Highlights of the Week's News... By Elizabeth E. Eedy

### AVIATION HISTORY: 1938 should be a banner year for aviation in Canada, if we read the signs aright. The Trans-Canada Air Lines network will be completed west of Montreal to the Pacific Coast. Experimental mail flights over the Rockies and Rockies are being made this month. Schedules call for the 1,168-mile flight from Winnipeg to Vancouver, with stops at Regina and Lethbridge, to be made in 7 hours and 15 minutes.

Transatlantic mail flights by the end of the year are also contemplated, according to Transport Minister C. D. Howe.

While such developments are taking place in Canada, Imperial Airways promises in London, England, this week that new planes put into service within the next few months, by midsummer in fact, will make the 205-mile air trip from London to Paris in exactly one hour.

### SABOTAGE: A word of comparatively recent origin which is being used more and more frequently in the newspapers these days is "sabotage". Russian engineers are arrested on charges of sabotage; the blowing up of the bridge between the two islands in the Adriatic; the blowing up of the factory, "Sabotage" comes from the French noun "sabot" (wooden shoe) and was first used when rebellious French factory-workers threw a boot in the machinery to wreck it. We mean the same thing as "monkey wrench in the works".

In countries such as Italy and Germany where workers have no voice in the Government, sabotage is frequently chosen as a method of protest, of getting back at the powers that be. It is an attempt to slow up a system which they believe to have the worst interests of the working people at heart.

### DIVORCES UP: An increase of twenty per cent, over 1936 is shown by the number of divorces granted to Canadian couples during 1937. The total reached 1,870 altogether, 596 of which were taken out in Ontario. British Columbia came a close second, while in proportion of population, Quebec scored the lowest, 43.

Statistics gathered from the statistics; men must still be chivalrous since twice as many wives sued for divorce as husbands.

## 200 Canadian Pilots Fly With Royal Air Force

In Great Britain—But An All Time Record Was Set In Canada In 1937, More Than 350 Licenses Being Issued To Pilots—Total Flying Mileage 1,680,000.

An all-time flying record was established by Canadian flying clubs in 1937 as club activity continued on the upswing, with more than 350 licenses issued to pilots. Many of these pilots took positions with the commonwealth aviation companies, while others joined the Royal Air Force in Great Britain.

This exodus of Canadian flying club pilots to the R.A.F. began several years ago, and has continued. G. M. Ross, executive secretary of the Canadian Flying Clubs Association, stated that there are more than 200 Canadian pilots who obtained licenses with the R.A.F. He said there was no pre-conceived plan in this movement of pilots to Britain.

An announcement that the value of minerals in Newfoundland totaled \$10,559,782 was accompanied by notes that revealed the fact that the value of the island's mineral production had doubled the value of the codfishery, long recognized as the island's leading industry.
