#### SUNDAY SCHOOL LESSON

JOB TEMPTED TO DOUBT GOD'S GOODNESS — Job 1, 2 Printed Text, Job 2:1-13 Golden Text: "In all this Job si ned not, nor charged God foolish-

ly." Job 1:22. THE LESSON IN ITS SETTING Time - Probably in the Mosaic or pre-Mosaic age.

Place — The land of Uz, which was east of Palestine and north of

In this lesson we are introduced to the study of the character of a truly righteous and godly man: he is righteous in his service to God; he is deeply and conscientiously re-ligious in his solicitation for the apiritual welfare of his own childsolute trust in God, even in the days of trouble, losses, and great physical sufferings.

Job was not a sinless man - he never put forward any such pretension. It is admitted that Job was as actual historical character. The description of Job's prosperity i considerable wealth, similar to a earlier description of Issac (Gen. 26:14). Verse 5 is one of the most beautiful passages in all the Bible, revealing the profound concern of a parent for the spiritual welfare o the children of the family. JEHOVAH AND SATAN

Job 2:1. Again it came to pass on the day when the sons of God came to present themselves before Jehovah that Satan came also among them to present himself before Jehovah. 2. And Jehovah saiunto Satan, From whence comest thou? And Satan answered Jehoval and said, From going to and fro in the earth, and from walking up and down in it. 3. And Jehovah said unto Satan, Hast thou considered my servant Job? for there is none him in all the earth, a perfect and an upright man, one that fear-eth God, and turneth away from evil: and he still holdeth fast his integrity, although thou movedst me against him, to destroy him without cause. 4. And Satan answered Jehovah, and said, Skin for skin, yea, all that a man hath will se give for his life. 5. But put forth thy hand now, and touch his bone and his flesh, and he will renounce thee to thy face. 6. And Jehovah said unto Satan, Behold, he is in thy hand, only spare his life. Satcompelled to admit his defeat so far, suggests new methods of attack, God allows Satan to afflict Job with great physical distress, and yet he is forbidden to afflict

him so severely that he should die 7. So Satan went forth from the presence of Jehovah, and smote Job with sore boils from the sole of his feet unto he crown. 8. And he took a potsherd to scrape himself there ; and he sat among the ashes. It is generally agreed that the dis ease of Job was the leprosy called elephantiasis; the form and countenance were so distorted by the disease that the sufferer's friends tient was haunted by horrible dreams and unearthly terrors; he was physically helpless.

JOB AND HIS WIFE Then said his wife unto him Dost thou still hold fast thine in-tegrity? renounce God, and die. 10. But he said unto her, Thou speakest as one of the foolish women speaketh. What? shall we receive good at the hand of God, and shall we not receive it? In all th

did not Job sin with his lips. The worst trial of all is who those nearest to us, instead of us etrengthening our hand in God and confirming our faith, conspire to destroy it. The counsel Job's wife gives is just that which Satan expected would be suggested by Job's own heart. Keen as the trial was, Job held fast his integrity. The issue of the second trial resembles that of the first. As before he had recognized God's right to take away as well as to give, so here he edmits it to be man's duty to accept evil from God as well as good.

THE THREE FRIENDS 11. Now when Job's three friends heard of all this evil that was come him, they came every one from his own place: Eliphaz the Te-manits, and Bildad the Shuite, and Zophar, the Naamathite; and they made an appointment together to ome to bemoan him and to com fort him, 12. And when they lifted up their eyes afar off, and knew him not, they lifted up their voice, and wept; and they rent every one his robe, and sprinkled dust upon their heads toward heaven. 13, So they sat down with him upon the ground seven days and saven nights, and none spake a word unto him; for they saw that his grief was very great. The day of darkmass had sifted the crowds of Job's professed friends. For the three who came we can have nothing but admiration. Their coming is probably prompted by love and symp

athy for him.
With the introduction of the three friends the prose narrative of the prologue (of the book of Job) is brought to a close. It is obviously tatended to enforce two main les sons: 1. that man is capable of dis-

Queen Elizabeth is pictured with Major-General A. G. L. McNaughton, commanding the first Canadian division, during a visit with King George to a southern England encampment where they inspected regiments of the Canadian Active Service Force.

I SAY, JUST A

MINUTE, GUV'NOR

LATE FOR HIMSELF The laugh of the week in the

radio world was provided by Professor E. T. Salmon of McMaster University, who is heard in a topnotch war commentary over CKOC each Sunday afternoon. Last Sunday Professor Salmon was sitting near the front of a street car crawling along James Street in Hamilton-when a young lady, obviously annoved at the slow progress of the tram, approached the motorman. "Can't you go any faster," the

young lady asked, "I'm in a hurry

and you will not be downtown by five o'clock." "What's all the hurry, Miss," inquired the motorman in the typically cheeky style of Hamilton tram driver

"Well, I always listen at five o'clock to Professor Salmon-and I don't want to be late." "At this rate you won't be the only one who doesn't hear me today, Miss," the commentator broke in.

With this, the tram driver put on some speed and everyone was

## Farm Notes .

(A department conducted by Pro-fessor Henry G. Boll, of Guelph, assisted by other members of the faculty of the Ontario Agricultural

QUESTIONS AND ANSWERS Q. What is the best degree acidity for ordinary farm crops? A. The optimum PH for crops is 5.5 to 6.9 pH.

Oats 6.2 to 7.0 pH. 7.0 to 7.8 pH. Alfalfa Clovers (Alsike Red and White) 6.2 to 7.0 pH. Corn (Field) 5.5 to 6.9 pH. Corn (Sweet) 5.5 to 6.9 pH. 5.5 to 6.1 pH. Potatoes 6.2 to 6.9 pH. Turnips Mangels

Q. Do you think that the shortage of boron, copper, zinc and manganese in our ordinary farm crops is njurious to quality of them? A. In answer to your second question I would say that we have not found instances of shortage of boron, copper, zinc and manganese n ordinary grain and grass crops. We have found some indications of boron deficiencies in alfalfa. We are investigating. Q. Do you think the by-product lime from the making of Calcium

yanamide is injurious? Are there

different acid correcting values of A. Answering your third question, I cannot see any objection to the using of the by-product lime of acetylene and liquid air. I assume that you refer to the manufacturing of vanamide where calcium carbide is heated in semi-vacuum and liquid air is supplied so that the nitrogen of the liquid air is taken up by the heated calcium carbide to form calcium cyanamide. The material in the refuse would

When calcium hydrate is exposed the atmosphere it quickly turn o calcium carbonate through tak ng up carbondioxids from the air The relative efficiency of three acidity are as follows: Ground Limestone, 2,000 lbs equal; Hydrated Lime, 1,480 lbs. qual; Burnt Lime or Calcium Ox

#### A Smart Farmer Flies To Market

"R. M. A. - Middlesex Co."

Arkansas Man Uses Private Plane To Get to the City 40 Miles Away

When Parks Shields of the Hopper community, Arkansas, wants to market a basket of eggs, can of cream, or other products from his garden and farm, he doesn't just straddle a mule or crank the family flivver as his neighbors do. He nerely goes to his private airplane hanger back of his barn, swings open the doors, steps on the starter of his small plane, taxies across he meadow, and within less than 30 minutes is in Hot Springs 40 miles away. Time was when travel from the Hopper community was exceedingly slow. It took two or three days for the older member f the Shields family to make the round trip in a linchpin wagon. But now the rough topography of the Ouachita hills is no barrier. Wings have replaced wheels and

even Little Rock is only an hour Parks Shields is a young air minded farmer of the hill country His boyhood ambition was to own and fly his own plane. He took fly ing lessons at the air field in Hot Springs and obtained a pilot's lt ense. Then he obtained a plane. for his private use and built a shed hangar and landing field on his farm. He visits local fairs and picnics in the surrounding country and adds substantially to his farm income. Neighbors ride for a look at their hill-farms from the air. Wings have conquered the Ocachi

## Etiquette BY ROBERTA LEE

Modern

\*\*\*\*\*\*\*\*\*\*\*\*\* Q. Are "howdy" and "how-do" correct greetings.

A. No, they are vulgarisms. The correct forms are "How do you do? Good morning. Good afternoon.

Good evening." Q. If a husband and wife have a woman friend at dinner, only the three persons, should the husband seat the guest?

A. Yes. He should seat the guest first and then his wife.

Q. Should a man constantly refer to his wife as she"?

A. No; this is disrespectful. Q. When meeting a friend you have not seen for a long time, is it all right to say, "Have you bee ? You are looking so thin"? A. Never. If you cannot truthfully say that the friend is looking well, it is better to make no remark at all as to your impression.

Q. When attending an informal dinner and a guest sees that an other guest is taking no part in the

Q. How can I most easily extract the white from an egg? A. If only the white of an egg is needed, don't break open the shell. Simply pick a small hole in one end ersation, what should one do? of the egg and drain out the white. A. A. The socks and the stockings

## HEALTH TOPICS

FRESH VEGETABLES Did you know that the tempting looking "heart" of a young, green cabbage is of lower food value than the outside leaves?

That is one of the items of information handed on by the Health League of Canada, in connection with the League's campaign to raise the standards of health and efficiency in Canada. Moreover, says the Health League of Canada, since some of value of cabbage,-vitamins and minerals-are lost in boiling, cabbage salad is more nutritious

It is pointed out, too, that price has little to do with the food value of vegetables. Brussels sprouts may cost three times as much as the humbler cabbage, by they are not one bit more nutritious. Canned vegetables, though they are put up in three grades: fancy, choice, and stand-

ard, are of equal value whatever the grade.
Inexpensive Items And here is a hint as to the cheapest way of obtaining tomato juice, without which lunch or dinner is not complete for a great many people: buy the lowest priced grade of canned tomatoes, says the Health League of Canada, and strain off the

juice. The residue may be com-bined with other foods or used n soups. One other suggestion: don't use soda to preserve the color in cook-ing green vegetables. Not only is it unnecessary if the lid is left off the pot, but it destroys the Health League.

#### "Asphalt Lake" Traps Animals

Prehistoric Fossils Are Found Near Russian City, Preserved in Ancient Tar

A prehistoric "asphalt lake," rich n animal fossils, has been discovered a few miles from the famous Soviet oil city of Baku, writes a correspondent to the London Sunday Observer. Many centuries ago the lake, little more than 300 square yards in area and six feet deep, was a mass of sticky asphalt which glis-

tened in the sun.
PRIMITIVE WILD HORSES In the early quaternary period, handreds of sabre-tooth tigers, primitive wild horses, deer, bears, and wolves, also other animals mistook the glistening surface for water, plunged in to quench their thirst and were caught forever in the sticky morass.

The fossil wealth of the Bakn "asphalt lake" which is compared by paleontologists to the famous "tar lake" in southern California, was discovered by a group of young Soviet geology students on an excursion.
