Matthew places the giving of the Lord's Prayer in Christ's great Sermon on the Mount (Matt. 6: 5-15), which occurred much earlier than the teaching we are now consider Christ may have delivered this prayer once spontaneously to a large number of disciples, and ain, at the request of a disciple. small group who were not preent on the first occasion. This ticular passage on prayer, found Luke, is unique among the three

Gospels.

Prayer Line of Jesus
Prayer Line of me to pass,
Luke 11:1. And it cally retain
as he was praying in a cell
place, that when he ceased, one of his disciples said unto him, Lord, teach us to pray, even as John also taught his disciples. The disciples after living in the company of Christ for perhaps two years were dissatisfied with their own prayer life, primarily because they had discovered that the prayer life of Jesus had greater depth, was more intense and earnest, manifested more faith and trust, was in every way a richer experience, than

2. And he said unto them, When ve pray, say, Father. In the Old Testament God is seldom spoken of as a father, and then in refer ence to the nation, and not to the individual. Christ gave the disciples a true revelation of the Father (John 1: 12 and 3: 3; Rom. 8: 23; Gal. 4. 5). Hallowed be thy name. The word here translated "hallowed" means rendered or declared sacred or holy; to consecrate. Thy kingdom come. A kingdom is an area over which a king rules in sovereign power. The kingdom of God is God's sovereignty or rule, and that means the fulfillment of his will, it is a moral and spirit ual kingdom. To pray this prayer sincerely involved the submission of all of our life and interests to the sovereign rule of an infinitely holy God.

The Lord's Prayer 3. Give us day by day our daily bread. The prayer acknowledges that we are indebted to God through simple boons; and asks for the all; asks them only day by day; and asks for no more.

4. And forgive us our sin; for we ourselves also forgive every one that is indebted to us. And bring us not into temptation. The program of the Christian life is pardon, sanctification, holiness There is something radically wrong with us if sin has as great a power over us today as it had, say, ten years ago.
The Lord's Prayer has been call-

ed "the epitome of the gospel" and the "pearl of prayers" because of its: tone of holy confidence; its absolute unselfishness; the spirituality of its seven petitions; its nce of all vain repetitions. 5. And he said unto them, Which of you shall have a friend, and shall go unto him at midnight. and say to him, Friend, lend me three loaves: 6, for a friend of mine is come to me from a journey, and I have nothing to set before him; 7. and he from within shall answer and say. Trouble me not: the door is now shut, and my children are with me in bed: I cannot rise and give thee? 8. I say unto you, Though he will not rise and give him because he is his friend, yet because of his importunity he will arise and give him as many as he needeth. This parable is parallel to that of the unjust judge (18:1-8). It also teaches that prayer must be rtunate and persevering; and so far as the two parables differ. the one shows that prayer is never out of season, the other that it is sure to bring the blessing and not a curse. In this parable we find a selfish, unfriendly excuse for refusing the request - whereas our Father is perfect love and kindnes, and instead of excuses offers

"It Shall Be Given" 9. And I say unto you, Ask, and it shall be given you; seek, and ye shall find; knock, and it shall be opened unto you. 10. For every on that asketch receiveth; and he that seeketh findeth; and to him tha knocketh it shall be opened. By our constant asking, seeking, and knocking we reveal the earnestness with which we petition God for that which we want, 11. And of which of you that is a father shall his son ask a loaf, and he give him a stone? or a fish, and he for a fish give him a serpent? 12. Or if he shall ask an egg, will he give him a scorpion? 13. If ye then, being evil, know how to give good gifts

unto your children, how much more shall your heavenly Father give the Holy Spirit to them that ask him? As earthly fathers prove themselves athers by giving good gifts to their children, so your Father provs to you that he is indeed your Father and you are indeed his children by giving to you, in answer to your asking, in your need, the hings beneficial to you, or as Luke has it, the Holy Spirit, at once naming the highest and greatest spir-

itual gift, involving every other spiritual gift, and certainly thus also every necessary temporal gift. The supreme and extreme are often used in the Scriptures so as to include all that is less. We receive the Holy Spirit at first when we are born again; but the prayer life is the life that is always seeking and always receiving, the filling, the infilling, the overflowing of the

Good Hogs Need Lots of Minerals

young pigs will develop into high quality bacon hogs. To obtain such young pigs, a balanced ration well supplemented with minerals is essential. Too many losses still occur on the average farm, especially in

young pigs, due chiefly to a de-ficiency in the ration, states U. Pilon, Livestock man at the Do-minion Experimental Station, Kapuskasing, Ont.

A liberal feeding of minerals will not only prevent most of these losses but also better daily gains and a lower feed consump tion per pound of grain will be obtained with growing and fat-

tening pigs. Four Most Helpful In hog feeding, four mineral elements along with salt are helpful, namely, calcium, phosphorous, iron and iodine. All other mineral elements are usually present in sufficient quantity in ordinary rations. Pigs require less salt than cattle but ne a better utilization of feed will usually result from its feeding. Calcium and phosphorous are also imporant to prevent rickets, weakness, short lactation and paralysis in hind legs with nursing sower Furthermore, it is admitted today that Iron is an

fective remedy against the all too

common disease in young pigs

called anaemia. Also goitre and

hairlessness can be easily pre-

vented by feeding iodine to the pregnant sow. Chemical analyses have shown that the grains and their by-prolucts are generally low in some of the essential minerals and to e sure that the ration is not deficient, it is advisable to clude 3 to 4 per cent in the dry meal mixture for brood sows and 2 per cent for all other pigs, of mineral mixture such as ground limestone 50 lb., bone meal 25 lb., and iodised salt 25 lbs. Iron the form of iron sulphate at the rate of 2 lb. in the above mixture can be fed if anemia

Our Indians May Move to States

After First of Year Many Expect to be Naturalized As American Citizens

Announcement Canadian Indian may become citizens of the U.S. by naturalization on and after January 12, made by Charles H. Berry. Superintendent of Indian Affairs at Washington, probably means an important movement of Ontario Indians to adjacent New York State, border officials commented. At the present time Canadian Indians have no way of becoming American citizens, and as such are at times denied jobs in various Buffalo fac-

TO NEW YORK STATE This is important in view of the huge national defence program across the line. The enabling naturalization bill was signed by President Roosevelt on October 14, and becomes effective 90 days after his signature. In the past few Canadian Indians have crossed the border at Fort Erie to take up residence in adjacent New York State it is estimated.

300 Kinds of White

One of the most difficult pro fession in the world is that of matching colours and tints. It cannot be taught like an exact science, for one must be born with a sense of colour. This, of course, improves with practice. One of the biggest colour firms has a huge laboratory stocked with special instruments for making and testing colours, but the final test of matching lies with the eye, and a well-trained matcher can detect no fewer than 100,000 hues and tints. If, for nstance, one twenty-thousandth part of an ounce of red is added to an ounce of yellow, and the whole well mixed, the expert eve can see the difference between the mixture and pure yellow. The key men of this profession can detect the difference in more than 800 shades of white and almost as many of black!
