

LITTLE REST DAY OR NIGHT

Woman With Severe Neuritis
For the benefit of others who may be troubled with the complaint she suffered from, a grateful woman writes:
"Last May I had a very severe attack of neuritis in the leg, which made it impossible for me to rest during the day, or to get regular sleep at night—to say nothing of the intense pain."
"Various medicines gave me very little relief, and a friend advised me to give Kruschen a trial, as she had derived benefit from it while suffering similarly. I am so thankful that I took her advice. From the very first bottle I felt relieved, and now I am quite free from pain, and get a good night's sleep."
"Neuritis, like rheumatism, lumbago, and sciatica, is often caused by medicated uric acid crystals, which form as the result of sluggish eliminating organs. Kruschen helps to convert these crystals into a harmless solution, which is removed through the natural channels."

Gardening

NO HURRY
The average amateur starts operations early or sometimes weeks before the season is well advanced. Satisfactory operations can be continued. With the general run of vegetables and flowers, there is no advantage in getting things in while there is still danger of serious frost. One setback from a cold day or two completely offsets the early start and may indeed mean replanting the whole garden. This caution of course does not apply to the hardiest vegetables or flowers or to grass seed. These should be sown just as soon as the ground is fit to work.

A SHORT CUT
For a short cut the gardener is advised to purchase a certain quantity of started plants of the flowers and vegetables. These are usually purchased from the greenhouse, florist or seed house. It is important to get the varieties wanted and on this account it is an excellent idea to consult a good Canadian seed catalogue before placing the order. The gardener can look over the various varieties offered in the catalogue and should make sure that the particular varieties wanted are in the boxes of plants bought.

Among the flowers which can be purchased as started plants are cosmos, zinnias, petunias, marigolds, salpiglossis, nicotiana and a host of others. Cabbages, celery, tomatoes, head lettuce, egg and pepper plants in the vegetable line are all sold as started plants.

MOST FOR MONEY
Those with only a little land to spare should concentrate on those vegetables which give the biggest returns for the smallest space occupied. Among such kinds are beans, carrots, onions, lettuce, Swiss chard, spinach, cucumbers and beets. In the lesser-known vegetables are leeks, egg and pepper plants, broad beans and peas lettuce. These can all be grown in almost any part of Canada. Experts advise the inclusion of some thing new in the vegetable line each year so that variety can be gradually widened.

Veteran Engineer Will Pilot Royal Train

Pictured in the cab of his locomotive at Quebec City, is Engineer Eugene Leclercq, of the Canadian Pacific Railway, who will have the honor of piloting the royal train of King George and Queen Elizabeth when they visit Canada next month. Engineer Leclercq was a member of the royal train of 1901.

A New Streamlined Mauretania Nears Completion

A view of the new Cunard White Star Liner S.S. Mauretania, as it nears completion at the shipyard in Birkenhead, Eng. The vessel's streamlined beauty is a far cry from the appearance of its beloved namesake, the former British queen of the seas. The Mauretania will sail from Liverpool on her maiden voyage on June 17.

Farm Forum

FERTILIZERS NOW AND THEN
Canada is a comparatively new country agriculturally, but her virgin soils are being fast depleted by cropping, by drifting and by erosion. Fortunately, the need for restoring lost fertility is now becoming recognized generally. History repeats itself, and the experience of British farmers of nearly 100 years ago has been that of Canada more recently, says B. Leslie Emslie, chemist-agronomist.

Original Superphosphate
Furnished in a manner, the old stand-by, and still justly esteemed for its unique qualities, proved eventually inadequate to produce maximum crops. This was due to its deficiency in phosphoric acid, a discovery made when the stimulating action of ground bones on crop growth was observed.

Has Raised Fish Consumption
The Hon. J. E. Michaud, Dominion Minister of Fisheries with V. P. Reid, Toronto industrialist, spoke of the inclusion of some thing new in the vegetable line each year so that variety can be gradually widened.

What Science is Doing

MENTAL CURE IN FOOD
Chemists are trying to find a remedy for a numerous class of human half-wits—to see whether food can make better brains. The inability to be treated with diet is a new type discovered in 1934 by Dr. A. Folling of Oslo, Norway. The report says it attacks one person out of every 20,000.

SUBSTITUTE FOR BLOOD TRANSFUSION
Successful use of an abdominal fluid as a substitute for blood in transfusions is reported by Dr. H. A. Davis, of the University of Tennessee.

CHEAP NEW EXPLOSIVES
Two new high explosives of cheap and limitless production, are announced by the head of Purdue University's department of Chemistry.

HALTS PROGRESS OF T.B.
Human tuberculosis has been completely arrested, about 100 guinea pigs by a new form of sulfanilamide.

Have You Heard?

An attendant in a mental home was making his evening round when he came upon one of the patients industriously fishing in a wash-basin with red ink.
"Wishing to humour the man, the attendant asked him if he had caught anything."
"What?" said the patient, "in a wash-basin? Are you crazy?"

Mother (on train): "If you're not a good boy I'll slap you."
Junior: "You do and I'll tell the conductor how old I really am."

"It's lucky that Adam was the only man on earth, when he married Eve."
"How so?"
"Just think how he would have felt, if he had seen his rib walking round with another fellow."

"Didn't I shove you about a fortnight ago, sir?"
"No. I got that scar in France."

Rural Resident: "It's simply fine to wake up in the morning and hear the leaves whispering outside your window."
"It's all right to hear the leaves whisper, but I never could stand hearing the grass moan."

"I can think of nothing sadder than a man without a country."
"I can. A country without a man."

"Triangle" which is another name for skirts of dresses with a petticoat look.

Doubts Value Of Bombings
U. S. Envoy Says Civilians Become Accustomed To Raids
—Moral Can't Be Broken That Easily.
Bombing of civilian populations in an effort to break their morale is a new phase in the recent Spanish civil war, says Claude G. Bowers, U. S. ambassador to Spain for the last six years. He said that "instead of breaking down the morale," he said, "the effect seemed to be very perceptibly a stiffening of the morale of the people—a rise in their resentment."
