SYNOPSIS

Chipping has been a master at the Brookfield School for twenty years. Shy and diffident, he has not succeeded in making friends with the boys. He fails to get the expected Housemastership because of that inability to make friends with the pupils. He is very disap-pointed, and accepts the invita-tion of a fellow master, Herr Max Steafel, to go with him on a walk-ing tour of the Tyrol. Caught in the mountains in a mist, alone, he hears a woman call. Thinking her in danger, he clambers up through the mist, and finds an English girl, Katherine Ellis. It is after night-fall when the mist lifts and they start down for the inn, each hav-ing made a deep impression on the

CHAPTER VI In A Viennese Ballroom

They met a searching party, headed by Max Staefel and Kathie's friend, Flora, and several guides, coming to hunt for them. The girls fell into each other's The girls felt into the control of the girls hand again and again. Kathie told of Chipping's climb up the mountain in the mist, going, as he thought, to rescue her when she was in danger. The Tyroleans knew the dangers that beset a traveller overtaken by the treach-erous mists of the mountains, and the story of his action soon spread

among them.

After getting thoroughly warmed, they were invited into the bar where a dozen or more persons were gathered. The landlord poured a glass of cognac for everyone and then raised his own at arms

"To the health of the hero of the mist," he said, "the honorable Mr. von Chipping!"

Everybody raised their glasses and drank- shouting, "Servus!" while Chipping and Kathie smiled at each other in an embarrassed way. Kathie lifted her glass to

cles at the various inns. Once he was sure he had found them, until a suspicious, middle-aged Englishwoman came out and threatened to go to the British consul if she so much as set eyes on him and his friend again. They fled from

They took a river steamer to make their entrance into Vienna, and floated down the Danube.

"Why do they call it the Blue Danube?" asked Max as they neader the landing place. "It looks brown to me."

"There's a legend, you know, that the Danube is blue only to those of—well, of people in love," "Ah so? You surprise me."

After a silence Max suddenly asked: "Chipping, the Danube does not by any chance look blue to you, does it?" you, does it?"
"What do you . . . Really, Stae fel, you do talk the most infernal

rot sometimes!"

They had got their luggage and were turning to leave the landing platform when Chipping, glancing by chance back at the steamer, came to a sudden halt, only to run back, leaving Staefel astounded.

Down The Danube

Chipping rushed up to Kathie and Flora, just disembarked from

the same river steamer, in centre of the landing stage.

"Miss Ellis! Well!" he beam "Miss Ellis! Well: he desire. "And Miss—er—" His eyes wandered back to Kathie. "Well, of all the! . . . Well, how do you do."

"But, my dear young lady," he stammered. "I—I'm at a loss . ."
He broke off abruptly and turned to Kathie. "Miss Ellis, I'll say good night. I hope you'll be none the were..." the! . . . Well, how do you do.
"Why, Mr. Chipping!" exclami
ed Kathie, her hand going ou impulsively to him.
"I'd just about given you uper . . . I hoped I might run into

you."

"And now we have."

"Extraordinary, isn't it?"

A few evenings later, the four of them were together in a ball-room filled with officers in striking uniforms and attractive women in beautiful gowns. The orchestra played a Strauss waltz and many

couples, including Max and Flora, were dancing. Chipping and Kathie sat at a table listening to the music, watching the dancers. Max and Flora floated past, waltzing to the dreamy music. Chipping leaned toward his com-panion, comic confidence in his

voice, and asked: "Tell me, are those two-er-do you they're—in love."
"No." She shook her head. "I wouldn't know."
"Have you never been in love,

Mr. Chipping?" She looked at him pipe, listening to the singing in the bar, and then voices below and cries of "Gute Nacht" as the Tyquiet amusement. "No . . . Yes, I was once. Rather a long time ago. I was fourteen. She was the greengro-Suddenly a light sprang out in cer's daughter." "Papa and Mama intervened, I

the adjoining room, and then Kathie stepped out on her little suppose?"
"Yes. So did the greengrocer." balcony, but a few feet away. Chipping half stood, and then, A pause followed their laughter. "A pity it-all this-has to end fearing of attracting attention to himself, sank back in the chair. "For us, but not for you. You have three weeks yet. It's been wonderful." "What are you doing out there,

"For me, too . . . We shall have a lot to remember—our adventure in the mountain—" the moonlight."
"I should think you had seen "That white sea, drifting\_" "We were castaways. What will

Long-Sleeved Dinner Type Of

They are long-sleeved dinner gowns in jerseys or plain wool.

The extra warmth they will give is welcome, it is considered, owing to the care that will be exer-

cised in the heating of rooms. There will be a vogue, dressmakers believe, for the dinner gown, as a result of the return of the evening at home. Smart cocktail party and bridge party clothes will also be wanted.

> Matched or Mixed Two-Piecer

PATTERN 4195 By Anne Adams

A corner on the college "style market" has the blouse and skirt outfit. It's so smartly inter changeable with other members of the wardrobe. This tailored two-piecer by Anne Adams is made from easy-to-follow Pattern 4195. The military blouse, which may have long or short sleeves is panelled in front for a becoming bustline. It looks smart with a trim collar or with just the nicely-shaped neckline alone, See how the bottom curves gracefully to slim your hips. The skirt is cut on the bias and made in just

two easy pieces.
Pattern 4195 is available in misses' sizes 12, 14, 16, 18 and 20. Size 16, blouse, takes 11/2 yards 54 inch fabric and skirt, 1% yards contrast.

HONEY IN WAR TIME USE IN HOME COOKING Now, that we are at war, although not on rations, we have been asked to do our part by the conservation of food. There is conservation of food. There is really nothing new about honey being used as a common sweet for human consumption, in fact it is very old, being used before the introduction of cane sugar. It is recommended for children and those finding difficulty with digesthose finding difficulty with diges-tion. The reason for this is that honey is made up of three Sigars—levulose, dextrose—and small quantities of sucrose. The first two are classed as invert sugars or predigested sugars. Levulose is the sweetest sugar so far found in nature and is the predominat-ing sugar of honey. Dextrose is the predominating sugar in com-

mercial syrups. Hot.ey varies in color from light to very dark according to the flowers from which it is gathered. The color does not affect its food value, but the lightest in color has a more delicate flavor. Honey may be substituted in recipes for sugar, if a few rules are kept in mind. Honey is always measured in liquid form and when substitut-

ing for every cup of honey used, reduce the liquid called for in the recipe one-fifth. One cup of honey is the same in sweetening pow-er to one cup of sugar. But honey and sugar differ in their chemi composition,-sugar is a straight sweet containing no moisture or acid. Therefore in some recipes such as light cakes, etc., it is best to use equal quantities of sugar and honey; but in dark cakes, muffins or fruit cake, honey gives practically the same taste. ½ teaspoon soda to one cup of honey and be sure and increase the salt ½ teaspoon. In recipes where a thickening agent of flour or cornstarch is being used, add the horey with this agent. These recipes have been tried

Canadian Hog **Quality Better** The quality of Canadian hogs, as

indicated by grading results, has been steadily improving ever since the inauguration of the National Bacon Hog Poli y instituted by the Dominion Department of Agricul-ture in 1922 and this improvement has rapidly increased within the past few years through the greater industry by the establishment of the bacon quota with Great Brit-ain. This is shown by a comparison of the years 1934 and 1938. In 1934 there were 3,025,161 hogs all graded, of which 19.1 per cent. o them were selects; in 1938 the number of hogs graded was 1,940, 161, showing the percentage of selects at the increased figure of 29.5. These figures refer to live gradings, and the smaller number of hogs shown for 1938 is due to the fact that 1,305,324 hogs were grad-
