Says It's Permissible **To Split Infinitives**

Committeeman Joseph Les of Boston, Mass., thinks school children and teachers in Boston should be permitted to wit infinitives "any damn way

Seek Travel Permits

A scene outside the passport affice in Westminster, London, as Britishers awaited permits for chlidren and relatives seeking to travel to Canada. The government is arranging to evacuate hundreds of children to the dominions.

He proposed in a motion at a committee meeting last week that School Superintendent Arthur L. Gould be instructed to issue an order advising the teachers and pupils that split infinitives are all "Too often," he charged, "lan-

guage is taught by a set of rules, rather than as a means of conveying thought." The committee, however, declined to immediately act on his motion.

Quebec Speed Laws Changed

Motorists Must Now Use Own Discretion on Open Roads

Quebec motorists are allowed t use their discretion in the matter of speed when travelling on hardsurfaced highways where there are no dwellings or buildings, as the result of an amendment to the Motor Vehicle Act passed by the Legislative Assembly but "an unreasonable speed," is forbidden. IN BUILT UP AREAS

The bill which is now operative, also forbids a speed in excess of 50 miles an hour on hard-surfaced roads to which dwellings or build-

ings have access. Motorists may travel at 40 miles per hour on mountain roads or on gravel roads affording good visibility in a straight line, but must also slow down to 20 miles per hour on winding mountain roads, on curves in commercial districts, in front of ools, at intersections and at the level railway crossings. It is forbidden to pass on a curve or when

olimbing a steep bill. SIGNALLING REQUIRED Specific rulings will also be en

reed in connection with signals. The bill states: "Every driver of a vehicle desin ing to stop, slow down or turn on the road must make the following

signals: Left turn: place the arm hori sontally: right turn: place the fore am upwards; stop or lessening o speed place the arm downwards. Every driver must stop at ever place where there is a stop sign.

No More Coffee For Italian People

Coffee is no longer available to Italian civilians, it was report in a broadcast picked up in

New York. Only the armed forces and hospitals continue to receive supplies of coffee, which are imported. Next to wine, coffee is the basic beverage of the Italian people.

SCOUTING....

One hundred Scouts and leaders representing six different troops of the Parkdale Area of Toronto paid their annual weekend visit to the 16th Troop of Buffalo, N.Y. Part of the programme was a sight-seeing tour, fter which the Canadian boys joined the American Scouts in decorating he graves of Buffalo's war heroes.

A field day programme for Scouts of the 1st Brant (School for the Blind) Troop of Brantford) was surprisingly like that of Scouts with all their faculties Each patron ran a mile, using "Scout's pace" (alternately walking and running so many paces). They erected a flagpole using five Scout staves and only four ropes, deciphered a message in Morse and treated a patient whose injuries were detailed in the message, and finally built a fire and boiled a pint of water. The afternoon's activiteis ended with . campfire and singsong.

In formally thanking Ottawa Boy Scouts for services rendered during the recent big Tri-District Conference of International Ro tary held in the Capital, Conference Secretary Norman G. Foster declared, "we would feel incapable of handling such a large crowd without the assistance of the Boy Scouts."

A composite troop of Kingston, Ont., Sc outs joined some 200 American Scouts of the Jefferson Lewis district for a week-end "Camporee" at Grass Point State Park, N.Y. The Camporee was one of a series of international Scout get-togethers of the adjacent border districts which began last year on the occasion of the visit of Their Majesties.

Timmins, Ont., Rover Scouts, under the direction of the police, proved so efficient in handling traffic during the recent North ern Ontario Scholastic Track and Field Meet at Timming that Chief of Police Gagnon is formulating plans for regular use of the older Scouts in handling the town's traffic problem. This probably will include directing traffic at the city's main intersections Saturday evenings.

able environmental conditions and proper child guidance. With intelligent guidance, a developing child not only can but will learn to con sider the rights and privileges of others as of equal importance with his own; he will learn to be socially co-operative and contributive; he will develop self-expressive, creat ive interests and activities; he will learn to tackle the daily problems and difficulties he meets with in telligent planfulness, efficient skill and perseverance.

"Nut" Drivers Found Menace

Ousting Urged; 15,000 Lives A Year Could Be Saved In The United States. Is Claim

Lives of the 15,000 persons killed traffic accidents in the United States each year might be saved if "nut drivers" were eliminated with mental tests, the American Medical Association was told at its conven Agreeing with popular opinion

Dr. Lowell S. Selling, of Detroit, Mich., reported that mental examin ations of traffic offenders in the recorder's court of that city showed that many of them had just about enough sense to turn a steering wheel and step on the accelerato The tests made on persons haled into court include a physical exam-ination and tests of reaction time, judgment of speed and distance, and color blindness. In addition, the of fenders are submitted to mental

tests, he said, and required to give their entire history in order to obtain their intelligence rating. "When intelligence is rated below normal a driver is obviously not competent to drive, no matter how well he may react mechanical ly." Dr. Selling declared, because his judgment in an emergency is

sure to be faulty. As a result many

licenses of drivers are cancelled.

onto something bigger and stra ger than we could have hoped for in our wildest dreams." Bob was beaming when he joined Mary Melissa again. She had waited near the chieftain's house. "Could you understand him Bob? Did you learn much?"

"Plenty! It wasn't all easy, fo aim or me either, but we had a great talk. These people are not Indians. I'm convinced of that I mean, not any tribes we know or have record of. They may h kin to the Hopis and Zunis and Acomas, but they're a tribe their own, right enough.

"Why 'Lissa honey, know what that old chief told me? This u the answer to our main question This tribe is the remnant of the cliff dwellers!" "Really, Bob?"

"Yessir! Centuries ago, ev dently, the ancestors of these villagers built Defiance Castle, and lived up there for protection. They farmed this valley, which has some springs in it; and the river courses on the other side of the cliff near our camp, ro-member? But enemies came raid-ing. They killed most of the other cliff dwellers, or took off the girls to be slaves. Probably the enemies were Yaquis, or Apach

"This castle, though, was hard est to attack, because it was so high and hard to get at." "Then what happened, Bob?" The girl was intensely interested.

. . . A Lost Valley "These people, I mean their ancestors, made a smart move. They destroyed their front lad ders, such as we built, abandoned their cliff home, and came into this hidden valley to live. The enemies didn't know about this valley, and there was enough rich soil here to support the few sur-viving cliff people. See?"

find this valley in time?" "No, they didn't. The raiders didn't live in this area. They came in from many miles away. When they thought all the cliff people had been killed or fled, they ceased coming." "But Bob, why haven't white

people found it? You say it's new to science, and these people are living as they did 500 years ago." "Look around us, 'Lissa. See the great cliffs—there? And there? And on all sides? This really is a wide box canyon, a shut-in valley. As you know, this part of the Mexican border is very sparsely populated anyway. Few travelers would ever have cause to get over here. If one happened along, or if an aviator saw this valley and village, he likely would think it some obscure Mexican settlement of no import ance. This may actually be in Mexico: I don't know exactly where the international line is along here. Remember, we are

many miles from any white town. So you see, sweetheart, we have really stumbled onto a lost king-dom." The Lost People It was all sort of fantastic, but

it made sense. The Lost People-Bob formally named them thatwere indeed a turn-back of the human calendar. Their kingdom would be a microscopic point on the vast map of the United States or of Mexico. And by a freak of geography and circumstance, they had remained completely o olated from all the rest of the world, unknown to it, and it unknown to them. Probably it could have happened nowhere else in North America save in this arid,

almost unknown southwest. These by carry a would be one curis on the mape, is always the of 10,000 epcs in the maze of rule.

mountains that make up Arizona, old and New Mexico. With Mexico. With stream for irrigation and fo drinking, the Lost People had existed here in a long self-suffi ciency, a tiny utopia in its way, gentlefolk who through many peaceful generations had lost their fear of enemies and their inclination to travel or expand. They were content to live and rest here, zealous worshipers of

the sun. "At least that's the best can do at interpreting the story old what'shisname told me," Bob concluded, to Melissa, "except for one rather important thing In fact, I think it's extremely important to you and me. Melissa.' "What is it, Bob? What did he say about us?"

"Why these Lost People think we're messengers from their god, the Sun. We're pretty important, demi-gods or something. We brought them a watch, yellow and shiny, a piece of the sun, as you bserved. Now they beg us not to destroy them, not to revea them to their ancient enemies outside. See?"

A Greater Sun God "Oh I can't imagine all this. I just can't, Bob. It wouldn't be

possible, if it weren't true!" "Check, I agree. But here w are. Facts are facts. They never saw white people before, espec-ially a beautiful white girl. You impress them tremendously sweetheart. I mean, you're greater sun god than I. because you're fairer, daintier, I imagine. They're going to stage a big party, a pow-wow and dance and all that, for our benefit. . . . Scared?"

Mary Melissa was so frighte ed at all this that she trembled bit. But she dimpled at Bob Barry. "Never, with you here, dear,"

she declared. (To Be Continued)

Champion Typist Likes Swimming

Oakville Girl Who Holds The World's Amateur Record Discovers It Keeps Her Quite Fit for Work

A cup of tea at four o'clock and lots of swimming during the off hours, that's the formula for overcoming typing fatigue as prescribed by pretty hazel-eyed Margaret Faulkner, of Oakville, Ont., who captured the world's amateur type writing championship in Chicago,

June 21st. Back at her job of demonstrating business machines in Toronto last week, Miss Faulkner, who clicked through the half-hour champion-ship event at the rate of d21 words a minute, told how aquatic sports eliminated her fears of suffering from tension or physical strain dur-ing the contest. "Either," she said, "would have made enough difference in speed and accuracy to have cost me the title."

TYPING'S STRENUOUS WORK "Hudreds of pounds are lifted luring the course of a day's typing," explained the new champion, "and that takes more than finger work. A great many muscles are giving subtle assistance every time the carriage is returned or the keys depressed, and I have found swimming the best way to develop

Miss Faulkner has kept up he swimming and diving ever since she started winning typing contests at business school. Three years ago she captured the Canadian amateur type-writing champion-ship and last year she was runnerup for the world's title.

Simple Pumps Are Standbys

No chie woman ever tolerates crooked or run over heels. She has new lifts put on her shoes the moment they begin to show signs of wear on the edges. And pumps are her old standbys. She may go in for novely shoes — platform soles, wedge heels and such now and then, but

she sticks mainly to pumps. She has dressy high-heeled ones in black patent leather or kidskin er white buck for summer and in black or brown suede for winter. And low-heeled ones in appropriate materials for casual, day time occasions in all seasons. She may dance in sandals and walk in oxfords, but she lives in pumps

Coiffure Styles Much Simplified

-ultra simple ones.

Hair styles must necessarily al-ter to be in harmony with new fashions. New York coiffeurs have looked to this, simplifying the arrangement of curls and uf-ually drassing the hair in a few smooth rolls over the crown and ender of the head while at the sides of the head, while at the back the ends are tucked in behind combs in a modified version of the swept-high coiffure. Neatness, doing away with any fluffy

Handy Hints

To remove whitewash from a cef ing, dissolve one pound of alum in one gallon of strong vinegar. Apply with brush, let soak in well and scrape and wash as usual. Always keep flour in a warm

dry place. Damp flour will neve make light cakes and pies. For whiter mashed potatoes a

boiled rice, add a pinch of crean of tartar to the cooking water. Mix grated or chopped carrot

into apple and other fruit salads They will add to delicious crunch ness,

Never leave sugar, raisins, cur rants or peel in paper bags. They all go moist and sticky very quick

Moisture in the refrigerator en courages the growth of bacteria, causing food to spoil. Wipe off all moisture inside the refrigerator and be careful to remove spilled

Some Suggestions For Care of Milk

Never Let It Remain on The Doorstep Exposed to Light

Getting a bottle of milk may seem like a routine thing, but much can be done to maintain its quality and flavor, says the New York State College of Home Economics. Here are some tips from the college: Buy the best milk you can af-

Have the milk bottle put into a covered box when the milk is delivered. Never allow a bottle of milk to stand on the doorstep, exposed to light.

Wash the outside of the bottle before putting it into the refrigerator

Keep the milk covered in a clean, cold place. Take out only enough milk for

each meal. Wash the bottle carefully and return it regularly.

TOT'S COOL PINAFORE OUTFIT

Anne Adams offers her en

chanting version of the pinafore in Pattern 4330-a cool pinafore that's useful as a sun-dress, worn apron to wear over other frocks. It buttons down the back and may have a saucy back bow. The matching or contrasting ruffles that spring out from the bodice look gay with ric-rac. The brief skirt is full and gathered. To complete the picture, there's an eye-shading sunbonnet of selffabric or a pretty color. Simple panties that are cut in one piece are included in this quickly-made

style. Pattern 4330 is available in children's sizes, 2, 4, 6, 8 and 10. Size 6, cunbonnet and pinafore, takes 25, yards 35 inch fabric and 3 yards ric-rac. Newest Sheets Boast Pockets

To Make Them Fit Your Mattress Perfectly and Save Any Wrinkling

Bed sheets make news afte great many years of humdrum ex-istence. That's because of two re-cent changes in their design. There's a no-tuck sheet with

pockets at the top and bottom to make it fit the mattress. The idea behind that is to avoid the wrink-ling of the lower bedsheet. And also there's another sheet with hems woren into the fabric as a decrative finish. This was done to save oss of length in making hems after sheets are bought. SAVE HEM LOSS

Especially helpful to the person furnishing a house or apartment for the first time is the method of the marking of the newer hemmed sheets. They are desigated on labels as single-bed, full-length; twinbed, full length; or double bed, full length. That does away with having to go home to measure the length of the bed or getting there with a sheet that's too short.

By SADIE B. CHAMBERS A SUMMER MEDLEY

So many things just pop into my mind this beautiful summer's morning, as I write to you, that I feel I should name it none other than a "Medley". Jams, jellies and preserves are all "calling the house wives" from everywhere, to decide quickly what they are doing in fruits, as all are ripening very rapidly. It gives every evidence of being a short season. For jams and jellies I thought you might like something a little

different, so try these: Five-Fruit Jan

2 quarts stoned cherries 1 pint red currants, 1 pint white currants (if impossible to obtain the two kinds use the quart o 1 quart gooseberries

pint raspberries

Sugar (medium) Remove the tops and tails from the gooseberries, pick over the raspberries and currants, and pit the cherries. For each cup of fruit use ¾ cup of sugar and insist upon obtaining the sugar of medium grade, when purchasing your can-

ning sugar. Place sugar and fruit in a pre serving kettle, stir often while cooking until fruits are tender and jam is thick. Seal in sterile glass

Medley Preserv 1 quart raspberries

1 quart red currants quart red cherries ripe pineapple

1/2 cup blanched chopped almonds

Wash and stone cherries, pick over the raspberries, stem the cur rants, shred the pineapple, cut or anges into small pieces, wash and dry the raisins, blanch and dry the almonds, chop the candied ginger. Measure the fruit, place in preserving kettle, place on slow heat, simmer for one hour, stir often. Heat the same quantity of sugar as of fruit, add to boiling fruit, cook with occasional stirring, to the con-

Red Currant Mint Jelly

after picking off the stems. Boil, adding just enough water to keep from sticking. Add 1 cup of tightiy packed mint leaves. Boil until the currants are quite soft, then pour into jelly bag and drain overnight. that's useful as a sun-dress, worn with panties beneath, or as an and for each cup of juice use % cup sugar. After measuring the juice place on heat and allow to boil for 20 minutes, then add heated sugar. Boil about five minutes giving the jelly test, whichever method you prefer. Place in jelly glasses and cover with paraffin. It is always such a joy making these currant jellies, which require no pectin to make a perfect jelly and they do have such a lovely natural flavor.

lasting flavor of Do Gum. Cooling, re refreshing satisfying! Enjoy it after ever meal! Millions do!

Summer, 1940

Suit Season

Smartly Tailored Types Favored, That May Be Kept Fresh and Crisp by Washing

It's always a suit spring. And, this year, it's a suit summer. For town, for suburbs, and for week-ends in the country, fashionables are buying and wearing the smartly tailored suits which may be kept fresh and crisp by wash-

There are gingham suits galore, in checks and plaids and subtle stripes. There are rough-textured rayon and cotton mixtures, plain linen, percale and many sheer materials, like dotted Swiss. CHECK GINGHAM IS CHIC

Perfect for hot city streets are suits of washable silk, non-crushable linen, sleek-sharkskin and the gingham in subdued color combinations. And, for cooler days (there will be some) those of tropical worsted and of wool and rayon nixtures. WITH OR WITHOUT BLOUSE

For the country, wear a suit ia gingham check or plaid or of the new, tissue-thin corduroy-as easy to wash as heavier corduroys always have been. Linen suits for country are of coarser, rougher material than those for town. And they come in brighter colors. Wear your summer suits with or without blouses. If without, tuck

a softly knotted scarf into the neckline. Be sure that both suits and blouses are guaranteed fast to sun and fast to washing. The most popular blouse to wear

with a simply tailored morning suit is a casual shirt. With dressier summer suits of dotted Swiss or silk, frothier, almost frilly blouses are in order. And with country suits, try a cotton sweater, halten or short-sleeved, open-necked shirt

They're Organized Husband-Plaguers

In New York there is said to be a unique institution known as the "How To Torture Your Hus-band Club." One member's husband sued for divorce, citing her as having smashed the windshield of his car with a poker, broken the stem of his favourite pipe, crushed the toes of his patent leather shoes with her high heels, locked him out of the house at night, placed the cat in his bed, shone the torch in his eyes as he tried to sleep, and complained bitterly that he did not help in the housework. The club meets so that dissatisfied women can pool their ideas and make their hus-bands' lives unbearble.

Re-Making Bed May Bring Sleep

A change in bedmaking tech-nique often will help to sclva sleeping problems. Bedclothes which are too tightly tucked in will interfere with the free movement of the sleeper and thus cause wakefulness. Most bedmaking authorities agree that the top sheet and blanket should be firmly tucked in at the bottom of the bed, but that they should be left hanging free at the sides.
