CUTTING OUR OWN THROAT-A startling statement was made last week in Toronto by the China correspondent of the Manchester Guardian, H. J. Timperley: "The British Empire is slowly cutting its own throat, and Canada seems to have a good firm grip on the

Mr. Timperley who has been 15 years in the Orient explains that one of Japan's main objectives at the present is to undermine the British and U.S. positions in China. "Carefully worked out figures show that during 1937 Japan got 81 per cent. of her essential war supplies from the United States, the British Empire and the Dutch East Indies. Canada's share has been notably Important. The Dominion has con-tributed nickel, aluminum, lead, zinc, scrap iron and wood pulp (used in making high explosives). Thus the British Empire has been indirectly helping to undermine its

SLOW DRIVERS-It isn't a free country any more. You have to drive fast on Ontario's highways whether you like it or not. At a meeting of the Ontario Motor League and the Ontario Safety League last week, slow drivers were scored as the greatest menace on our public roads, worse than drunks, worse than speed maniacs. And there are going to be more convictions for this type of driving henceforth, the Premier of our Province announces.

Here we should like to interpose a suggestion. Why not have all our trunk highways built on the conveyor style (like the moving sidewalks at the Paris Exposition n 1908)? Every car would then have to move at the same speed; you could watch the scenery without giving any attention to the driving, much; and think of the saving on tires, gasoline, oil!

WAR IN 1941-Detailed maps and charts circulated throughout the world by Nazi propagandists reveal that Germany and Italy already have planned how they will divide up Europe. The first group of maps shows Germany in the spring of 1938 after the absorption of Austria; the autumn of 1938, showing the "taking over" of Czechoslova kia, and Hungary, intended to be No. 1 victim of Nazi expansion for 1939. Second set of maps shows Poland coming in during the latter part of next year, and during 1940,
