ALMOST CRIPPLED WITH RHEUMATISM

mproved Greatly When He Tried Kruschen There has just come to our notice a case of grand relief from severe rheumatic pains. The seriousness of the man's condition and the step that led to his ultimate recovery, are described in the fol-lowing letter:—
"For several years I suffered

from rheumatism. I had all my out, and still suffered. A year ago I lay in hospital for fourteen weeks, almost crippled. When I got home I continued to take medicine, bu began to go down again. A friend of mine asked me to try Kruschen Salts, and I am very pleased to be able to say I have been on the mend ever since."-H.P.

Two of the salts in Kruschen are the most effectual solvents of uric acid known to medical science. They swiftly dull the sharp edges of the crystals-the cause of pain and stiffness-and often convert them into a harmless so lution, which is then expelled through the natural channels.

Grew Uncommon Garden Vegetables

Chinese Cabbage, Salisfy, Kohl Rabi Are Seldom Found In The Average Canadian Gar-

Worth-while vegetables which are seldom grown in the average gar-den include Chinese cabbage, salisfy, celeriac, chives, dandelion and kohl rabi, states J. Gallaher, Head Gardener, Dominion Experimental Station, Kentville, N.S.

Chinese cabbage is one of the easiest vegetables to grow and may be used in a salad, or cooked like leading scientists of the coal fields cabbage. The seed should be sown early in July as this vegetable does not do well from spring sowings. Chinese cabbage needs good rich land in order to make large, wellblanched heads. Wong Bok, Pe Tsai and Chihli are good varieties.

"Vegetable Oyster" Salisfy is known as the "vegetable oyster" because of its oyster flavour when cooked. The seed should be sown in May and the plants thinned to about 6 inches apart. The seed should not be cov-

ered deeply or germination will be poor. Chives should be in every garden. The leaves have much the flavor of onion leaves and are used in sal-ads, soups and stews, mixed with

mashed potatoes, and so on. Easy As Radishes Kohl Rabi can be grown as eas-ity as radishes. It is between a cabbage and a turnip in looks and flavor, and is cooked and used like liquid, flowing about a mile an turnips. Successional sowings hour, the rocks either float while the valuable minerals sink, or the reverse if the minerals are the until the middle of July. Kohl Rabi should be used when from 2 to 21/2 lighter weight.

Modern Etiquette BY ROBERTA LEE

1. When having personal sta-tionery printed, should the return address be placed on the front of the envelope or on the flap?

2. May one "ring off" in business telephoning without saying "Good-by?" 3. Is it correct to serve a des-

ert with the silver on the plate? 4. When a woman is introduce to a man, should she offer her

5. When travelling in a Pullman car is a passenger expected to pay for the use of a pillow, in day-6. How should one eat from a spoon?

1. It should be on the flap, though it is omitted entirely on envelopes used for formal pur-poses. 2. No; it is rude to leave have rung off. 3. Yes. 4. This is entirely optional; she may if she wishes, but it is seldom done. And the man should never be the first to extend his hand. 5. No. A pillow will be furnished without extra charge if requested. 6. The food should always be taken from the side of the spoon, and never from the point.

Frozen Vegetables

The pack of frozen vegetables in Canada in 1938 increased to 590,000 pounds from 126,000 pounds in 1937, the principal increase being in peas and corn on cob. New factories were opened in British Columbia and in Ontario. and efforts will be made during 1939 to establish freezing units in retail stores. At the present time, the bulk of this product is sold to the hotel and restaurant trade.

Canadian Dairy **Industry Studied**

Ontario And Quebec Liberal M.P.'s Are Meeting To Devise A Program For Improving Its Condition.

As a basis for devising some pro gram to improve the condition of the dairy industry in Canada, a committee of 12 Liberal members of Parliament from Ontario and Quebec dairying districts has begun a detailed study of the place of that industry in the Canadian

Since the dairy industry now ranks with wheat production as a major branch of ag 'ulture dairy production being worth \$260,000,-000 last year-and employs more persons than wheat production, the committee is aiming at a program which will obtain for the industry a fairer share of the national income, according to its chairman, George Wood, Brant

Next to Wheat Farming After analysing the data being compiled by a sub-committee, the ommittee will draft a specific and detailed plan which it hopes will help improve the present position of dairying.

More Orderly Marketing While the whole picture is being examined, one phase being studied is the excess butter supply and means of diverting that milk to cheese production. More orderly marketing is another consideration. Then, with the prospect of wheat farmers broadening the base of their operations to include more general farming, possible increased dairy production from that angle is being studied.

Production Of Fruits In Dominion Has Been Showing An Upward Trend In Recent Years.

Production of the more importan

fruits in Canada have been showing an upward trend in recent years, ccording to the Agricultural Situation and Outlook for 1939, issued by the Dominion Departments of Agriculture and Trade and Commerce. In the case of apples production has been increasing steadily since 1926 and the 1938 crop, while only slightly higher than that of 1937, was more than 15 per cent. above the previous five-year average. Heavy new plantings in recent years indicate that the upward trend in production may be expected to continue for some time. The fact that apple production fluctuates greatly from year to year as a result of cult to forecast the price outlook of this product in advance. Ship ments of apples both in barrels and

boxes for export were sharply higher in the fall of 1938 than in the previous year.

McIntosh Reds Lead Thirty-three commercial nurser-les reported to the Dominion Department of Agriculture on sales of trees during the year ended March 31, 1928. Apple trees led the list at 441,187, two-thirds of which were winter varieties. McIntosh continues to lead all other varieties for planting. Other sorts that continue to be popular are Duchess, Mo'ba, Yellow Transparent, Fameuse, Wealthy, Cortland

Many communities in England are limiting dance hours to mid-

Understand Drugs Dean R. O. Hurst of the Ontario College of Pharmacy recommend pharmacy as a course of study for girls, especially those contem

plating marriage.
"The course in pharmacy is of exceptional practical usefulness. No other college course contrib-utes quite so much knowledge useful to the wife and mother. Even in such arts as baking or cookery understanding of the principles of pharmacy is invaluable. It is especially valuable to the mother of a growing family, improving her knowledge and judgment in the care of children."

The BOOK SHELF By ELIZABETH EEDY

By Walter Amstutz You don't read this book. You look at the pictures. Each page carries five or six photo illustraera which analyse for you every ski-ing movement in all essential phases. Individual details can be studied at leisure with the help of the printed explanation at the side of each picture. As a handbook it is excellent.

Mr. Amstutz' book is the result

of the careful study of a lifetime spent on skis. Both the beginner and the expert will benefit from what he has to teach. "Ski-ing from A to Z" . . . by Walter Amstutz . . . Toronto: Ox-

Children Of 14 Eat The Most

Food Consumption Of Human Being Is Highest At That Age

The small baby does not require as much energy producing food as the active boy or girl. The baby of one month of age needs about 506 calories in 24 hours; of two months, 610 calories; of 5 months, 750 calories; of 10 months, 900 ca ories; of 12 months, 1000 and of 24 months, 1200 calories per day. After this time, however, the child begins activities which increase greatly the demand for energy food because the child is also at this

time growing at an exceedingly rapid rate. Fewer Calories Needed Thereafter tempts have been made to set up standards of food requirement for children of various ages. The calories required increase steadily with age, reaching a peak at the

age of 14 after which there is a drop.

It must be remembered that for energy requirement of the body it is the carbohydrate foods which are chiefly important. In carbohy-drate foods we include not only sugar but also all of the cereals like oats, corn, wheat, rye, rice, barley and similar grains. Once children objected seriously to such foods because they were monoton-

ufactur

or taste may be met by the foods that are available. Supplementary estimates announced by the British Government included an appropriation of \$445,550 for participation in the

Fewer Tourists Entered Canada

During 1938—Volume of Mo tor Travel Declined

Tourists visiting Canada in 1932 spent an estimated \$269,999.998 compared with \$290,000,000 in 1937, according to a preliminary report Statistics. Expenditures of Canadian travellers abroad were esti 000,000. The favorable balance to Canada on her international tourist account may be placed at \$149,000,000 in 1938 compared with

Though Visitors Spent Millions Volume of motor travel to Canada declined in 1938, the total number of automobiles entered for touring purposes being 4, 346,645 Estimated expenditures of motor ourists in Canada were \$178,000,-000 compared with \$181,332,000 in

as reported by immigration officers, totalled 757,860 in 1938, a decline of 137,097 from 1937.

There are 40 million Ukrainian people, most of them in Russia.

WONDERLAND OF OZ

Guph was very glad to be permitted to go with this promise of assistance from the First and Foremost. The owl-man led him back down the mountain path and ordered the scarlet alligator to crawl away and allow the gnome to cross the bridge in safety. After the visitor had gone, a brilliant and gorgeous city appeared upon the mountain top, clearly visible to the eyes of the gaily diresed multitude of Phanfasus that lived there.

The First and Foremost, beautifully arrayed, addressed the others: "It is time we went into the world and brought sorrow to its people. While we have remained here many, nations have grown happy and prosperous. It is lucky that the gnome came to remind us to make trouble. We will use the tunnel to conquer Oz, then we will destroy the gnomes and their allies and afterward go out to rayage and annay the whole

Dorothy and her fellow travellers rode away from the Cutiencilly village and followed the indistinct path as far as the sign post. Here they took the main road and again proceeded on their journey. When evening came they stopped at a dwelling and were welcomed and given food and good beds for the night. Early next morning, however, they were un and eager to start and af-
