Gardening

.......

Most common mistake made by

he new gardener is that of

erowding things too close togeth-

er. In planning layouts it is es-

sential that the mature height and

width of the flower or shrub or

tree be kept in mind and sufficient

In every reputable seed cata-

logue and in most special govern-ment bulletins there will be found

along with descriptions of various plants the height when full grown.

This can be used as a guide in the planning. Roughly, space between

plants should equal mature height. Thus a shrub like the ordinary

white Spirea, which averages about 6-7 feet in height in most

parts of Canada, should have 6-7

feet between it and its neighbo

and be this far away from walks and almost as far from fence or

HOT BEDS

When a large number of early plants are needed, these can be

started from seed in a hot bed. The latter consists of a bed of

fresh horse manure, which supplies the heat, about 18 inches

deep. On this two or three inches of fine soil is placed and after the

bed has heated up and then cooled

down again (a matter of three

or four days) the seed is sown in

rows a few inches apart. The bed

is protected by rough boarding along the side and on top and

sloping toward the south about 10 to 18 inches above the bed is plac-

ed a window sash well glassed. When the plants have developed

their second set of leaves they are thinned out and before being

trans-planted outside they are hardened in a cold frame which is

simply a hot bed without any heat-

REPAIR HUMAN BONES Use of animal bones as pegs, patches and fillings in human imb-mending operations are de cribed in The Lancet by Dr. E. W. Hey Groves, emeritus professor of surgery at the University of

Bristol, England. He explains how he used a walrus tooth to fill a hole made near the head of a thigh bone by scraping out diseased bone, use of a peg made of stag's antier to pin the head of a thigh bone to the shaft after it had been broken off, use of beef bone to fill a groove in an upper arm bone after an operation toring to Campbellford, and about half way on his journey the rab-

ENERGY TO RUN THE EARTH Recent advances in atom-smash-ing have started scientists on a new and apparently narrowing hunt for the secret by which, they say, a few pounds of uranium may be made to run all the light, heat and power plants on earth. Dr. G. Hahn of Berlin is reported to have found an energy of 200,000,-

060 volts in an exploding atom of uranium. If every atom in one gram could be exploded with a discharge of 200,000,000 volts it would produce energy amounting to 10,000,000 kilowatt hours.

That much energy looms large beside the 1,400,000 kilowatt capacity of Boulder Dam, which cost \$126,000,000 and will have a power capacity of 1,890,000 kilowatts

sins in his body. By saying that Christ bore our sins in his body we do not mean to indicate in any way that Christ was sinful, but that he took to himself all our sins, and therefore took our place

sins, and therefore took our place as a sinner, and bore the penalty for those sins. Upon the tree. That we, having died unto sins, might live unto righteousness. By whose stripes ye were healed.

25. For ye were roing astray like sheep. But are now returned unto the Shepherd. The word "shepherd" includes all that Christ does for our souls—loving care, feeding, instruction, guidance, government. And Bishop of your souls. The word here translated "bishop" refers fundamentally to "an overseer." "an overseer."

BOOK SHELF By ELIZABETH EEDY

FOR THE GARDEN LOVER Now that the season has advan ed far enough to permit the gardseed catalogue stage, we begin to think of planting things and doing something about the garden in a big way.

Musson's have just brought out two new books, very instructive as well as attractive, that will tell you just about everything you want to know. "Canadian Home Gardening the Year 'Round' deals with the subject in all its branches, indoors and out-fruits, flowers and vegetables; lawns, roses, shrubbery, beds and borders. 'Gardening as a Hobby" has excellent charts and photographs, uses on Sunday, March 26. This trip tables to supply the reader at a glance with information on planting methods for annuals, perennials, roses, buibs and lawns. Here in quickly available form, is the necessary data about grafting, fertilizers, cold frames, insects, plant diseases and the like. "Canadian Home Gardening The

Year 'Round' by A. B. Cutting.
