up to us."

Sommentary on the Highlights of the Week's News . . . By Elizabeth Eedy

THE FINAL GOAL: An editorial political observer, commenting on the Franco victories declared that by them she could see that Hitler had the family of Mrs. Anthony Eden, we believe is well worth quoting from: "Germany's final goal in the drive augurated by the Austrian coup, the newspaper declared, is the total French territory, but, as 'Mein Kampi' (Adolf Hitler's autobiography and polltical testament) sets out, to remove military rival and thus free her hands eastward as she may desire."

"The military occupation of Austria will be followed by an attack on Czechoslovakia in order to clear that eastern route. Assurances to the contrary are worth just as little as have

NO MORE HAZING: Those hairraising days of the annual freshmanbaiting season are gone forever from the University of Western Ontario The Student Government there voted last week to abolish initiation altogether, the general opinion being that for the past couple of years the legendary hazing has been getting pretty anaemić anyway.

All very well to do away with the crueler aspects of the sophomore freshman conflict, but we do not wish to see the color and glamor depart from college life entirely, nor the students become a bunch of stuffy

94,000 UP: In the five months since have increased from 166,000 to 260,-

Now, the fight is on between the Provincial Government and the Federal Government over the relief grant policy. Ottawa has been making steady reductions in relief appropriations to Ontario while unemploymen Hepburn's cry is that the Federal Gov ernment went in on the promise of making relief a national problem. Ontario municipalities, too, claim to be overburdened by relief costs.

November 12, 1918, the Austro-Hungar ian Empire officially came to an end. Hungary was made into a separate country. Austria was proclaimed a Republic, and the constitution later adopted provided for union with Germany. The Republic was predominantly Germanic, but the subsequent peace treaties prohibited such a union, took steps to see that Germany and Austria were kept apart with not

even a customs union allowed. In the light of these facts, it is not hard to understand the attitude of the Austrian people, who, although temperamentally different from their German cousins, appeared last week to need more vitamin B than adults. He welcome Adolf Hitler as their new

For the past twenty years the great habitants has been like a huge head on a tiny body. All the industries, commercial institutions, etc., of the country have been concentrated within its confines while the rest of Austria (population 4,000,000 more) has ed little but scenery. Vienna stood ready to service a much larger countryside, with plenty of natural resources. Toronto would be in the same position if it were cut off from all the rest of Canada except for what lies with a 75-mile radius. The tourist industry alone could not keep Austria going forever.

BEHIND THE VICTORY: Simultaneously with news of Hitler's Austrian coup came reports of a big insurgent drive in Spain meeting with such successes that the Government armies were being driven eastwar toward the sea and that the civil war was rapidly drawing to a tragic close. Genevieve Tabouis, the noted French

Red Cedar Finds Favor In Britain Pre-Fabricated Walls In Houses; Highly Resistant to Weather

HULL, Eng. - A selling point of two "show" houses constructed here in 11 working days is that the British Columbia red cedar used is dryrot proof and highly weather-resist-

son why it has won such a command-ing position here during the past ten-years. Other reasons are the avail-ability of the victoria and radio. The method of construction is based upon the use of pre-fabricated cedar wall sections. The first-floor walls of both houses were in position within eight hours of starting work.

The wall is of three-inch plank finished externally with weather-boarding, with under-felting and an interior tients, and as a stimulant and tonic to brace up those suffering from melan-

ing, with under-feiting and an interior finish of a three quarter inch airspace and three-quarter-inch plaster board. A wall of this type has greater insulating qualities than a nine-inch brick well, it is contended, and as there is no need to wait for it to dry out, the house is habitable as soon as it is erected.

The waves of music, the vibrations of applause, affect the nerve centres and influence the heart and the circulation. This produces a reaction in the brain which gives the spirit new strength and courage. Music thus becomes an emotion-food, and a concert a banquet for the starved and sick at heart. A wall of this type has greater in-

Speed Is Expensive

If an automobile is driven at a speed of thirty miles an hour, its life will be three times the life of the average car. Economically as well as every other way, speed is expensive. -Chatham News.

Canada Should Take Heed

The decision of the British Broadcasting Corporation to deny Right Hon. Josiah Wedgwood the radio air to comment on Hitler's or Mussolini's ment of Canada should take due notice. We may as well admit now that there is in certain parts of this free Dominion a sinister growth which unless curbed may, sooner than most people think, become malignant. Much controlled radio commission in this crease of the annual fee by fifty cents is, comparatively speaking, an insignificant matter. The fact is the Cana dian people distrust control that may result in suppression of views of public men whose sole interest in their country's future is her welfare and the preservation of her free institutions.-Victoria Daily Times.

No Help to Villages The Montreal Star says that "coun-

try towns with good highway connecions tend to develop and prosper." Experience in the case of Ontario villages is probably the reverse. When good roads arrive, the trade that formerly went to the village stores more often passes their doors and is received by establishments in the larger centres. Dozens of Ontario villages are actually poorer, in point of business done, for the better road communications that they now possess, while larger towns and cities are enriched by the same development. -Brockville Recorder and Times.

This housing problem is a matter that is financial, social, humanitarian, moral. Refugee Children

Langdon Davies, British newspaper-man and writer, who organized a camp of 300 refugee children in Spain, was in Montreal last week, the Montreal

held by General Franco. All have loss their parents. In some cases the par-ents are dead, in others they have ents are dead, in others they have been separated from the children. "Well—" he continued, "we teach them and look after them with a small staff of helpers. We try to arrange foster parents for them in other coun-tries."

"To a Spanish child family is tre mendously important. And the knowledge that they have an adopted family in some other country helps to brace those who have lost their own

Langdon Davies was a news cor-respondent in the early days of the Spanish Civil War. He was in Toledo Spanish Civil War. He was in Toledo at the time the Alcazar was being vainly besieged by Loyalists. He was in Barcelona during Anarchist outbreaks and during the first of the terrorist bombings by Fascist 'planes.

"The great difference between the Loyalist side of today and that of 1936 when the revelt first broke out is that when the revolt first broke out, is that there is perfect order and discipline with the Loyalists now," he said. "In

Four Million Jobs

Recession of Past Four Months Made Heavy Inroads on Employment In United States

next few months. **Bullets Open**

Oil Channels

Drilling oil wells by shooting bullets into the ground is a new process for mining oil pools. It has been developed in order to reach beyond areas tapped by ordinary drilling methods, creating small lateral shafts, like the horizontal shafts that branch out from the main vertical shaft in ordinary mines.

out from the main vertical shaft in ordinary mines.

The lateral shafts in the oil sands are made by lowering a gun down the well to the desired distance and discharging a bullet through the metal casing, or pipe, that lines the well. When wells are drilled they frequently pass through oil bearing sands but are driven further to reach larger pools. When the deeper pools are exhausted the pools at the higher levels which the well passed through would be lost unless another well was drilled at heavy expense.

heavy expense.
Since careful records are kept of everything through which a well passes, it is known at what levels the oil sands exist. By lowering a gun in-to the well and shooting holes in the casing a channel is made by which the oil can flow into the well. The gun is about ten feet long and has fifteen barrels through each of which a bullet is discharged.

Can Be Produced

Black Phosphorus

GARDENING

Spread Planting

A new kind of black phosph produced from the white kind at high temperatures and pressures, is reported by Dr. Robert B. Jacobs, of Harvard University. Another kind of black phosphorus was obtained some time ago by Dr. P. W. Most people realize that all veg ables deteriorate in storage. The early potatoes are always tastier than WASHINGTON.—The business recession has taken a total of 4,300,000 jobs in the United States during the last four months, Federal economists estimated, bringing the nation's unemployed to a total of about 10,450,000.

That total, based on a revision of figures prepared for President Roosevelt's committee on economic security, is the highest in three years.

After reaching a peak of 16,071,000 in March, 1933, unemployed in the United States dwindled to a minimum of 6,132,000 in July, 1937.

In October, the jobless numbered 6,145,000, jumping to 7,177,000 in November, 3,080,000, in December, and 10,181,000 in January.

The Federal statisticians expect the coming of Spring weather will stimulate seasonal outdoor work sufficiently to offset any new increases in industrial unemployment in the next few months. and of black phosphorus was obtained some time ago by Dr. P. W.,
Bridgeman, of Harvard, by the use of high pressures. Dr. Jacobs also reports a violet variety of the element. This makes phosphorus the most versatile of the elemental substances because in addition to the two black and the violet there.
