

King and Queen Take A Look At Their Giant Locomotive

Their Majesties King George VI and Queen Elizabeth II mounted by specially constructed steps to the cab of the giant Canadian Pacific Locomotive 3519 in which they rode from Beaverbrook to Stony Creek, on the east slopes of the Selkirk Mountains. Behind them is W. M. Neal, vice-president, western lines, Canadian Pacific Railway, who accompanied them on their trip in the lead locomotive of the three used to power the royal train over this scenically beautiful stretch.

Modern Etiquette

BY ROBERTA LEE

- 1.—When attending a wedding reception should a guest pause for a talk with the bride and bridesmaids?
 - 2.—What would be a good closing for a personal note?
 - 3.—What is the minimum number of courses that a hostess should serve at a luncheon?
 - 4.—Is it proper for a man to rest his arm on the back of his companion's chair while watching a picture with her at the theatre?
 - 5.—What is the correct way to place forks on the table?
 - 6.—What is the difference between the fork and the significance?
- Answers**
1. No. One should extend congratulations to the bridegroom, but wait to the bride, make a cordial remark or two, then leave them to the other guests. 2. "With kindest remembrances" or "kindest regards" are both good phrases for closing a social letter. 3. Not less than three courses. 4. No; he should keep his hands in his lap. 5. The forks should be placed at the left of the plate, and from left to right in order of their use. 6. Pearl or moonstone, signifying health and long life.

Find Manuscript Of Shakespeare's

Three Faded, Blotched Pages Thought to Have Been Written by Him — Old Dispute May Be Settled

A manuscript expert of the British Museum announced his conviction last week that three faded, blotched and untidy pages of the manuscript of Shakespeare's *Henry VIII* had actually been written by William Shakespeare and were the only extant manuscripts of the dramatic.

The authority, Dr. Robin Flower, deputy keeper of manuscripts in the museum, told the Royal Society of Literature that if his conviction were correct, it would, in his opinion, end the long-standing controversy as to whether the plays and poems usually attributed to Shakespeare were written by him or by some one else, presumably Sir Francis Bacon.

Mystery of His Identity
It is true, we shall be relieved for ever of the wearisome assertion that anybody else but Shakespeare wrote Shakespeare.

Flower said if these samples of literature that he has examined could be compared with an admitted specimen of handwriting of the poet, the "mystery of the dramatic author's identity would be cleared up once and for all."

Lever Brothers' \$300,000 Addition

A \$300,000 addition to the big Toronto plant of Lever Brothers Limited, soap manufacturers, is that company's response to expanding business conditions in Canada. H. A. Wilkins, president of the company, declared that continued expansion of business made the addition necessary.

The new building, which will be well under way, will consist of three stories of concrete, brick and steel construction. It will be 140 feet long and 80 feet wide, and will house the company's general offices and cafeteria. Air-conditioning will be adopted throughout and the very latest in office equipment will be at the service of the firm's employees when they move into their new quarters this fall.

Finest Iron Ore Is Located Here

Canada Possesses Great Deposits Which May Result in Development of New Iron and Steel Industry in Northland

Investigations of the last few months have confirmed that Canada possesses one of the finest iron ore deposits in the world which may be of great significance in the development of a new iron and steel industry in this country, it was declared at yesterday's session of the Canadian chemical convention.

Below Lake Surface
The question was, however, one of timing. The deposit is located below the surface of a lake, Steep Rock Lake, about 155 miles west of Fort Arthur, and about four miles north of the south line of the Canadian National Railway. It had yet to be determined whether the ore could be mined in successful competition with the pig-iron and with deposits of Minnesota and neighboring states.

America's Most Fearsome Beast

Fossils Tell Story of Giant Dragon Which Once Lived On This Continent — Crawled Out From Rockies

An armored dragon, most fearsome of beasts known to have lived on this continent, crawled down out of the Rockies to the Great Plain—35,000,000 years ago.

Records of this giant lizard, whose bones were completely covered with bony plates which overlapped in even rows like tiles on a roof, have been found by scientists of the Smithsonian Institution, Washington, D. C.

The appearance of the dragons on the plains probably frightened the earliest primitive man and caused the species, related to crocodiles and snakes, to retreat now.

Have You Heard

Two actors who were jealous of each other met in a restaurant. They exchanged frigid glances. "How are you getting along?" asked one presently.

"Pretty well," replied the other. "Still keeping alive."

The first man eyed his rival anxiously for a moment and then asked casually: "What's your motive?"

"Sannambulist said to have run a mile in six minutes."

Driving a car over a level crossing, he had been run into by a locomotive.

When his small son was taken in to see him in bed his first words were: "Daddy, did you see the works of the engine when you were under it?"

What Science is Doing

DIET REVIVES HEARING
A 70-year-old San Francisco physician claims that after 20 years of experiments and study he has discovered a successful chemical treatment for deafness.

The treatment consists of administering two powerful synthetic-produced chemicals, nicotinic acid and thiamin. They are believed to restore activity in the hearing nerve.

"SILVER STEEL"
Silver steel, a new stainless alloy which resists sea water corrosion, is announced.

The new alloy is made by adding a small amount of silver, never more than two per cent, and frequently less than one, to the present stainless steels that contain chromium and nickel.

The precious metal goes into solution in stainless steel. It dissolves like sugar in coffee. The silver forms a film of silver chloride on the surface of the steel.

This film is not soluble in water, hence it protects the steel against rust. If the film is knocked off, a new one immediately replaces it, coming from the silver dissolved in the steel.

CURES ARTHRITIS
A new treatment for rheumatoid arthritis patients, never before used in North America, is reported to the Ontario Medical Association by Dr. Gordon Calder of London, Ont.

Dr. Calder said he had used a compound sodium arsenite, in a number of cases. About 70 per cent of the cases were completely cured or showed marked improvement, Dr. Calder declared.

Bumper Crop Of Graduates

Universities of Canada Granted More Degrees Than Usual This Year

Canada had a bumper crop of university graduates this year, according to the Canadian Press survey of the "class of '39" in 15 Canadian universities from coast to coast. As the graduating class finally earned the degrees, the number was estimated at 5,750 while in 1938 an all-time peak of 6,250 was reached.

Yoga figures for men and women finishing their courses in all branches of higher education this year is 5,575 compared with 5,555 in 1938, in the years 1936-7 the number was estimated at 5,750 while in 1935 an all-time peak of 6,250 was reached.

Vocational Diplomas Popular
Last year's notable tendency toward vocational diplomas continues and the percentage of "liberal" degrees has risen in some colleges almost to the half-way mark, the survey shows.

University authorities trace the upward bias to the economic situation in 1935-6 when most 1939 graduates began their college years. Many officials predict an even stronger swing will step out into the business and professional world next spring.

Upward, Westward Tendency
As usual, larger universities are good barometers of academic trends, McGill, Toronto, Alberta and Dalhousie registering most obvious increases. The "upward and westward" tendency most evident in 1935 continues at slackened pace as most western colleges report further westering of graduate ranks.

Furniture And Gowns Similar
Go Hand In Glove In World of Fashions; Seen First in Chair

Frocks and furniture are hand in glove as far as fashion goes. And that attitude has always reflected itself first in chairs and sofas, though furniture for storage feels the effect of style changes in clothing eventually. It's easy enough to spot a chair of the hoop skirt period, and the conversation chair, made so man could sit backward to the fashion world.

Have You Heard
Two actors who were jealous of each other met in a restaurant. They exchanged frigid glances. "How are you getting along?" asked one presently.

"Pretty well," replied the other. "Still keeping alive."

The first man eyed his rival anxiously for a moment and then asked casually: "What's your motive?"

"Sannambulist said to have run a mile in six minutes."

Driving a car over a level crossing, he had been run into by a locomotive.

When his small son was taken in to see him in bed his first words were: "Daddy, did you see the works of the engine when you were under it?"

This woman suffered for years with rheumatism. She could neither walk nor sleep, and nothing did her but weeping. She was persuaded by a woman to try a certain medicine, and she was cured.

Few Alcoholics Attempt Suicide

When They Do Make A Try, They're Unsuccessful, Doctor Declares

Alcoholic persons seldom attempt suicide, Dr. Merrill Moore, of the Harvard Medical School, declared last week.

From a study of patients brought to Boston City Hospital for attempted suicide, Dr. Moore found that those who do attempt suicide are usually persons who are not alcoholics. He said that when they did, it was later in life than among other persons. Also, he reported, the tendency to attempt suicide was much less successful in their suicide attempts.

Life In Christ
For me to live in Christ, I must have a heart that is clean, a mind that is clear, and a will that is strong. I must have a heart that is clean, a mind that is clear, and a will that is strong. I must have a heart that is clean, a mind that is clear, and a will that is strong.

LESSON IN ITS SETTING
The Second Epistle to the Corinthians was written by Paul, not long after the writing of the First Epistle to the Corinthians. Paul was a prisoner at Rome, perhaps A.D. 62. The Second Epistle to Timothy was written from a prison, perhaps A.D. 67. The Second Epistle to the Corinthians and the Second Epistle to Timothy were written from a prison.

GARDENING
A suitable destroyer for weeds or grass in driveways is common salt, the cheaper and coarser the better. Not only will a liberal application of this about one or two handfuls to the square foot keep down grass, weeds, poison ivy, but it will also bring gravel together into an even surface, keep down dust and repel frost. In some parts of Canada salt is used on all gravel roads and is applied equal to light pavement.

RADIO NOTES AND NEWS
By MADGE ARCHER
Rumors of a basic change in the set-up of the Magic Key of RCA program, mooted in this column last week, have been definitely confirmed. Beginning Monday, June 26, from 8:30 to 9:30 p.m., E.S.T., over the Blue network the new schedule will start.

Long Pyjama Coat Favored

Ask each man in a small group what he wears while sleeping and a variety of answers. Where there are only a few plans to produce, the same may be provided with paper collars.

Long Pyjama Coat Favored
Cut across which eat through the fabric, and the long pyjama coat is usually quite popular, but the presence of the other kind is only shown at first by a wilting or withering of the foliage.

Long Pyjama Coat Favored
Cut across which eat through the fabric, and the long pyjama coat is usually quite popular, but the presence of the other kind is only shown at first by a wilting or withering of the foliage.

REG'LAR FELLERS—A Hot Lead

REG'LAR FELLERS—A Hot Lead
MY MOM DON'T WANT TO BUY ANY VACUUM CLEANER, BUT I THINK I KNOW WHO MIGHT WAIT ONE.

REG'LAR FELLERS—A Hot Lead
O.K., SONNY, JUST GIMME HIS NAME AND IF I SELL HIM I'LL SLIP YOU A NICKEL FOR YOURSELF.

REG'LAR FELLERS—A Hot Lead
BETCHA THIS WILL TICKLE HIM ON ACCOUNT HE PROBERLY NEVER HAD THE IDEA AT ALL!

REG'LAR FELLERS—A Hot Lead
THAT'S HIM! OH, MR. MU CAHEY!

The King too, is anxious to see the medal worn by Girl Scout Leah Burckett which Queen Elizabeth is examining after Scout Burckett presented the Queen with a bouquet of flowers as the royal party left the White House to attend the garden party at the British Embassy in Washington.

Training For Night Driving

Examinations for driver's licenses are made in the daylight. Most motorists learn to drive in the daylight. Because daylight conditions differ so much from those after dark, the Journal of the American Medical Association recommends special training of motorists at night. It points out that night driving involves a different technique because of the difference in visibility and in the reactions of motorists.

THIS CURIOUS WORLD
By William Ferguson
DONATI'S COMET WAS BELIEVED, BY THE PEOPLE OF FRANCE, TO HAVE BEEN RESPONSIBLE FOR THE RARE FLAVOR OF THE FRENCH WINES PRODUCED IN 1888.

EVEN TODAY, SOME OF THE "COMET WINES" STILL ARE IN EXISTENCE, AND ARE USED ONLY ON SPECIAL OCCASIONS.

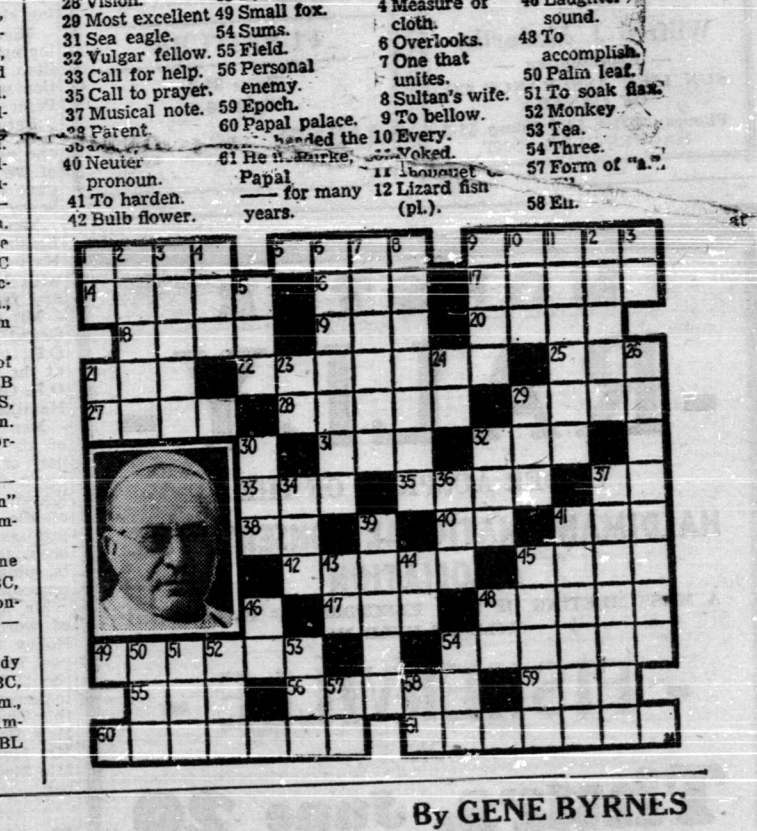

IN THE EARLY DAYS, A MUSHROOM GROWING NEAR A DEER WAS CONSIDERED POISONOUS.

FLINT seems to have been responsible for a belief that exists, even up to today, that rusty iron, rotten cloth, or other "poisonous" objects in the soil will produce poisonous mushrooms. Equally erroneous is the belief that a bright coin, dropped in a stew of mushrooms, will turn black if the plants are poisonous, but will remain bright if the species be edible.

NEXT: What color is the sawdust that comes from the sawing of a diamond?
