. In the West there has the incidence of taxservice. The financial Western provinces in recent years unable to carry from the Dominion.

THE EMPIRE

Changing China

A mighty spiritual revival, more than anything else in my opinion, is drawing the people of China closer and closed together in the great cause of a united and unified nation. In every school, college and university; in every factory and business house, in the villages and in the great cities, the gospel of the New Life Movement is being preached with a fervour and persistency which has reached the apex of a grand crusade for China's national renaissance. It is a movement unique in the history of the world; it constitutes an inspiring example to the materialistic West. That is one of the many lessons which China can teach the world. — Hong Kong Press.

Up to the Individual

Road casualty lists are remorseless seers. It is forecast that in the coming holiday week at least 160 people will be killed on the roads of Great Britain. More than 5,000 will be injured. These were the figures for the same week last year. It is unhappily probable that this week they will be equalled, if not exceeded. New regulations and safer roads may or may not in the future check this grim figure, but the problem will be tackled with success only if every man and woman contributes personally in caution to the joint efforts that are being made. If you knew that in the coming week a major disaster which was to cost 150 lives was regarded as inevitable, you would ask why someone was not doing something about it. What are you doing about road accidents? Be extra careful yourself. You cannot have a spectacular result for your efforts, but you will have the satisfaction of knowing that each day you are doing your best to save those 150 lives that are menaced. After all, one might be your own.—London Sunday Dispatch.

Outstanding Golf Stylist Entered

Canadian Open Championship Tournament to be Exciting Event

Ed. Dudley

The entry of one of the outstanding stylists of golf, Big Ed. Dudley, has been received for the Canadian Open Championship, and the news that the Georgian will be among those present in the 72-hole struggle for the Seagram Gold Cup at St. Andrew's on September 9, 10, and 11, will be most welcome to those who like to see low scoring with the minimum of effort. During the winter months Dudley is pro at the Augusta National Links, where the annual Masters' tourney is played, while in the summer he is at the Philadelphia Country Club and this year he has the job of being captain of the P.G.A. and chairman of the committee that makes the selection of the international teams. He represented the U.S.P.G.A. in the negotiations for the international team match at St Andrew's on Sept. 7th.

He does not compete in as many tournaments as most of the other leading pros, but whenever he tees off he is classed among those to beat for the laurels and here. In the recent U.S. open he tied for the lead at the end of the first and second rounds and was setting the pace after 54 holes, but he broke at the 8th in the final round and finished fifth. He was third in the Masters' tourney, behind Byron Nelson and Ralph Guldahl. By his fellow pros, he is classed as the most under rated pro. in the big time and is long over due to win a big championship. He is generally in the prize money and if he devoted more time to tournament play and less to club duties, he would be among the biggest money winners of any season.

He first made his appearance in the Canadian open in 1930, when he finished ninth and since then he has placed in the money four times, third in 1931, fourth in 1932, third in 1935, and seventh last year. He is older than most of his rivals, but can be included in the half dozen or so favored to win the Seagram gold cup.

Summary of the News

August Heat Sets Record

TORONTO. — Weather statistics show that the past month was the most consistently hot August here since 1900, and breaks the all-time heat record set away back in 1841. The mean temperature for last month was 72.5, whereas the previous record set in 1841 and equalled in 1900 was 72.4. It was 6.2 degrees above normal.

Rest Prescribed for Louis

DETROIT.—A defence of the heavyweight title against Max Schmeling this fall has been announced as definitely out of the picture for Joe Louis. A rest of two months, possibly six, was recommended for Louis by physicians who studied X-ray photographs of the hands he injured in defending his title against Tommy Farr in New York.

No fracture was disclosed but the X-rays showed badly bruised muscles and tendons around the knuckles of the right hand and slightly less serious bruises on the left.

Movie Actor Mobbed

LONDON.—Robert Taylor was hustled into a lift elevator to escape 2,000 female admirers milling about Waterloo Station for their first glimpse of the Hollywood film star as he arrived in England.

Cholera In Shanghai

SHANGHAI.—Cholera has broken out in Shanghai's French Concession. French Concession authorities are taking every measure to halt its spread. Cholera is a deadly intestinal disease which yearly takes its toll in underfed Asiatics.

An outbreak of the black (Bubonic) plague in native areas was also rumored.

More People See Quints

NORTH BAY.—Despite a falling off in attendance in the last week of August, about 19,000 more persons saw the Quintuplets in that month than in July, figures released by Dr. A. R. Dafoe, showed.

During August, 138,660 persons saw the quintuplets compared to 119,700 in July. These came in 24,662 automobiles, 93 buses and 278 trailers. In July 29,926 cars, 84 buses and 310 trailers were parked on the grounds.

Mussolini May Visit Hitler

BERLIN.—The long-expected visit of Premier Mussolini to Chancellor Hitler seems definitely set for the latter part of September. From all appearances, the date actually has been set, but no German official will say what it is. The chances are the Italian Premier will come after midmonth, following the Nuremberg Nazi party congress, and will accompany Hitler to Northern Germany for the Autumn army manoeuvres.

New French Minister to Canada

PARIS.—Count Robert de Dampierre, recently replaced as minister to Yugoslavia by Raymond Brugere, this week was appointed French Minister to Canada. Brugere's previous post.

New Typing Speed Record

TORONTO. — George L. Hossfield, West Hollywood, N.J., set a new speed record in winning the international typewriting competition at the Canadian National Exhibition. His speed of 159 words a minute for an hour's typing exceeds all former marks for speed under international competition rules.

Grace Phalen, Erie, Pa., captured the world's amateur contest with a new world's record of 129 words a minute.

Bequests Will Benefit Canadians

LONDON, Ont.—The University of Western Ontario and University of Toronto are two of four public institutions to share to the extent of approximately $55,000 in the estate of Sir Charles Edward Saunders, noted scientist and developer of Marquis wheat.

The universities' portion will be approximately $16,500, but the payment will not be made during the life-time of four friends of Sir Charles.

Sir Charles left $122,648. After making a few comparatively small bequests, his will directs that the bulk of the estate be divided into two equal portions. One of the halves provides a life income for four friends and eventually goes to public institutions; the other half goes to the relatives of the noted scientist.—London Free Press.

Three Dead In Train Accident

CAPETOWN, South Africa.—Three railway employees were killed and six others seriously injured here when an electric train broke through a wall at the end of the tracks in the station and plunged over thirty feet into the Administrative Building. No passengers were aboard.

British Ships Bombed

ST. JEAN DE LUZ, Franco-Spanish Frontier. — Three British merchant ships were bombed and damaged by Spanish war-planes this week off the Asturian port of Gijon on the Biscay Coast. British Consular officials announced.

The British ships were attacked less than twenty-four hours after Great Britain served a stern warning on the Spanish nationalists that attacks on British shipping must cease immediately or the Admiralty would "take such action as the occasion demands."

Prince Nicholas Returns

VIENNA. — Revolution is reported brewing in Rumania with the return from exile of Prince Nicholas, banished brother of King Carol, to lead the Nazi Iron Guard in a coup d'etat which might make him dictator.

Diplomats said Nicholas' surprise flight to Bucharest from Italy—officially denied by King Carol's Government in fear of an uprising—was engineered by the Iron Guard, which has sought since 1923 to drive Carol from the throne because of his extramarital romance with red-headed Magda Lupescu.

Minister of War C. Anzelescu was reported to have resigned and to have been replaced temporarily by Minister of Navy N. N. Iremescu.

Makes Motorboat Speed Record

LOCARNO, Switzerland.—Sir Malcolm Campbell, famed British sportsman, has added the world's motorboat speed record to his international automobile speed standard.

The 52-year-old Briton piloted his 23-foot speed boat, Bluebird, over Lake 125,795 miles per hour to eclipse Gar Wood's 5-year-old mark of 124.86 m. p. h.

Sir Malcolm already holds the world automobile record of 301.33 m. p. h., set at Bonneville salt flats in Utah in 1935.

Sir Malcolm's aquatic Bluebird — his record-smashing automobile was called by the same name—was powered by a Rolls Royce aero engine, and travelled over the measured mile course in smooth and effortless fashion.

Ambassador Is Recovering

SHANGHAI. — Sir Hughe Knatchbull-Hugessen, British Ambassador to China, should recover completely in six or seven weeks from the serious wounds inflicted on him by machine-gun bullets from a Japanese plane, Dr. R. M. Gauntlett of London, chief of the physicians attending the envoy, told the North China Daily News.

Sir Hughe was able to read the messages of sympathy sent to him and even to answer some of them, it was learned. His condition appeared to be improving steadily.

Plane Kills Farmer

STRATHROY. — Death rode the wings of a barnstorming plane that came to Bethesda near here to pick up passengers from a church picnic.

On its first trip of the day the plane crashed into the crowd. Twenty-eight-year-old Stewart James Sullivan, local farmer, was struck by the wings, and hurled to the ground with a fatal fracture of the skull. His cousin, Fred Sullivan, aged 35, was caught in the plane's path, and had two ribs broken.

As others scrambled madly to safety the plane plunged on for seventy-five feet, teetered and tipped tail up, to rest on its nose.

The pilot, Frank Smale, of London, and his lone passenger, 16-year-old Marguerite Brooks, were practically unhurt. They suffered some shock and minor abrasions, but their safety belts had saved them from serious injury.

Wins Cattle Prizes

VANCOUVER.—The Duke of Windsor's E.P. Ranch at High River, Alta., took the major awards in the Shorthorn section at the Canadian Pacific Exhibition here this week, winning the grand champion and junior champion prizes.

Olympics In Jeopardy

TOKYO. — Faced with increasing foreign complications as a result of her undeclared war on China, Japan decided to prepare for a long struggle of three years or more and probably to cancel the 1940 Olympic Games which were to have been held in this city.

Belgian Bank Scandal

BRUSSELS. — The cabinet met to consider the calling of parliament to deal with what the Fascist Opposition calls a National Bank scandal. It involves the payment of secret bank funds bonuses to Premier Paul Van Zeeland while he was vice-governor of the bank.

Van Zeeland said he made sure the money drawn from the special fund did not represent salary for vice-governorship of the bank because he was then holding ministerial office.

"As to the question of the amount I have drawn from the special fund and what I did with the money—that is my own business," the Premier said.

Refuses $57,000 For Crop

GRETNA, Man.—James Handlan, of Kane, Man., forty-nine miles southwest of Winnipeg, threshed 950 acres of Thatcher rust-resistant wheat which yielded forty bushels to the acre, but refused $57,000 cash for the 38,000-bushel crop. He said he wanted his grain to go to prairie farmers as seed and turned down the outside offer.

New Competition For Pitchblende Deposits Here

Canadian pitchblende deposits in the Northwest, source of a rich supply of radium, face new competition through the discoveries of science.

It has now been found possible to produce the same type of radiation in the laboratory as is produced by radium. This announcement a. McGill University is confirmed by the findings of the great scientist, Lord Rutherford, formerly a member of the staff of the department of physics, McGill.

Research workers, Lord Rutherford states, "have succeeded in producing an intense source of radio-sodium which is equivalent in gamma-ray activity to about one gram of radium. It is thus possible," he continues, "that such an artificially produced source of gamma-rays may some day be used as a substitute for radium in therapeutic work."

The new source of radio-activity for use in medical work is the result of many years of study of atomic physics. The technique by which the artificial radium effect is achieved is by a process which stores up radio-activity in common salt. The salt is "bombarded" by extremely small particles known as deuterons to bring about induced radio-activity. The induced radio-activity lasts for many hours. During the hours of emanation it may be used in medical treatment at greatly reduced cost.

GREENSBURG, Pa.— Mrs. Elizabeth Mink, who gave her age as 88, applied for a license to wed Harry Davis, 63-year-old mechanic. Mrs. Mink's first husband died in 1886.

France Ready For Mobilization

France this week achieved the nationalization of six large private railroad systems, which with two other lines already under control, will form a network providing for mobilization of the entire French army, including six million reserves, within forty-eight hours. The Government has also bought up munitions plants, airplane factories, and controls the Bank of France, so that in the eventuality of war, general mobilization of the entire resources of the country may be brought about in the shortest possible time.

Arms Program More Expensive

Under Britain's new rearmament program more than four million dollars a day are being spent on military preparedness. Battleships are being built and airplanes turned out by the score. Industry is gradually being mobilized until by the time five years have passed and the program is complete, Britain will be what is known as "ready". By comparison, the net cost of the Great War to Britain, during a period of four years and eight months, is estimated at slightly less than the total amount to be spent during the five years of rearmament. Some authorities believe that action has come too late, others think that war has been pushed back five years by British rearmament. It remains to be seen.

New Pact With United Kingdom

The new trade agreement made in February between Canada and the United Kingdom went into force this week. By it, British exporters benefit by tariff reductions on 179 items including textiles, iron and steel, machinery, electrical goods, etc. Guarantees to Canada on a number of preference margins were made. These embraced lumber, canned salmon, apples, dairy products, tobacco and patent leather. Easier trading between the two countries is expected as a result.

French-Canadian Population Parity

Speaking at the Canadian Institute on Economics and Politics, Jean St. Germain, Montreal lawyer, drew attention to the fact that the French-Canadian population is likely soon to be on a parity with the Anglo-Saxon in Canada, so rapidly is it growing.

Such a population equality, he said, would lend more than anything else to unite both races.

Discussing another phase of the French-Canadian position in Canada, M. St. German spoke of the theory that French-Canadians stand today in Canada as the bulwark against subversive theories. "An intense individualist, who will not be drawn into other people's affairs, very conservative, with a love for the land of his forefathers, the French-Canadian is rather apt to be a follower than a pioneer," he said.

"Although of French descent, we have nothing in common with France today. The French-Canadians are, too, a static-minded people, as opposed to the dynamic thought of the Americans."

Canada In Peculiar Position

Should Britain choose to withdraw her representative from Japan after the shooting of Ambassador Sir Hughe Knatchbulle-Hugessen, Canada could be left in a very peculiar position. The Canadian Minister to Japan would in that case be the nearest in line of representation to King George VI. When asked if the Canadian Minister to Japan would be withdrawn in the event the British Ambassador at Tokio were recalled as a result of the present situation, Prime Minister MacKenzie King replied "We will consider that when the occasion arises." The Minister is now on vacation in Canada but may leave for his post in Japan next week.

Impasse In Alberta

Defying the Federal Government's power to veto, Premier Aberhart of Alberta intends to put into immediate effect the banking legislation passed at the recent provincial session. He declares that Alberta has investigated and found the Dominion Government at present did not have authority to disallow Provincial legislation.

"Consequently our legislation is still law and will remain law until declared 'ultra vires' by the courts."

The Alberta banks are up in arms over the proposed restrictions to be placed on them and the Boards of Trade in the province are planning to take action. Meantime the Federal Government has not the slightest intention of retreating from the position it has taken. If the Alberta Government fails to publish in the official Gazette the proclamation of Lieutenant-Governor Bowen of Alberta to the effect that the invalid Alberta banking legislation has been vetoed by the Federal Government, the necessary proclamation over the signature of the Lieutenant-Governor will be published in the Canada Gazette.

Spain's War Is Still On

With the eyes of the world diverted for the moment to the conflict in the Orient, Spanish warfare rages on unabated. Above rebel troops stand guard in to wn of Reinosa, armament center, after capture of the town.
