CAST OF CHARACTERS TRAN DEARBORN-heroine, student nurse. She ran into love and trouble when she met DR. BOB BENCHLEY - hero, handsome young interne. He had trouble, too, keeping up

with brilliant DR. STEPHEN SARGENT-head surgeon. Dr. Sargent's problem was something else again. Yesterday: Tran blunders into the emergency operating room on her first day in the hospiltal and is ordered out. Very shortly she

s to need the benefit of prayer! With burning cheeks Tran fled

down the corridor - away from those cruelly amused male voices in Emergency. For, although nothng was further from her ethical code than to eavesdrop, she had heard. . . . Her resentment was entirely directed toward the homedark young interne who had mickered. As for Top Sarge, of course, no one would have thought of questioning his right to be caustic, any more than if it had been a law of nature. He was "Top Sarge." Nevertheless that "feath-er-brain" did rankle.

Oh, well, all she had wanted anyhow was to pick up a little useful surgical information; at least she did know now that the chances against any one's wanting a student nurse when he asked for "probe" ran into astronomica

Looking For The Others She had a good deal of difficulty in finding the rest of the demonstration group, because no one had considered it worth while to

tell her beforehand just where they were going, or why. It began to occur to her that by this time Miss Miller, the senior nurse in charge of the group, just night have missed her. And Miss Miller had an unpleasantly direct

Then as a door opened down the rridor, he said swiftly, "Listen, Agility, if Miller misses you and sends out a search party, you might as well turn in your apron.

Miss Miller might have modeled for a Red Cross poster as the ideal nurse. She was erect and trim, blond and coolly lovely as a snow maiden, with quietly watchful blue eyes, slim, beautiful white hands, and an air of serene detachment which had won for her the nickname "the icicle." . . . Miss Miller was not a regular nursing instructor; but as a nurse, she was recognized as tops. Rumor had it that she was Dr. Stephen Sargent's favorite nurse - a rumor, Tran new, which gave her enormous prestige thorughout the hospital. Now, "the icicle's" cool, quiet

voice was explaining the organization and management of the long white ward through which they ere passing; her graceful, beautifully groomed hands were pointing out the arrangements of beds in their small curtained cubicles, the proper adjustment of lights for the comfort of the patients, the correct grouping of ar icles on the bedside tables, and other kindred matters which she

But unfortunately I am not the only one whe saw you follow Dr. Sargent into Emergency . . . I'm not even asking you why you did it. You can explain that to the Director of Nursing. I have repeatedly noticed in your attitude a tendency to frivolity which has no place in the nursing profession." . . . Miss Miller was one of Tran's superiors who had frequently found those uncontrollably dancing eyes of hers vaguely disconcerting. . . . All Sides - Attention Should Be Paid To Stable, Animals, Utensils

In the illustrated farmers' bulletin, "Producing Clean Milk" just issued by the Dominion Department of Agriculture, the author, Dr. A. G. hhead, Dominion Agricultural bacteriologist, states that to produce the highest grade of milk, contamination from all sides must naturally be excluded as far as possible. Only when care is paid to able, animals, utensils, and the nethod used by the milker can the mest milk be drawn. A produc er intent upon cleaning up his milk pply can best commence by en uring that his pails are clean and lded and that the chance of dirt illing from the cow into the pail reduced to a minimum.

We Out-cheered British Crowds

Man to man, Canadian crowds can outcheer British crowds when it comes to welcoming the King

and Queen.
Of course due allowance must be made for differences between British and Canadian character and temperament. Judging from the showing, however, when the King and Queen arrived back in England, R. K. Carnegie, Canadian Press staff writer, found that London crowds have volume which develops into a great roar in which no individual voices are distinguishable.

Same Depth of Affection There was one continuous roar that day from Waterloo Station to

Buckingham Palace.
But for wide, open-mouthed cheering, particularly such as is furnished by those lusty-lunged people out on the Prairies, the Canadians can show the way to any

London crowd of similar size. As for depths of affection and loyalty, that deeper emotion lies behind the cheers, there's no difference between that of England or Canada.
