awful?"

Charles Edward Chipping, a paster at Brookfield School for 20 years, has never been able to nake friends with the boys due to having fallen out with the early in his first term. The Ger-man master persuades him to accompany him on a walking tour of the Tyrol one summer. He is caught in a mist on the mountain and in the fog climbs up to "res-cue" an English girl, Kathie Ellis. They are both greatly attracted o each other and meet again in Vienna where Kathie persuades him to dance with her.

CHAPTER VII "You Kissed Me!"

Dancing with Kathie did strange things to Chipping: his heart beat faster than it had for ages; a feeling of contentment, of happing the strange of the stra ness, flowed through his veins; even his muscles, unaccustomed to the movements of the dance, limbered; almost it was as if he were floating about in the mists of a mountain top—alone with Kathie.
"Like it?" he asked, with a tentative smile of tenderness.

"As much as you hoped?" "And more. You're doing splendidly."

Many eyes followed them about the ballroom, for Katherine Ellis was a strikingly beautiful girl, and Chipping cut a fine figure in his rented evening clothes, for he had never put on excess weight and he was half a head taller than Kathie. Max and Flora turned amazed eyes upon them every time they whirled past. "Evening dress is very become ing to you, Mr. Chipping," Kathie

He preened a little at the compliment. "You approve?"

"Heartily."
"Then I suppose I shall have to As time went on the dancers thinned, but Chipping was on the floor with Kathie for every number. The last waltz, Strauss's dreamy, half melancholy "Wienerwas drawing towards its

The Bride Enters
"Is she in the scholastic line?" Max, after hesitating, replied:

"I thought so! Plain as a post, I suppose?"
"My dear fellow, please!" begged Max. "She is Chipping's "Is it as bad as that?" asked

Hildersley in dismay.
"No, no!" exclaimed Max eagerly. "Do I give a wrong impression? She is a good creature. Her nose is perhaps a little red—"
"Good Gad!" cried McCulloch.
"Does she drink?"
"No. no—it's only indigestion. "No, no—it's only indigestion.

Raven jumped to his feet. "I'm "No, please," said Staefel. "I told Chipping to bring her in to meet you this afternoon. They will be here any minute. You must be kind to her for Chipping's

sake!" "He's bringing her here!" Masters, who had remained silent dur-ing the clamour, got up, his eyes staring at Max as though they might pop out.
"He might at least have had the good sense to keep the woman to himself?" said Hildersley.

"Women aren't allowed in this room in any case?" said McCul-

loch.
"Hush!" warned Max. "I hear them coming!" "This is a nice start for the new term!" said Raven gloomily. The door opened, and Chips appeared shyly in it and stood hesi

(To Be Continued)

Should Brush Hard For Sound Teeth

The soft, highly-refined food we eat is one of the main reasons for the necessity of regular tooth-cleaning. Sweet, sticky, starchy foods cling round the teeth; hard, fibrous ones do not. Brushing removes stray particles and gives the gums the regular massage they require, but the bristles of the toothbrush should be only comfortably stiff, in other words, it is better to brush hard with a softisi brush than to skimp your brushing because a hard brush curt you.

Pack Soldiers' Gifts Carefully Mrs. Vincent Massey Reminds Of Penetrating Perfume of Soap in Parcels

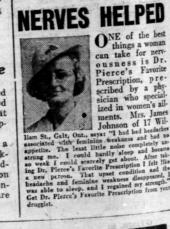

Mrs. Vincent Massey, wife of the Canadian high commissioner, to London, tells a story of a parcel of candies sent to a Canadian soldier during the last war. A cake of soap was carefully packed in the same box and penetrated the candies so much that even beiling them didn't remove the taste of Bottled Fruit Always Welcome Mrs. Massey added that might be taken as a word of warning to

packages to friends over here, no She also suggested it would be a good idea for Canadian women when bottling fruit this fall to do an extra half-dozen or so. These could be sent to friends or troops in England to relieve the monotony of their diet should rationing

Manners Just Common Sense

eccme very strict.

Mrs. Fredericks, newly-crowned ueen of etiquette in the United States declared last week that good manners were merely the application of common sense.
"You wouldn't cut meat with a butter knife; it would be awkward," she said. "Combine kind-ness and courtesy with common sense and you never need to consider whether your manners are

# PARADE ...

"After you, Adolf!", "After you, Neville, Edouard!" The chiefs of Europe's warring powers were still doing the Alphonse-Gaston act in the ninth week of conflict. Neither side wanted to drop the first bomb and inaugurate a rain of terror from the air on civilian sentres. So the war, as pictured in prophetic horror stories these many years past, had not yet be-

that Hitler had to attack sometime or accept slow strangulation from the Allied blockade. Would his grand offensive begin with an assault on the Maginot Line? with a drive through Belgium?
with mass air attacks on British
and French cities? or a smash
through the Netherlands? Developments along the diplomatic from seemed to indicate that if Germany's bug push were scheduled for this autumn, it would come through Holland—the easiest land pperation, and perhaps the most profitable, yielding submarine bases and airpiane bases for heavy raids on England.

The week brought news of the first British soldier killed in ac-tion on the Western Front (William Roper, 28, of Dewsbury, Yorkshire); of the massing of 18 German divisions on the Nether-lands border, from Emden down to Munster; of the Allied pursu over several seas of the German pocket battleship Deutschland (which captured the City of Flint) and Admiral Scheer; of air en-gagements between French and German planes. Most listened-to speeches of the

week were made by Premier-For-eign Minister Molotov of the Sov-let Union who told the world that THEY DO CHANGE COLOUR go to college these days but also change colour, a well-known speci-Russia would not fight on the side of Germany; neither on the side of the Allies whom he accused of alist in this country has studied recently the rainbow complex of seeking new excuses for continuthe carp-that most abundant of ing the war. Premier Mussolini, head of another neutral nation, all fish species. spoke more vaguely saying that Italy is preparing for the future and will "strengthen her will and forces for tomorrow." Were there threats behind those words? MICKIE SAYS-

In north-eastern Europe Fin-nish-Russian negotiations continu-ed to hold the diplomatic spot-light. The possibility was strong that differences would be settled by Finland agreeing to accept a strip of Russian territory in re-turn for aiding Russia to improve Leningrad's defensive positions. In southeastern Europe new cominations of Balkan powers, with Russia, Turkey, or Italy as spon-sor, were looked for to stop German expansion in that direction.

The Mediterranean, a quiet spot since the war started, was expected at any moment to become a No.

Things were happening on this continent too. Repeal of the arms embargo clause of the U.S. Neutrality Act released millions and nillions of dollars in British cash for purchase of planes and muni-tions in the United States. Canada, now Great Britain's banker over nere, began at once to play a big part in the transactions, with Arthur B. Purvis of Montreal as head of a British purchasing Com-mission placing war orders ir the United States. Further steps were taken dur-

ing the week to make Canada the air training centre of the Empire. Said an article in the Sunday Times (London): "The establishment of Canada as the air training centre for the Empire is a logical consequence of a number of factors: First, Canada's record n the air; second, its industrial capacity; third, its nearness to American supplies of engines, planes and technical experts; fourth, its comparative isolation

it does not matter how you strike note, or whether with a finger or an umbrella handle—it will al-says sound the same. Musicians liffer, and maintain that such sci-antists must be tone-deaf. Now scientist-musician in Chicago, Moissaye Boguslawski, has inventnd a delicate scale for measuring the exact strength with which the actes are hit, and he found that while playin, Rubenstein's "Stac-cato Etude," lasting six monutes, his fingers registered a total strik-ing force of 14,000 lbs. John W. Thomas, President of the Firestone Tire & Rubber Co., beside the largest tire ever produced by the rubber industry. These are now being manufactured by Firestone. Weighing more than 2600 pounds each and capable of carrying a load of more than 36,000 pounds apiece, these tires are in regular and exclusive production by Firestone for use on the latest types of earth moving equipment. They stand more than nine feet in height and have a cross section of close to three feet.

Without tires of this size earth moving trailers of the capacity in use today would not be possible and consequently steam shovels with such large capacity would not be advantageous. Pneumatic tires are the only equipment that would float these tremendous loads over rocky, rough ground and wet, soggy terrain.

The tube in one of these latest giant tires weighs 150 pounds and the protecting flap more than 50 pounds. It has thirty-four plies of gum dipped fabric but surprisingly enough only requires 35 pounds of air. The four tires on each piece of earth moving equipment have a load capacity of 75 tons.
