their faculties."

alert and careful he will be.

SPRING HATS—"Pancake crowns, bumper brims, bonnets with chin straps will lead in this year's parade of spring hats," the fashion papers tell us. And already we see on the a westward drive across the Yellow Private the heart of the Chinese River into the heart of the Chinese Red territory, the mysterious North large towns, our style-conscious womenfolk strutting about with the Shensi area, the country with a "question-mark." latest millinery confections atop their (Few white people have succeed-

help but wish, however, that more women had chosen styles to suit them, had only realized that those chin-strap bonnets are meant to be worn by coy, sweet young things . . . As it is, there are altogether too from under unsophisticated brims, who make us think too readily of Little Red Riding Hood's Grand-

BIG NAME ROMANCE-Last year Windsor who had the world's tongue wagging-the love story of a century, so it seemed. This spring it is Greta Garbe and Leopold Stokowski, two of the biggest names in the news, who are providing us with first-class

As in the case of the other two lovers, however, their fame and name would appear to stand in the way of uninterrupted happiness, since the hounds of publicity are forever on

"CANADA SHIRKS"-Writing in the New York Commentator, an American political observer undertakes to criticise the foreign policy of Canada, who, with the other British Dominions, he claims, is not doing her duty. This country, he says, expects in the event of war to be defended by the British Navy but is doing nothing in the meantime to strengthen

that navy.
"In Britain," our critic points out, "every person on the average is paying \$45 a year for the defence of the Empire. In the Dominions, each white person pays less than a tenth of that sum. Why, the United States is spending more hard cash for the defence of the English-speaking world including Canada, than all the Dominions, ten times over."

Press despatch reads: "Poland stepped into the diplomatic forefront this week as a possible balance between Great Britain and France on one side of that sum. Why, the United

and Germany and Italy on the other, Hard words, those. But cold, bitin proposed European agreements." Behind this news lies a multitude From our own point of view, the situation is rather bad, since if we continue to depend on Great Britain for the protection of our shores, we dare not speak for ourselves nor take successfully, Premier Mussolini of independent action in world affairs.

In spite of the Statute of Westminster (1931), then, we keep on hanging to Britain's apron strings, and allow London to make our miner and the state of the strength of the state of the sta independent action in world affairs. allow London to make our major de-cisions for us.

unless Poland, her ally, were invited to participate in the talks.

Index to Predict The Great Lakes Length of Life Commercial Catch Totals 120,-000,000 Pounds Annually Biologist Able to Tell If Men Likely to Reach Old Age

Discovery of a biological index tha predicts the length of a person's life in average figures after he is adult of fish out of the Great Lakes annualwas reported last week by Dr. Ray- ly, valued at approximately \$8,000,-Johns Hopkins University. He talked to the New York Academy of Medicine on "The Search of

announcement of the "index" for

The indices are bio ogical measurenents, ranging from pulse rate to body shape. They show in effect who shall survive the attacks of disease sufficiently to expect a ripe old age. In the heart and blood vesse' class, two groups of white men, 193 in each were compared. They were first seen at ages ranging from 20 to 60, an average of 40. They were followed until all died.

26 Years Difference One group was long-lived; the other short-lived. The long-lived men averaged 26 years apiece more than

These long-lived men had slower pulse rates. The differences, Dr. Pearl said, were quite small, around four beats a minute less. But this with it, the destruction of the profit slight difference was statistically sig-

The long-lived men had different od pressure than the short-lived. Dr. Pearl said he did not wish at this time to reveal the blood pressure dif-ferences. The men who lived long averaged six pounds each less weight. notwithstanding that all the men in both classes were average build and

Long-Lived Small-Waisted The men who lived long had smaller chest girths at expiration of breath, and smaller waists at the na

It is not true, Dr. Pearl reported, hat the "absolute" length of human life has lengthened. Actually, he said, fewer persons alive at 70 to-. The lengthened life span of today is due to caving the lives of more babies and children, he said.

Foresees Ocean Mail Flights During 1938

Canadian Minister of Transport
Predicts Trans-Canada Airlines
Ocean Service Will Be In Force
Within a Year—21 Pilots Now
Ready Trained.

Ocean-to-ocean mail service will be in operation on the Trans-Canada Airlines within a year, the House of Commons was informed last week by Minister of Transport C. D. Howe.
Two Trips Per Week ed in penetrating as far as the Com-

munist strongholds there. Edgar Snow in his "Red Star Over China" He also made the announcement that it is "quite within the realm of possibility" that a regular air mail service across the Atlantic Ocean, tells the story of a sojourn in this stamping ground of the Chinese Red forces presents photographs of peo-ple and places never before caught consisting of two trips each way per week, will be in operation before the by the camera; describes a visit to the capital of the "mobile Chinese end of the present year.

Earlier in the day, the minister had secured first reading for a bill Soviet" in the north central portion Nevertheless Japan now proposes to go ahead and make good her oft-re-

the unknown hit-and-run driver who slowed down in an attempt to miss the wee dog, nor to make amends after running over it. Contrast this incident with one in Dubuque, Iowa, where 12 men worked for ten days to rescue a small terrier from a fox hole.—Stratford Beacon-Herald. Away From Strangulation

Modern machinery has enabled fewer people to produce more on the farms. This has inevitably been reflected on the villages. But there is a growing realization that urbanization can be carried too far. The huge city strangles itself. Everywhere we see suburban developments as men try to escape from the high taxes and crowded streets of the city.

Industry is said to be following the same pathway. Hydro and rapid transportation cancel many of the advantages once possessed by the city. It will be interesting to see what succeeding years contribute to the problem.—London Free Press.

RAND

Handshaking

Handshaking, once a gentle gesture agreement, peace or friendship ontinues in modern times to develo painful consequences — as the retiring Governor of New Jersey recently discovered when the ceremony raised a blister on his right hand. Presidents at their levees have often suffered a an official reception, in Canada the Duke of Windsor, then Prince of Wales, felt a bone crack under the

Part of Ancient Ceremony The custom of handshaking did no originate as a salutation but as an act binding a contract. The grasping of hands was part of the ancient Hindu hands was part of the ancient Hindu marriage ceremony. It passed into a mannerly courtesy in Rome. Giving the right hand of fellowship as mentioned in the Bible (Gal. 11:9), spread throughout Christendom and had become usual as a salutation in the Europe of the Middle Ages.

Extending the right, or sword, hand symbolized an unarmed approach. All through Byzantium the custom reached the Moslem communities, where it was adopted as a legal formality, but

was adopted as a legal formality, but there the joining of hands meant the pressing of thumbs together. Some African tribes substituted the handclasp for their habit of showing defenselessness of disarming or partly uncovering in deference to a super-

English Shake Least Thus the handshake was at no perfod hitherto likely to give distress, but to be a reascuring, ingratiating greeting. The heavy grip began as a more or less clumsy attempt to em-phasize one's inner feeling of hail-fellow cordiality. Even that is considered less of an ordeal than the greeting customs of certain aborigines - the embraces of Australian blacks, the nose rubbings of Polynesians, Malays, Eskimos and Laplanders. The Japanese obeisances and genuflections, ac-companied by hissing, is supposed to have derived from the cowering or the crouching attitudes of humility in the

ancient East.

Among modern Europeans the English are said to shake hands less frequently than others; the French do For the permanent sort of garden-ing, that is the kind using perennial flowers, shrubs, trees, grass and other things that grow for years, some pre-liminary planning is absolutely es-sential. True, most Canadian garden authorities advocate informal plantshake hands upon meeting and depart-ing; and the Germans repeatedly, on

state, to plot the whole patch roughintegral part of the cave man's sim-ple language now occupy a prominent ly to scale, and then lay out the rows so that tall corn, staked tomatoes and place in the modern vocabulary, ac-cording to William Hawley Davis, pro-fessor of English at Stanford Univer-sity and editor of the Stanford Uni-versity Press, Palo Alto, California. similar things have plenty of room each way, but beans, carrots and beets do not get more than from 15 to 24 inches between the rows. Davis said the cave men used such figures of speech as "back-biting,"
"back-scratching," "skinning alive,"
"girding up one's loins" and other ex-

Existence Very Real Then
Davis said that existence on the
cave man level was still very real to
the average person. To the cave man,
explained, a "bone of contention," an
"eye for an eye" and "cui-throat competitition" meant more than they do
to us; but we can still use each freely. "Literally," he said, "the cave
man 'wielded a big stick,' lett no stone
unturned,' 'kept an ear to the ground,'
found a 'bird in the hand worth two
in the bush' and 'killed two birds with
one stone.' whereas now these expressions are used figuratively.

Derived From Horses

Derived From Horses "In a similar way people still em-ploy a large number of figures derived from horset. These include 'raring to go,' 'prick up his ears', 'bridle at,' and

go, 'prick up his ears', 'bridle at,' and 'take the bit in his teeth'.

"These must be increasingly vague to the generations growing up since automobiles have displaced horses. We may expect them to be used less and less because fewer people find that they convey thought effectively."

weighs 465 pounds. Records examined on his birthday showed the youth's The reason why a shooting star appears to have a tail trailing behind is that an image remains in our eyes for about a sixteenth of a second. Since the falling meteorite (wrongly called "shooting star") is moving very quickly, it has covered quite a distance before than sixteenth of a second has passed; so there appears to be a tail. It is the same phenomenon that makes the spokes of a rate of growth in the last four year has diminished one-half inch each year. He grew only one and one-half inches last year. Between the ages of 9 and 12 he averaged from four to five menon that makes the spokes of a whirling wheel look solid; and it is also the basis for the apparent continuous action on the movie screen on which sixteen pictures are flashed every second.
