#### New Hobby In Old Cook Books

Wingham, Ont., Girl Uncovers Unique Recipes In Old Files —She Makes Profit Out of Selling Them

Oddities for the oven bring profitable returns, Nell Hays attractive young university graduate of all started when she read a caustic recipe submitted to a country magazine by an eccentric food fancier and repeated it to a friend who used it for an advertisement and rewarded her for her idea.

Te lucky piece read: "To dress beefsteak in the proper (?) way: Cut the steak about a half-inch thick, wash it in a tub of water as you would an old dish-rag, wring-ing it out from time to time to take whatever flavor the meat might have out of it. Then put at least a pound of fresh unsalted butter or hag's dripping, and when the grease is spluttering and about to burst into flame from heat, dump the steak into it. Keep perpetually turning and fussing with it and drowning it in salt and pepper. Then put it into a tureen and pour the grease over it until it is quite seaworthy and will float."

What People Used To Eat Since then she has been burrow-ing in old cook books and manuals in book-shops and odd places, disovering what people used to eat and how they used to cook in the olden days; then selling her information to advertising firms. Her files contain rules for hundreds of things used by pioneer women of Canada and the United States and recipes for cooking game which is now foreign to the average palate

#### Travel Aids For Grooming

Aids to good grooming should go along on the vacation trip. Do not forget to pack brushes for clothes, shoes and hand bag, an efficient mending kit, pins, a small bottle of cleaning fluid for emergencies. And do provide adequate cases for cosmetics and toilet articles. And even though you select uncrushable materials for most of your ward obe, you will find a small folding electric iron practically invaluable.

For a number of years membe of the Canadian Young Women's Christian Association, working is India under a world fellowship scheme, have been largely respon sible for interesting the women of Bengal in physical education. Promising pupils they trained have become teachers in government Beginning of Physical Training

Fifteen years ago a modest be-ginning was made. At first pro-gress was slow. Indian girls of the higher classes had no background of games or strenuous physical ex cises and, long accustomed to a sheltered, comfortable life, they ound difficulty in performing even the simplest movements. Teaching them to teach others was an even more arduous task, the Canadian women found.

Later the Government of Benga and the Calcutta Y. W. C. A. arranged to share a director who would supervise the physical edu cation, games and athletics of the girls in the province, train teachers for schools and supervise the work done in these schools. In July 1936 a physical training college was opened in Calcutta, under the ausices of the Y. W. C. A., out of noney raised by Canadians.

Today, large numbers of Indian girls hold positions as instructors government schools in Bengal and many others are rapidly qualilying in the new profession. So important has this branch of educaion become that the governme education department will take ver the training of the teachers for Indian schools from next year. Much work, however, will remain n the bands of the Calcutta Y. W. C. A., which has just secured a new director of physical training rom Canada, Miss Marjorie Culbert, who has given instruction at Y.
