Pleasant Voice Radiates Charm

(Concluded Next Week)

How You Say It Is Most Impor-tant—Reading Aloud Good Practice

It's a mistake for any girl to work hard to improve her figure, hair, skin and her taste in clothes but ignore completely the fact that she has an improperly placed, uned the brass ring. How in hell had she managed to do it? That was pleasant voice. Because, no mat-ter how attractive she is, unless something he never would be able to understand. He'd see how far her voice has a fairly soothing ef fect on others, they just aren't go ing to listen to her-not for long, anyway.

Unless the cells in the lowe part of the lungs are made to do their work, the voice will lack quality of tone. Proper Breathing Necessary

Therefore, one good way to begin a voice-improvement campaign is to do a breathing exercise regularly until you breathe correctly all of the time without thinking about it. Simply press your palms against your sides just above your waistthat hands are forced wider apart. In other words try to expand your chest at the sides instead of in front. Exhale vigorously, pressing hands into your body as the air leaves your lungs.

Do practice speaking slowly and enunciating correctly.

Just read aloud for 15 minutes every day. Go to your room, close the door, then read. Listen to yourself and try to decide whether you have a habit of raising your voice at the end of every sentence annoys others.
