

NAMES in the NEWS

ADOLF HITLER

To citizens of our Western World these last ten weeks Adolf Hitler of Germany has appeared to be the most momentous figure in all history, by whom our civilization stands or falls.

This man has caught the countries of Europe napping. They did not believe that a so-called mystic, visionary, fanatic (what you will) could be a coldly practical planner. Not until Austria had been annexed did we wake up to the fact that this wild-eyed dreamer-orator is swiftly turning into reality and substance, the shadows of his own mind. We are finding, too late, that Hitler in his autobiography, "Mein Kampf" (written 15 years ago) meant exactly what he said.

A native of Austria, the one-time bricklayer's helper and painter of picture postcards, was embittered towards his lovely lot early in youth. He was expanded his horizon and with it, his discontent. The shame of Germany's defeat acting on his overemotional became a determining force in Hitler's life. He has felt his divine mission to be to awaken Germany to revolt against the Treaty of Versailles. By what means he is accomplishing his ends, we all know.

Hitler is a master of staging, an artist at playing on other people's emotions. Into his words as an orator he puts all the elementary force and spontaneous vitality that are his to command. Screaming, sobbing hysterically . . .

The man is still an enigma. The answer to his personality-riddle will be revealed only by subsequent history.

Peak Is Reached In Maple Syrup

Top Production Figure Again Touched This Year In Canada

Total production of maple syrup and sugar, expressed as maple syrup, amounted to 3,300,700 gallons in 1937, the Dominion Bureau of Statistics reports.

This was double in volume the short crop of 1,573,440 gallons in 1937 and equal to the 1929, the year of peak production. The 1938 crop was valued at \$3,849,000, compared with \$2,245,000 in 1937. Although the quality of the crop was generally good, prices were somewhat lower than in 1937 owing to heavy supplies. Only 10 per cent. of the 1938 crop was estimated to have been made into sugar compared with 25 per cent. in 1937.

Lot of Sugar, Too
Production of syrup in Ontario amounted to 570,800 gallons as compared with 429,700 gallons last year. Maple sugar production totalled 79,000 pounds.

The combined value of sugar and syrup produced in 1938 by Ontario was \$853,300.

LIFE'S LIKE THAT

By Fred Neher

"He can't join our army . . . he's under the age limit!"

VOICE OF THE PRESS CANADA

A significant trend in all fair, large and small, is the prominence given to boys' and girls' club work. It is one of the best features the exhibitions have ever introduced—Farmer's Advocate.

WHAT NEXT FOR THE NORTH?
Jim Curran of the Sault has discovered that there used to be white Indians along James Bay and now some birds at Timmins has discovered white blueberries. Tall tales from the North!—St. Catharines Standard.

IN PRAISE OF SOME DRIVERS
The total motor accidents which children are injured while playing on the streets is appalling, but still more striking is the number of times in which accidents are avoided, either by what appears to be a pure miracle, or by remarkable efforts on the part of the motorists.—Guelph Mercury.

ALL BRUTES TOGETHER
The Philadelphia prison horror grows more as the details are revealed. Twenty men were locked in the eight-by-ten cells, and steam heat turned on while the only ventilation was from a small grating in the roof of each cell. Twenty-two men were taken out unconscious after two days, and four men were dead, literally baked to death. This is civilization in Philadelphia. No wonder Japan, Russia, Germany, Italy and others want to know in what respect we think we excel them.—Hamilton Spectator.

HORSE AND BUGGY DAYS
We have no quarrel with those who refer to the "horse and buggy days." It is an apt term, very descriptive of an earlier era. But there is a sound objection to those who use the phrase in a tone of scorn.

"The horse and buggy days" were important in the development of Canada and of Canadian life. They produced the men and women who made the present era, with its conveniences and comforts. They made these modern days possible.

Thus, when one refers to the "horse and buggy days" it would be better to do so in a spirit of respect, rather than a spirit of sarcasm.—Windsor Star.

THE WONDERLAND OF OZ

By Fred Neher

After leaving the Whimsies, Guph continued on his journey. He went to get to the Country of the Whimsies, and in order to do that he must cross the Ripple Land. The Ripple Land was a succession of hills and valleys, which changed places constantly by rippling. When Guph was climbing a hill it sank underneath him and became a valley, and while he was descending into a valley it rose up and carried him to the top of a hill.

This was very perplexing to the traveler and a stranger might have thought it impossible to cross the Ripple Land at all. But Guph knew that if he kept steadily on he would get to the end at last. So he paid no attention to the hills and valleys and kept plodding along just as though he was walking on level ground. The result of this wise persistence was that the General finally reached the Ripple Land and penetrated a dense forest came to the Domains of the Growlerwows.

230,000,000 Bushels Canadian Wheat Are Exportable

This Year's Crop Biggest Since 1932; Wheat Board Expected to Handle Most of Harvest

Canada probably will have more than 230,000,000 bushels of this year's wheat available to sell in world markets, Government figures showed last week.

The Dominion Bureau of Statistics in its first estimate of this year's Canada field crop yielded 230,000,000 bushels of wheat, the highest estimate of last year's crop, which was 182,410,000 bushels and the highest production since 1932 when 45,000,000 bushels were harvested. Average yield from 1925 to 1937 was 239,761,000 bushels.

Nearly 50 per cent of the wheat likely will be between 110,000,000 and 120,000,000 bushels, leaving more than 220,000,000 for export. In Washington, the United States Agricultural Department estimated the U.S. wheat crop would be 829,910,000 bushels. The U.S. has announced a subsidy program for export of 180,000,000 bushels of wheat and 4,000,000 barrels of flour.

It is expected at Ottawa that practically the entire Canadian crop will be handled by the Canadian Wheat Board, which will pay the Western farmer 80 cents a bushel for No. 1 Northern at Fort William. The price also will be fixed on other grades and any losses suffered by the board in marketing the wheat at a lower price will be met by the Dominion Treasury.

Germany To Buy No Extra Wheat
The German Department of Food Supply stated this year's purchases of wheat in Canada probably would not exceed the normal quantity.

A spokesman said that in accordance with the German-Canadian trade agreement, an average quantity of grain was purchased annually in Canada.

This mean about 2,000,000 bushels. During the last fiscal year Germany bought 1,955,836 bushels from this country and the year before 1,678,326 bushels, according to Dominion Bureau of Statistics figures.

His Eminence Rodrigues Cardinal Villeneuve, Archbishop of Quebec, attended the funeral rites of Patrick Cardinal Hayes, late administrator of the largest Roman Catholic diocese in America.

Prince Arthur Passes

Well known in Canada through his own visits and the connections of his relatives, Prince Arthur of Connaught, ABOVE, died after a long illness in London, England. In recent years his health forced him out of public life, but twice before the war and once in 1917 he visited Canada in the course of his official duties. He was in his 56th year.

News Parade

By Elizabeth Eddy

SAFE TRANSIT—An amusing anecdote is told of a man who was traveling in the West. Travellers making the crossing to North Africa from the Continent are patronizing Italian boats more and more, so that French shipping companies report a falling-off in traffic. Why give French steamers the go-by? Because they have been targets over and over again for "pirate" bombing and torpedoing. Italian ships aren't bombed, torpedoed, so your travellers figure they're safe aboard 'em.

TEN OBJECTIVES—Don't you believe Adolf Hitler when he says in his Nuremberg speech that Germany doesn't want to take Alsace-Lorraine. Upon the wall of the Feldherrnhalle in Munich, which has been made into a Nazi shrine, is a great scroll bearing the words, "God Make Us Free" and on either side five wreaths, with flowers renewed every day. Each wreath carries the color of a lost province and not a day passes without tens of thousands of Germans coming there and mourning their loss. Ten names are inscribed on the scroll: Alsace-Lorraine; the Palatinate; Schleswig-Holstein; East Prussia; Memel and Danzig; Soudeten Deutschland; South Tyrol and South Styria; Posen, Silesia; the Colonies.

ON WITH THE NEW—The money has come from somewhere. So if part of the tax burden is lifted from real estate (which would be a good thing, don't you agree?) other new taxes will have to be imposed, so the Ontario Government says, to make up the difference.

Three new sources of taxation are under consideration, then, by the staff at Queen's Park and will come up for action at the next session of the Legislature: an amusement tax, to be collected by each municipality; a sales tax imposed by municipalities; increase of provincial gasoline tax from six to seven cents extra proceeds to go to municipalities.

The Ontario mayors who get pretty mad sometimes should be pleased with these proposals which should bring more revenue to their respective towns and cities, and reduce the number of sales of properties for tax arrears.

DECEITFUL FRUIT—Those peaches you bought looked wonderful in the store under their deceptive covering of rosy gauze but when you got them home, you found them to be green as grass and hard as bullets. But it isn't just peaches . . . every sort of fruit grown in Ontario is shipped to market in an immature, unpalatable state in order to catch the best price, quick, before they drop.

How long has this been going on? Oh, for years and years, but nobody has said anything much and the growers have consistently got away with it. But now a storm has been raised in the press of Ontario which may result in action being taken.

THE WEEK'S QUESTION—What alignment of European powers is the Kingdom of Greece likely to swing in with? Answer: Greece is becoming more and more closely affiliated with Britain and France and the other democratic powers.

The silk spinning caterpillar (Bombyx mori) is cultivated extensively in the Far East and Europe for the production of silk on a commercial scale. Japan produces about 80 per cent. of the raw silk available to international trade.

He has mastered all the points with the agreeable—Horace.

Skunk Is Cause Of Near-Death

Waterloo Golf Club Skunk Narrowly Escapes Asphyxiation When Men Attempt Finish Off Animal

GALT—As an aftermath of a visit of a skunk to the Waterloo Golf Club, Mr. Murphy, the stewardess of the club, was taken to hospital after carbon-monoxide poisoning. She was first treated with a motor and then put in an oxygen tent. It appears that Murphy, the club first attempted to get the skunk out of the clubhouse by the use of a hose, but she was placed in the shed. Murphy was working in the kitchen and the skunk came in and said the deadly fumes permeated the kitchen and Mrs. Murphy died. She was later brought to hospital and was diagnosed as carbon-monoxide poisoning.

She was removed to the hospital and was soon out of danger, she had a close call.

Pays Final Tribute

His Eminence Rodrigues Cardinal Villeneuve, Archbishop of Quebec, attended the funeral rites of Patrick Cardinal Hayes, late administrator of the largest Roman Catholic diocese in America.

What Science Is Doing

ALL-ELECTRIC FARM

A William Peep, into the future of farming was afforded visitors to the Royal Agricultural Show at Cardiff, Wales, in a display of electrical machinery which showed a farm of the future in an arm-chair industry.

Laboratory wizards have perfected electrical gadgets which do almost everything but eliminate the hen in egg laying and poultry raising. And in a low-roofed shed the same magical force grows enough food for ten milk cows, which increases their yield continuously.

The miracle of the food-growing shed is accomplished by tiers of shallow trays over which are spread grains of corn or any other cereal, although corn has been found to respond better than the others. Electric heat applied to the trays acts so quickly and efficiently that ten inches of growth can be brought about in eight days.

VITAMIN "K" ISOLATED
Complete isolation of vitamin "K," a factor necessary for coagulation of blood, was announced this week by Dr. Edward A. Doherty, St. Louis, Mo. Dr. Doherty said the transparent and colorless crystals of pure vitamin were obtained from an alfalfa meal oil.

England's physical fitness program has already cost \$14,000,000.

Clifford Magon, solicitor to the attorney-general's department; Dr. W. H. Avery, and Lionel Canacher, M.P., LEFT TO RIGHT, form a commission appointed by the Ontario provincial government to investigate mental hospitals in the province. The commission will begin its probe at London, Ont. Premier M. F. Hepburn indicated that the commission was appointed in the belief that many patients are committed and retained in mental hospitals unjustly.

Doctor—"Quick, how many feet has a centipede?"
Man (contending back in a dry, dry voice)—"Gad, that all you have to worry about!"

When I leave this mortal earth no money round this earth no more—
Don't weep! don't sigh! don't pine! don't sob!
I may have found a better job. Don't stand around me feeling sorry about it!

I may be better off than you. Don't tell the folks I was a saint or any such thing that I ain't. If you have "bunk" like that is spread, Please pass it out before I am spread.

If you have roses, bless your soul, Just pin one in my buttonhole. Today—while I'm alive and well, Don't wait till I'm safe in (Heaven)—Author unknown.

A general, who was widely known for his temper and for his strict insistence upon implicit obedience to orders, was in command of a camp of soldiers. One day he was called to the camp kitchen.

General (ordering)—"Here you are, let me taste that."
Soldier—"Very good, sir."
General—"Don't give me any 'buts.' Get me a spoon!"
Soldier—"Very good, sir."
General (returning to the kitchen and looking at the spoon)—"The soldier stood at attention the general held himself to a spoonful of the liquid, and immediately spat it out."

General (rearing angrily)—"You don't call that soup, do you?"
Soldier—"No, sir, that's what I was trying to tell you. It's infectant, sir!"

The Contributor wrote—"The enclosed are original and have never been published."
The Editor (returning them replied)—"I can quite believe it."

Teacher—"If you added seven thousand, nine hundred and twenty-three to eighty-one thousand, four hundred and twelve, what would you get?"
Pupil—"A wrong answer."
