### ARMS USELESS ON Postal Figures WET DAY

Rheumatic Pains Relieved by Kruschen

Here is a noteworthy instance of the manner in which damp weather can affect the joints of one who is subject to rheumatic palns. "I had been suffering from rheumatism very badly," a man writes, "and had such pains in my laints that I could hardly bear it. writes, "and had such pains in my joints that I could hardly bear it, on a wet day especially. It pained me terribly to use my arms, and I was hardly able to work. I tried two different remedies, but I was still as bad after the treatment. "Then I was told to try Kruschen Salts, which quickly brought relief. So of course I have kept on with it, and I am now much better and have never felt so fit for years. I used to feel so miscrable and sluggish, but now it is a pleasure to be able to work."

The pains and stiffness of rheu-matism are often caused by urle acid crystals in the muscles and joints. The numerous salts in Kruschen assist in stimulating the internal organs to healthy, regular activity, and help them to eliminate excess uric acid.

## Well-Considered

At the age of ninety a man is still likely to be rather rash, given to hasty, immature judgments. Ask such a fellow how he has happened to live so long, and he will tell you is it due to his habit of early rising. But at the age of 104 a man's judgment is ripe and full. And so we hail the sound words of Dr. William E. Thompson of Bethel, Ohio, who is beginning his 105th year. The reason for his longevity? "It's because I haven't died," says Dr. Thompson.

The new antitoxin is the result of the development by the Wellcome Laboratories, England, of a method for large scale purification based on the fractional action of enzymes (ferments). Until now these bacteria have been grown only in complex media containing tissue extracts the constituents of which were not fully known.

#### AGE OF ROCKS

RECALCULATED The geological strata of the sur-face of the earth are only about half as old as was formerly believ-ed. This change has been made as the result of recalculation of the age of rocks based on a re-examination of their content of radioactive material by newer methods and a new check-up on standards made at the Massachusetts Institute of Technology by a group of scientists. The total age of the earth remains about the same, 2,-000,000,000 years, but the relatively recently laid down strata, post Devonian, which was supposed to have been formed about 210,000,000 years ago proves to be much younger, about 130,000,-000 years.

prayer is learned through trouble.

Often we pray much more earnest

Faith In Action, 25-29 Ohrist's faith was not a mood or pose. It was a basis for action. He healed the sick boy. Emotion was never an end in itself with Christ. It was a spur to redemp-tive action. The disciples asked why they could not heal the boy and Christ told them that they lacked prayer and discipline. Christ had won his power to heal through faith, prayer and discipline. The Golden Text states, "All things are possible to him that be-lieveth." Is this the secret of our weakness? Is it the explanation of the relative impotence of the Christian Church? Is apostolic power waiting for us as soon as we attain apostolic faith? "Wherever poverty, scikness, or any outward rcumstance makes life hard social religion has its chance. USE OF THE DICTIONARY In the course of study in Eng-lish for Grades IX, X, and XI in Ontario schools, just issued, par-ticular stress will be placed on the proper use of a dictionary. Teachers are instructed to interest their pupils in the study of words, so that the boys and girl: will keep a dictionary handy while reading in order to find the proper spelling, pronunciation and meaning of ev-

ery new term they run across in their books. Awaken a proper interest in a boy or girl as to the use of a dic-tionary, and that interest seldom wanes. The study of a lexicon is not only useful, but to many peo-ple it is fascinating. It is not something that can be complet-ed in a few months or even a few years. There are few, if any, mortals who know, offhand, the exact meaning of every word in the English language. There is aiways something new to learn.
The present instructions are
good, but they are an admission
of a laxity in this regard in the past. No boy or girl can become a real scholar without intensive and intelligent use of a diction-ary.—Windsor Daily Star.
