WHAT IS A PLEASURE VEHICLE?

(The Oshawa Daily Times)

According to one by-law of the City of New York a horse is a pleasure vehicle. The reason for this rather surprising definition is that the purpose of the by-law was to restrict the traffic on certain residential streets and to forbid heavy vehicles to use them.

In common speech the term pleasure vehicle and passenger automobile are interchangeable but if an attempt were made to establish a difference between pleasure and commercial vehicles for purposes of taxation, Ontario's legislators would quickly find themselves encompassed with some difficult problems.

When a man drives his car to his office in the morning, it probably is a commercial vehicle. It certainly is commercial when he drives it to sell an order to a customer. If he then drives to the golf course, the same car becomes a pleasure vehicle.

CORRECT PLUMBING INSTALLATION IS IMPORTANT

The average small house has a least 300 feet of concealed piping... This system has been carefully designed and correctly installed.

It is false economy to buy bargain pipes which will not give the service it is supposed to.

The up-to-date master plumber is a consultant who can assist greatly in recommending the most efficient and economical plans for bathroom, kitchen and laundry improvements.

If a farmer drives his family to town to see a movie and on the same trip takes a few bags of potatoes, the back seat to sell to a grocer, is his car a pleasure or a commercial vehicle?

Growth of motor traffic has made the construction and maintenance of roads a more important factor than it has ever been.

It is not surprising that the motor vehicle industry has become one of the most important factors in the national economy.

Ontario's legislators would quickly find themselves encompassed with some difficult problems.

When a man drives his car to his office in the morning, it probably is a commercial vehicle.
