SUNDAY SCHOOL LESSON

JOB'S REPENTANCE AND RESTORATION—Job. 42: 1-13.
GOLDEN TEXT—And Jehovah turned the captivity of Job, when he prayed for his friends. Job 42:

THE LESSON IN ITS SETTING Time-Probably in the Mosaic or pre-Mosaic age. Place—The land of Uz, which was east of Palestine and north

From studying this lesson we should carry away one funda-mental thought—that one's con-ception of God, one's knowledge single idea that can ever come into a person's life, changing his own attitude toward himself. changing his attitude towards others, and giving him the noblest, loftiest, richest life possible for men on earth. When Job came to the right conception of transformed, and much that was

Job's Revelation After his experience of suffer ing, of great anguish of body, mind and heart, Job receives a glorious revelation of the power and wisdom of God as manifest a revelation which so overwhelms

proclaim the glory of God and his

own insignificance. Job. 42: 1. Then Job answered Jehovah and said, 2. I know that thou canst do all things, And that no purpose of thine can be restrained. 3. Who is this that hideth counsel without knowledge? Therefore have I uttered that which I understood not, Things too wonderful for me, which I knew not.

Job here shows the position which just thoughts of God will induce a man to take, even when God's dealings may be beyond his understanding. There had come to Job in the midst of his desolation, when all the props upon which he had leaned had gone, a vision of God which rought conviction that in the long issue no purpose of God could be frustrated.

4. Hear, I beseech thee, and I will speak; I will demand of thee, and declare thou unto me. 5. I had heard of thee by the hearing of the ear; But now mine eye seeth thee.

His New Vision Job's previous experience of God had been second-hand: now he has come to know God for himself, profoundly and intimately We too have heard of God by the hearing of the ear, but we need to come to deeper things,

closer things, with God. 6. Wherefore I abhor myself. And repent in dust and ashes. And the new vision of God brought to Job a new vision of himself. The new language of Job was that of complete submisson to God, and in that submission of his own greatness was

God's Rebuke

7. And it was so, that, after Jehovah had spoken these words unto Job, Jehovah said to Eliphaz the Temanite, My wrath is kindled against thee, and against thy friends; for ye have not spoken of me the thing that is right as my servant Job hath.

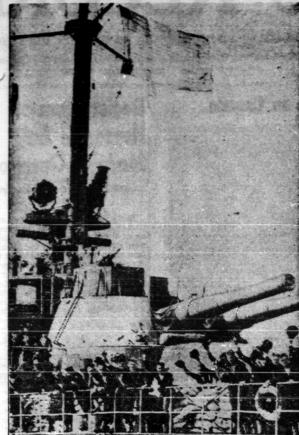

8. Now therefore, take unto you seven bullocks and seven rams, and go to my servant Joh, and offer up for yourselves a burnt-offering; and my servan Job shall pray for you; for him will I accept, that I deal not with you after your folly; for ye have not spoken of me the thing that is right, as my servant Job

9. So Eliphaz the Temanite and Bildad the Shuhite and Zophar the Naamathite went, and did ac cording as Jehovah commanded them: and Jehovah accepted Job. 10. And Jehovah turned the captivity of Job, when he prayed for his friends: and Jehoval gave Job twice as mush as he had before.

The Lord blames the three friends for not speaking that which was right concerning him, not concerning Job; he also commends Job for speaking what was right concerning him. The reference must be to theories the friends put forth in regard to God's providence and the meaning of afflictions. Job now is put in the place of intercessor for the three, a profound humiliation for them, and an honor for him. They obeyed Jehovah at once, showing that they had learn ed and listened, as well as Joh had.

Prosperity Returns 11. Then came there unto him ters, and all they that had been ters, and all they that had been of his acquaintance before, and

British Tars Seize French Warship

British sailors aboard a former French capital ship were beneat the French tricolor in a southern English port, according to the British censor-approved caption for this cablephoto from London. British action was taken to prevent the craft of France from being used against Britain—under Nazi direction.

Ottawa Takes Over Circus

Canadian Governm is not going into the circus business, but it has a circus on its hands, says a story in the Montreal Star. It is not a large circus—nothing like Ringling Brothers— but, nevertheless, with considerable equipment, a flying trapeze with a man on it—a fat lady and various freaks, along with hotdog and

pink lemonade equipment.

It appears that this outfit was being operated by Italians, travelling around the Maritime Provinces. The war caused the principals to be interned and the show taken over as a going concern, but not with the intention of keeping it going Officially, it is in "custody."

Electric Manure

The heavy tramp of German boots echoed in the train sheds at Quebec as soldiers, airmen, part

German Soldiers, Prisoners in Canada, March To Trains On Arrival Here

Some plants, like rice and clov er, obtain their nitrogen from the air, mainly through lightning.
This has made soil experts experiment with electric fertilization.
They are trying now to multiply the nitrogen content in the soil and stimulate the growth of bac teria by applying high-tension electric currents to their fields. Previous tests with water having a small nitrate content increased the by 800 per cent. In the fertiliznig experiments now in progress, a small plough is used to turn the soil, and the ordinary voltages used are stepped up to 15,000 volts. It is hoped that in time electric fertilization will eliminate
